1. MHz/GHz only measures microprocessor internal clock speed; many factors affect application performance.

2. Screen sizes: 12" offers 800x600 pixels.

3. MB/GB equals one million/billion bytes when referring to storage capacity; accessibility may be less.

4. Memory supports both system and video. Accessible system memory will be the installed memory size less the amount defined for video.

5. Only available in some countries. Ask your IBM representative for details.

6. With the exception of the Microsoft Windows XP Professional and Microsoft Windows Embedded for Point of Service Preload models, an operating system is not included and can be purchased separately.

7. For a copy of the terms and conditions of IBM's Statement of Limited Warranty, please contact your IBM representative or authorized reseller.

8. Geography dependent.
