4 Known Problems / Useful Hints

4.1 valnt00067325 - DA Motorola RP4.2 Limited test activity from QA on verifying SMTM functionality

Description: Due to the unavailability of the SwitchMate network elements, this patch could not be quality tested in its entirety. This ticket was tested for syntactic correctness and installation ONLY. It is recommended for the final product to be properly tested in customer environment. SwitchMate support was reintroduced in this patch with no additional enhancements and is expected to function as it were in previous releases.

Impact: This would limit QA test scope. Test will only be conducted for the installation.

Workaround: None.
