1. Introduction

1.1 Purpose

The ServiceAssure™ 3.1.3.8.19 Patch Installation Guide provides instructions on how to apply patch SA3.1.3.8.19 to a ServiceAssure™3.1.3 system.

1.2 Audience

The target audience of this document are Vallent, An IBM Company and ServiceAssure™ customers. They should be familiar with telecommunication and IT principles and should also have a good understanding of Solaris.

IMPORTANT: Before attempting to patch an installation of ServiceAssure you are strongly advised to read the release notes and any readme files distributed with your ServiceAssure™ software. Readme files and release notes may contain information specific to your installation not contained in this guide. Failure to consult readme files and release notes may result in a corrupt, incomplete or failed installation.

1.3 Document Structure

This document is organized as follows:

- Patch installation procedures.
- Rollback procedures are provided.

1.4 General Information about the Document

The note below is applicable to all procedures in the document where the user has to enter commands at the command line.

COMMAND PROMPT NOTE : *The following command prompts can be seen throughout this document:*

(hash): This prompt will be displayed if the user is logged in as user "root".

\$ (dollar): This prompt will be displayed if the user is logged in as either the "saserver" or "oracle" user.

Please note the above prompts are not part of commands. All commands must be entered after these prompts.

2. ServiceAssure™ Patch 3.1.3.8.19

2.1 ServiceAssure™ Patch Installation – Core Patch

DISTRIBUTED INSTALL NOTE: *In a distributed system, this section should be performed on the following distributed server(s):*

- *Application Server*
- *Database Server*
- *Gateway Server*

2.1.1 Preinstall

Stop all ServiceAssure™ processes if they are running by executing the following commands as user saserver on the ServiceAssure™ Server:

\$ sap stop

Use sap to ensure that the patch level is at SA3.1.3.8.18 before installing SA3.1.3.8.19:

```
$ sap version
```

2.1.2 Install

Place the SA3.1.3.8.19 patch package in the <target directory> (e.g. /appl) on the ServiceAssure™ Server.

As user **root**, execute the following commands on the ServiceAssure™ server(s):

```
# cd <target directory>/sa/admin/common/install/scripts
# ./deploy-patch -wmcr <target directory>/sa -version SA3.1.3.8.19 -mode install
```

The ServiceAssure™ patch installation can be broken down into the following sections:

User Checks

The install will ensure that the relevant users exist before commencing the ServiceAssure™ Software install.

```
Checking user saserver exists prior to install
```

```
.... Done
```

ServiceAssure™ Software Install

The install will automatically backup files to be patched and install the patched files:

```
Creating Backup directory for Patch Files
```

```
.... Done
```

```
Backing up patched files to /appl/<XXX.X.X.XX.XX> directory
```

```
.... backed up
```

2.1.4 Post install

Stop and start the sapmgr process

On Solaris, as user root:

```
# svcadm disable sapmgr-sa
```

(wait for the process to be disable : svcs sapmgr-sa could be used to check the state of the process)

```
# svcadm enable sapmgr-sa
```

On AIX as user saserver:

```
$sapmgr stop
```

```
$sapmgr start
```

Restart all ServiceAssure™ processes by executing the following commands as user saserver on the ServiceAssure™ Server:

```
$sap start domain
```

```
$sap start monitoring
```

```
$ sap start client
```

```
$ sap start adapters
```

2.2 ServiceAssure™ Patch Removal

To remove the ServiceAssure™ patch package, do the following:
Execute the following as user **root** on the ServiceAssure™ server(s).

1) Execute the deploy patch script

```
# cd <target directory>/sa/admin/common/install/scripts  
# ./deploy-patch -wmcr <target directory>/sa -version SA3.1.3.8.19 -mode remove
```

*Please enter the location of the ServiceAssure patch [/appl]:
Removing patch-SA3.1.3.8.19-patch*

*.....
Successfully removed patch-SA3.1.3.8.19-patch*

2) Adjust the installed patch history

Edit the file: <target directory>/sa/applied_patches

and ensure it contains the following lines only:

SA3.1.3.8.05

SA3.1.3.8.09

SA3.1.3.8.18

SA3.1.3.8.19

Edit the file: **<target directory>/sa/prev_version**

...and ensure it contains the following line only:

SA3.1.3.8.18
