

Improve System z storage management with integrated storage suite

Teleconference – December 5, 2012

Highlights

Topics

- Consolidation of four IBM Tivoli z/OS storage management, audit, and reporting product components
- Data protection for integrated catalog facility (ICF) catalogs to help increase data availability
- Prevent, and recover from, many space-related abends
- Audit and automatically correct errors in the DFSMS environment to help reduce operating cost and avoid costly outages

Speaker: *Kevin Hosozawa*, Tivoli System z Storage Management Product Manager, IBM Software Group

Broadcast date: December 5, 2012,
11:00 a.m. EST /4:00 p.m. GMT / UTC

Developed for: IT and enterprise architects;
IT managers; system analysts; system administrators;
operations managers

Technical level: Intermediate

Out-of-control storage growth is putting a heavy load on many storage administrators—from the management of complex, multi-vendor heterogeneous IBM® System z® storage devices, to resolving performance bottlenecks with little visibility into the storage environment. Without an increase in budget or staff, it's also becoming more difficult to minimize outages and manage changes in the storage environment.

Teleconference

Join us for this complimentary teleconference as we review all the recent new capabilities in the Tivoli® System z Storage Suite, including integrated z/OS® storage management capabilities—visibility, control and automation—for the storage administrator. The suite can provide z/OS storage management awareness into application and workload management, enabling a more efficient process that helps reduce costs and fosters efficiency in problem identification and resolution.

The IBM Tivoli Advanced Storage Management Suite for z/OS, V1.1 delivers a feature-rich storage management, audit and reporting software suite that includes:

- IBM Tivoli Advanced Audit for DFSMSHsm V2.4
- IBM Tivoli Advanced Reporting and Management for DFSMSHsm V2.4
- IBM Tivoli Advanced Catalog Management for z/OS, V2.4
- IBM Tivoli Advanced Allocation Management V3.2

You'll learn how the new capabilities in this suite can improve storage availability and performance at a lower cost.
