MAPPING PACKETEER APPLICATIONS

Packeteer devices collect, aggregate, and store network performance data. After you configure an external flow source for Packeteer, you can send flow information from a Packeteer device to QRadar SIEM. This allows QRadar SIEM to:

- Support packeteer FDR records.
- Classify, store, display, report, and apply NBAD to Packeteer data.
- Map standard Packeteer supported applications.
- Support any custom applications.

This technical note applies to systems running QRadar SIEM 6.1 and above. Unless otherwise noted, all references to QRadar SIEM refer to QRadar SIEM and IBM Security QRadar Network Anomaly Detection. References to flows do not apply to QRadar Log Manager.

When you create a new class ID in your Packeteer device, you must map this ID to a QRadar SIEM application ID. This allows QRadar SIEM to process the new class ID as a QRadar SIEM application ID. This document provides procedures for mapping a Packeteer class ID to a QRadar SIEM application ID.

NOTE

For more information on QRadar SIEM application IDs, see the *IBM Security QRadar SIEM Application Configuration Guide*.

Mapping a Packeteer Class ID	To map a Packeteer class ID to a QRadar SIEM application ID:
Step 1	Create the new class ID in the Packeteer device.
	For more information on creating a new class ID, see your Packeteer documentation.
Step 2	Using SSH, log in to QRadar SIEM as root user:
	Username: root
	Password: <password></password>
Step 3	Open the following file:
	/opt/qradar/conf/packeteer.conf

Mapping Packeteer Applications into QRadar SIEM

4 MAPPING PACKETEER APPLICATIONS

Step 4 At the end of the file, add a line for each new mapping you want to create in the following format:

<class ID>,<application ID>

Where:

<class ID> is the Packeteer class ID.

<application ID> is the associated QRadar SIEM application ID.

- Step 5 Save and exit the file.
- Step 6 Log in to the QRadar SIEM interface.

https://<IP Address>

Where <IP Address> is the IP address of the QRadar SIEM system.

Username: admin

Password: <root password>

Where <root password> is the password assigned to QRadar SIEM during the installation process.

- Step 7 Click the Admin tab.
- Step 8 On the navigation menu, click System Configuration.

The System Configuration pane is displayed.

- Step 9Click the System and License Management icon.The System and License Management window is displayed.
- **Step 10** Select the system you want to restart.
- Step 11 From the Actions menu, select Restart System.

QRadar SIEM restarts.

A NOTICES AND TRADEMARKS

What's in this appendix:

- Notices
- Trademarks

This section describes some important notices, trademarks, and compliance information.

Notices

This information was developed for products and services offered in the U.S.A.

IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not grant you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing IBM Corporation North Castle Drive Armonk, NY 10504-1785 U.S.A.

For license inquiries regarding double-byte character set (DBCS) information, contact the IBM Intellectual Property Department in your country or send inquiries, in writing, to:

Intellectual Property Licensing Legal and Intellectual Property Law IBM Japan Ltd. 19-21, Nihonbashi-Hakozakicho, Chuo-ku Tokyo 103-8510, Japan
