

# **Siemens BSS Gateway Distribution Note**

Date: 25 January 2008

---

## 1 Associated Documents

The following documentation accompanies this release:

### 1.1 Referenced Documents

Document Name	Document Description
[Install Note]	This document describes the steps required to install and run a Gateway.
[Gateway Framework Distribution Note]	This document provides an overview of the release history of the Gateway Framework.

### 1.2 Other Related Documents

Document Name	Document Description
N/A	N/A

## 2 Introduction

You should read this Distribution Note before proceeding to install the Gateway Configuration.

For information on the Gateway Framework, its configuration and use refer to the [Gateway Framework User Guide].

The Gateway Framework and Vendor Gateway are supplied as separate packages. As part of the Vendor Gateway installation process, it must reference a Gateway Framework installation. This separation simplifies the maintenance and version control of multiple vendor Gateway installations on a single server.

This Distribution Note provides an overview of the release history of the Gateway Configuration.

## 3 Operating System Support

The Vendor Gateway is built using the generic Gateway Framework. The Vendor Gateway is currently supported on the platforms as in the Gateway Framework Distribution Note.

## 4 Perl Version

The Vendor Gateway supports Perl version 5.6.1.

## 5 Gateway Framework

The Vendor Gateway requires the Gateway Framework release 3.4 and above.

See [Gateway Framework Distribution Note].

The Gateway Framework and Vendor Gateway release and installation have been decoupled into separate packages and procedures.

See [Install Note].

## 6 Release History

### 6.1 Release 3.4.0

Release date 25 February 2008.

Listed below are the enhancements to this release.

#	Description
1	Support Gateway Framework 3.4.0

### 6.2 Release 3.3.1

Release date: 1 November 2007

The table below lists the enhancements in this release:

Enhancement #	Description
1	Include modules directory for Vendor Gateways

Note:

The VENDOR\_GATEWAY environment variable must be set to include the modules directory in the path before running Gateway, e.g.:

```
VENDOR_GATEWAY=${GATEWAY_ROOT}/modules/siemens-bss
```

### 6.3 Release 3.3.0

Release date: 18 July 2007

The table below lists the bugs fixed in this release:

Bug #	Description
57380	Some lif files not produced by the gateway
57368	Value Mismatch for the counters MEBUSTCH1,MEBUSTCH2.(SIEMENS_BSS_BR8)
57364	Duplicate lif files can be produced resulting in data loss
57326	Seimens BSS BR8 parser produced inappropriate lif file
57278	Error in the log file while parsing the raw data for Siemens_BSS_BR8 TP
57243	Incorrect Incoming Internal handover counters
57242	Gateway not always parsing all handover counters
57140	Errors in log file while parsing the raw data using ASCII Gateway V 3.0.0 (GSMGPRS_SIEMENS_BSS_BR8)
57129	Missing outer TCH C1_0_3 and C1_0_4 in LIF files
57122	Duplicate TRX PIFs are produced
57121	Siemens BSS BR8 raw files turned to bad
56122	Siemens BR8: Parser creates 2nd lif for endtime 00:00
56120	Siemens BR8: Identical PIF Filenames
56118	Siemens BR8: process still running after crash
56115	Siemens BR8 Parser Crashed with no error message
55774	Gateway needs to process good lines in the raw data files
55683	SIEMENS_ACL.pm usage of eof(FILEHANDLER) will not process last line in file
55665	FILENAME_HEADER_FIELDS is not working

55499	Siemens Utran parser hangs in a loop and causes log file to fill up the fil
55417	Parser hangs when processing incomplete rawdata files.
52857	Siemens BSS Parser cannot handle Incomplete Raw Data
52005	Missing data for Adjacent BTS
50195	Parser should read all data from 'long' name format
49577	Siemens BSS parser should write out new blocks for certain standard, extended and concentric measurements
48013	Siemens BSS BR6.0 - FILENAME_HEADER_FIELDS
48012	Siemens BR6.0 BSS Gateway - ACL file parsing issue
46784	SIEMENS_BSS: Gateway crashed
45988	Siemens BR7 parser overwrites PIF file when measurements within the rawdata file does not arrive in sequence
43766	Siemens BSS: New measurement type for Siemens BSS
43765	Siemens BSS: RE doesn't capture the expected format for BR7.0 raw file.
57380	Some lif files not produced by the gateway
57368	Value Mismatch for the counters MEBUSTCH1,MEBUSTCH2.(SIEMENS_BSS_BR8)
57364	Duplicate lif files can be produced resulting in data loss
57326	Seimens BSS BR8 parser produced inappropriate lif file
57278	Error in the log file while parsing the raw data for Siemens_BSS_BR8 TP
57243	Incorrect Incoming Internal handover counters
57242	Gateway not always parsing all handover counters
57140	Errors in log file while parsing the raw data using ASCII Gateway V 3.0.0 (GSMGPRS_SIEMENS_BSS_BR8)
57129	Missing outer TCH C1_0_3 and C1_0_4 in LIF files
57122	Duplicate TRX PIFs are produced
57121	Siemens BSS BR8 raw files turned to bad
56122	Siemens BR8: Parser creates 2nd lif for endtime 00:00
56120	Siemens BR8: Identical PIF Filenames
56118	Siemens BR8: process still running after crash
56115	Siemens BR8 Parser Crashed with no error message
55774	Gateway needs to process good lines in the raw data files
55683	SIEMENS_ACL.pm usage of eof(FILEHANDLER) will not process last line in file
55665	FILENAME_HEADER_FIELDS is not working
55499	Siemens Utran parser hangs in a loop and causes log file to fill up the fil
55417	Parser hangs when processing incomplete rawdata files.
52857	Siemens BSS Parser cannot handle Incomplete Raw Data
52005	Missing data for Adjacent BTS
50195	Parser should read all data from 'long' name format
49577	Siemens BSS parser should write out new blocks for certain standard, extended and concentric measurements
48013	Siemens BSS BR6.0 - FILENAME_HEADER_FIELDS
48012	Siemens BR6.0 BSS Gateway - ACL file parsing issue
46784	SIEMENS_BSS: Gateway crashed
45988	Siemens BR7 parser overwrites PIF file when measurements within

	the rawdata file does not arrive in sequence
43766	Siemens BSS: New measurement type for Siemens BSS
43765	Siemens BSS: RE doesn't capture the expected format for BR7.0 raw file.

The table below lists the enhancements in this release:

Enhancement #	Description
1	Bluewash
2	Support for BR8 data version

## 6.4 Release 3.0.0

Release date: June 2004.

The table below lists the bugs fixed in this release:

Bug #	Description
36024	Fixed configuration of Post Parser aggregation rules
36029	Header measurement object field naming corrected
37351	PIF naming guaranteed unique in Default Engine configuration.
37678	Fixed RE for counter matching in AGGREGATE_LINE
37680	SCANBTS handover blocks now named correctly for Siemens Tech Pack

The table below lists the enhancements in this release:

Enhancement #	Description
37350	Add option to discard data rows if validity value indicates bad data
37353	Allow field OPTIONAL_COUNTER_VALUE to be included in the data key to ensure uniqueness
37354	Add option to presort file before processing, as related measurement blocks do not arrive in a contiguous order.
37520	Allow caching of PIF keys/files to reduce number of PIFs/increase performance
40343	Support extended cell counter data type
1	Add support for new measurement objects in Siemens Radio Commander BR7.

## 6.5 Release 2.4.0

Release date: Oct 2003.

No bugs fixed in this release.

The table below lists the enhancements.

Enhancement #	Description
35781	Enhance the default post parser configuration to provide counter group aggregation for SCANBSC measurements
35782	Enhance the default post parser configuration to provide counter group aggregation for HO measurements
35784	Enhance the default post parser configuration to provide counter group aggregation for SCANTRX_CRXLVQUD measurements
35791	Enhance the default post parser configuration to provide

	counter aggregation over source cells for up to 32 target (adjacent) cells for SCANBTSHO
35794	Enhance the default post parser configuration to provide counter aggregation over source cells for up to 32 target (adjacent) cells for SCANBTSHO_2
1	Support for opening of compressed and gzipped raw files.

## 6.6 Release 2.3.0

Release Date: May 2003.

This is the initial release of the Gateway.

## 7 Type(s) and release(s) supported

The Gateway has been fully tested for:

Vendor Performance data	Release	Measurement Identification
Siemens BSS	BR8	Change in measurement class 8 to be split into individual measurement list (0-4). Class 1 includes support for standard extended and concentric cells. New counter support for measurement set (measet) parameter.
Siemens BSS	BR7	All BR6 measurement classes (0-11), and those introduced in BR7 (12,13) have been verified.
Siemens BSS	BR6	The Gateway has been tested against the following BR6 classes of data: 0-6, 10
Siemens ACL	BR5.5 ACL	This data consists of OMC MML request strings that contain Siemens network hierarchy data.

## 8 Tech Pack Support

The default configuration supplied with the Gateway supports Siemens BSS Tech Pack v1.1.

## 9 Raw input files

Scope	Attended Format/Syntax
Input files names to expect	For BR6 data: BSS_<BssId>.<StartRangeDateTime>.<EndRangeDateTime>.ASCII For BR5.5 ACL data: db<unique key>.acl.br55
Input file formats to expect	ASCII
Equipment/devices to expect data	N/A
Extraction mechanism	N/A
Transfer mechanism	N/A

## **10 Hierarchy input files**

N/A
