1. MHz/GHz only measures microprocessor internal clock speed; many factors affect application performance.
2. MB/GB equals one million/billion bytes when referring to storage capacity; accessibility may be less.
3. Measurements assume standard 12″ display.
4. IBM will provide hardware support for customers who create unique Windows XP Embedded images. Field problems for XP Embedded will need to be recreated under Windows XP Professional.
5. For a copy of the terms and conditions of IBM's Statement of Limited Warranty, please contact your IBM representative or authorized reseller.
6. Technical support times may vary.
