

IBM accelerators for WebSphere Portal software
To support your business objectives

WebSphere® software

Speed time to value on your IBM
WebSphere Portal investment.

- **Track organizational goals and performance in real time**
- **Enhance employee, customer and partner self-service**
- **Manage, search and provide ready access to documents and Web content**
- **Collaborate more effectively**
- **Help enable your entire enterprise with enhanced portal technology, tools and capabilities**

When you're ready to implement a portal solution, the more quickly

and cost-effectively you can address key business challenges, the better. IBM created accelerators for IBM WebSphere® Portal software to simplify portal implementation and help you obtain faster time to value from common types of portal projects. What's more, the accelerators deliver flexibility and scalability to support your unique requirements and evolving needs.

With these new accelerators for WebSphere Portal software, IBM now provides software solutions that align with your business objectives, based upon the leading portal framework for service-oriented architecture (SOA) initiatives. Supported by WebSphere Portal offerings, IBM accelerators easily “snap in” to your current environment—helping you extend the value of existing investments. Best of all, you can easily add accelerators over time as your business needs change.

Accelerate WebSphere Portal value

Shorten implementation time with valuable business portal solutions.

IBM® Dashboard Accelerator

offering. Link strategic objectives to real-time performance information using dynamic dashboards and scorecards. With access to a new key performance indicator (KPI) catalog, you can easily download prebuilt industry and role-based dashboard portlets and assemble them into meaningful dashboard applications.

IBM® Content Accelerator offering.

Build and manage robust, high-value Web sites, intranets, extranets and portals. With the ability to easily create and personalize content using intuitive, Web-based tools, you can improve productivity and keep Web content current, accurate and searchable.

IBM® Collaboration Accelerator

offering. Drive team collaboration and improve productivity. Integrate IBM collaboration software tools—such as team work environments, document libraries, presence awareness, instant messaging, Web conferencing, and user profiles and directories—and enterprise social networking features like Web logs (blogs), wikis and shared bookmarks.

IBM® Self-Service Accelerator

offering. Streamline specific user activities through an intuitive, composite front end. For example, provide employees and managers with human resources (HR) self-service capabilities—such as the ability to view paycheck and tax information and manage career transactions—to free up HR’s valuable time.

IBM® Enterprise Suite Accelerator

offering. Support a wide range of portal projects across your connected enterprise with this integrated suite of content, collaboration, dashboard, forms and rich client support capabilities.

IBM accelerators for WebSphere Portal software at a glance

Accelerator	Dashboard	Content	Collaboration	Self-service	Enterprise suite
Product or offering	IBM Lotus® ActiveInsight™ 6.0 software*	IBM Content Accelerator offering	IBM Collaboration Accelerator offering	IBM Lotus Workforce Management 1.0 software	IBM Enterprise Suite Accelerator offering
Capabilities	Delivers real-time KPIs via personalized, portal-based dashboards; provides alerts and tools to help users take action at the point of greatest impact—before issues become critical	Web content management, document management, content search	Team work environments, document libraries, presence awareness, instant messaging, Web conferencing, user profiles and directories, blogs, wikis and shared bookmarks	An intuitive front end provides employees and managers with streamlined access to self-service capabilities	Dashboard, content, collaboration and electronic forms capabilities, as well as rich client support, to help address the needs of your entire connected enterprise

* IBM Lotus ActiveInsight Team Edition software is also available, offering support for midsize businesses and departments within larger organizations.

When you're ready to put a portal implementation on the fast track, simply choose the accelerator that addresses your business need and purchase the corresponding product, as shown in the table above.
