

WebSphere® IBM WebSphere Business Services Tool Pack for Multiplatform

Version 6.2

Quick Start Guide

This guide is intended to get you started with installing and configuring the IBM WebSphere Business Services Tool Pack.

National Language Version: To obtain the Quick Start Guide in other languages, print the PDF from the Quick Start CD.

Product Overview

The IBM WebSphere Business Services Fabric for Multiplatform, Version 6.2 is a comprehensive SOA offering that builds upon and extends IBM's BPM platform. It is designed to help companies assemble and manage composite business applications to achieve greater flexibility and business model innovation. It adds an industry-specific, semantically aware layer to the IBM SOA Foundation to enable dynamic business service personalization and delivery based on business context.

The IBM® Business Services Tool Pack provides the design-time environment and tools for assembling business services for service-oriented architecture (SOA) applications.

The IBM Business Services Tool Pack provides you the tools to maintain, manage, and govern services meta-data, subscribers, policies, and governance processes. It enables domain-experienced software architects to create, publish, and manage industry-specific business service models and business policies. The IBM Business Services Tool Pack consists of the IBM Business Services Composition Studio and WebSphere® Integration Developer applications.

- The IBM Business Services Composition Studio is an assembly tool that contributes the Business Service Perspective to WebSphere Integration Developer (WID). It enables developers to assemble business services, create business policies, and simulate the dynamic assembly of business services. The IBM Business Services Composition Studio provides secure and governed access to IBM Business Services Repository.
- The WebSphere Integration Developer provides a complete toolbox for assembling and integrating composite solutions

1 Step 1: Access your software

If you download your product from Passport Advantage, follow the directions in the download document:

<http://www-1.ibm.com/support/docview.wss?rs=36&uid=swg24019223>

This product offering includes :

- Quick Start CD
- IBM Business Services Composition Studio
- Installer for Windows platform
- Licenses
- Documentation

The IBM WebSphere Business Services Tool Pack package consists of DVD/CD-ROMs that contain the installer files, artifacts, and documentation needed to install and set up your environment on a Windows platform.

Review the Business Services Tool Pack product license to ensure that you understand the usage restrictions for all software components included with the product. For a complete list of the components that are provided for your platform, see *"Installation Components, Requirements, Packaging and Process"* in the IBM WebSphere Business Services Tool Pack version 6.2 documentation. For complete documentation including installation instructions see the IBM WebSphere Business Services Tool Pack version 6.2 documentation at: <http://publib.boulder.ibm.com/infocenter/dmndhelp/v6r2mx/index.jsp>

Note: The WID is bundled as part of the IBM Business Services Tool Pack. The installation of WID is a separate process. Refer to WID documentation for details. You have to download and install the WebSphere Integration Developer V 6.2 as this is not included in the DVD/CD - ROM.

2 Step 2: Evaluate your hardware and system configuration

See detailed system requirements document at: <http://www-1.ibm.com/support/docview.wss?rs=36&uid=swg27009937>

3 Step 3: Review the installation steps

To install the IBM WebSphere Business Services Tool Pack perform the following high-level steps:

- A. Plan your installation and deployment environment. See "Software and Hardware requirements" for IBM Business Services Tool Pack section in the WebSphere Business services Fabric information center.
- B. Install the prerequisite Websphere Integration Developer, with the Integrated Test Environment.
- C.. Run the launch-Pad DVD/CD ROM to start the installation wizard that will guide you through the installation of the IBM WebSphere Business Services Tool Pack.
- D. Verify that your installation process has successfully installed all the required components of the IBM Business Services Tool Pack.
