

New improvements – your POS information in PartnerWorld Systems & Services (PWSS) – getting better all the time

http://www-1.ibm.com/partnerworld/pwhome.nsf/weblook/pat_pos.html

The POS landing page in PWSS is bigger and better than ever. We have implemented a new navigation design that will make it easier to find the resources you're looking for. The information is now provided on three landing pages. Here is a map to the new site:

Overview

- Events
- Products and promotions resources
- Ready for Retail Store Innovations
- News and announcements
- Education
- Questions and answers

Competitive data and analysis

This is one of our new pages. Currently we have links to two important White Papers. There is much more coming, so visit often.

Regional resources

Another new section. You'll find a Quick Reference Guide from the Europe, Middle East and Africa region, in English as well as French and German. Watch this section grow as we continue to meet the needs of our Worldwide Business Partners.

Work continues to provide the resources you need and the easiest way to find it. Questions or comments, please contact:
