SMC components in summary

	Characteristic	Use For
RFE	Product Enhancement Requests	Review, submit & vote for product features
User Forum	Virtual location for Maximo technical Q&A	Asking, reviewing how to, feature and customization questions
Group	Community of people with a common interest	Networking, sharing with IBMers, clients, business partners
Wiki	Repositories of technical information	Access to detailed technical information
Blog	Snapshots of technical information (magazine article)	Keep current with best practices, feature and how-to information

Getting started

1. Create a developerWorks profile (if you don't already have one) at <http://ibm.co/ygRdE3>. A developerWorks profile is required to participate in groups, blogs, wikis and forums.
2. Log into Service Management Connect at <https://www.ibm.com/developerworks/servicemanagement/> Click on “Sign in” in the upper right hand corner and sign in using your developerWorks ID and password. You will see your user name in the upper right had corner when you are signed in.
3. Refer to the email that you received from dW-notify@us.ibm.com to join the Upgrading Maximo for Nuclear Power group and click on the “Join now” link at the bottom of the email.
4. Review and agree to the Mutual Confidential Disclosure Agreement. A copy is posted at <https://www.ibm.com/developerworks/community/terms/mutualconfidentiality/>
5. Optional steps
 - Use the Asset Management community on Service Management Connect as your launchpad to the Maximo social media channels (blogs, forums, wikis, RFEs). Bookmark the link in your browser.
<http://ibm.co/nokOHc> or
<http://www.ibm.com/developerworks/servicemanagement/am>
 - Join the Asset Management group . . . explore the Maximo wiki and follow the Maximo blog and the Maximo forum.

Creating a developerWorks profile

- developerWorks is open to IBM employees, business partners, and customers. A developerWorks ID is required for participation in groups, blogs, wikis, and forums. Creating an ID is easy at <http://ibm.co/ygRdE3>.

Mutual Confidential Disclosure Agreement

- The Upgrading Maximo for Nuclear Power group is a multi-party community. The members include representatives of other companies including IBM. Other members may be invited after this invitation is sent, but all members will be required to agree to the Mutual Confidential Disclosure Agreement before joining. The community contains a list of all community members and their companies. Contact your AVP lead if you need this information before joining.

The screenshot shows the developerWorks website interface. At the top, there is a navigation bar with the developerWorks logo and links for Technical topics, Evaluation software, Community, and Events. Below the navigation bar, the breadcrumb path is developerWorks > Community >. The main heading is "Mutual Confidential Disclosure Agreement". To the left of the main content, there is a sidebar with a link for "developerWorks terms of use" and a "Related links" section containing links to IBM Terms of use, IBM Privacy, IBM Social Computing Guidelines, IBM Copyright and trademark information, and IBM Patent information. The main content area contains the following text:

By using developerWorks, you may be subject to and, if so, will comply with the terms of the Confidentiality Agreement relating to mutual disclosures set forth below.

This Confidentiality Agreement ("Agreement") provides protection for confidential information ("Information") exchanged among the participants of a community or other component on developerWorks ("Site"). By accessing and using the Site, each of us agrees that the following terms apply when one of us discloses Information (Discloser) to the other (Recipient) in a community or other component on the Site.

Overview Restricted

This private group is a resource for Maximo for Nuclear Power customers and IBM employees to come together to discuss topics, post documents and share information on upgrading from earlier Maximo releases to Maximo 7.5.

This is a multi-party community. Other members may include representatives of other companies including IBM. Other members may be invited after this invitation is sent, but all members will be required to agree to the Mutual Confidential Disclosure Agreement before joining. The community contains a list of all community members and their companies. If you need this information before joining, please contact the community owner.

IMPORTANT: Confidential information, of IBM or community members, may be shared in this community. Clicking the Join Now button (or link) indicates that you agree to the terms of the Mutual Confidential Disclosure Agreement relating to mutual disclosures on the developerWorks community, for the protection of confidential information, posted at: <http://www.ibm.com/developerworks/community/terms/mutualconfidentiality/>.

Any materials submitted in this community may only be used by other members of the community for the furtherance of the purpose of this community.

Suggested uses . . .

- Ask a question or start a discussion
 - Use the Message Board to open topics covering a question or new discussion
- Report information on challenges and problems
 - Your problem or challenge may not be unique, sharing information with the group can help other utilities avoid issues and help IBM identify pervasive issues

Note: The Upgrading Maximo for Nuclear Power group should not be used in place of the normal support process for submitting PMRs

- Share documents
 - Use Files to post requirements or process flow diagrams to get feedback from group members

Message Board

- The message board allows community members to share thoughts and expertise on topics that matter to them, as well as engage in conversations with each other. Use the “Reply” option to add to the conversation for a topic or use the “Start a Topic” option to launch a new topic. The Message Board will be the focal point for ongoing exchanges within the Upgrading Maximo for Nuclear Power group.
