

**Information Management**

# IBM OmniFind Yahoo! Edition: Make information actionable with no-charge enterprise search

**Highlights**

- **Benefit from no-charge Website and file system search of up to 500,000 documents**
- **Empower employees to rapidly find the information they need from inside the enterprise and the Internet**
- **Delight customers with intuitive search-based access to product and service information**
- **Integrate seamlessly with Yahoo! Internet search and enable users to search both the enterprise and the Internet from a single interface**
- **Install and customize in minutes with intuitive yet powerful administration capabilities**
- **Experience immediate ROI with no up-front investment; pay only for support**
- **Maintain flexibility for future growth with IBM's comprehensive OmniFind search portfolio**

Managers agree that providing employees with fast, accurate, search-based access to company information improves decision-making and increases firm productivity. However, with data scattered across a company's intranet, shared file systems, blogs and wikis, deploying a traditional enterprise search solution is a formidable, expensive and resource-draining challenge.

IBM OmniFind™ Yahoo! Edition is a no-charge, entry-level enterprise search software solution that enables rapid deployment of intranet and file system

search for both employees and customers. Seamless integration with Yahoo! Search enables users to search both the enterprise and the Internet from a single interface. The solution integrates smoothly with existing infrastructures and intranet sites and incorporates open source Apache Lucene search technology to deliver the best of IBM and community innovation. Access to IBM's expert service and support professionals, available through a paid support option, ensures any challenges are resolved in a reliable and timely manner.

<b>Business Value</b>		
<b>Beneficiary</b>	<b>Business Value</b>	<b>Contributing Factors</b>
Line of Business Manager	<ul style="list-style-type: none"> <li>• <i>Improve employee productivity</i></li> <li>• <i>Reduce costs</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Speed information retrieval</i></li> <li>• <i>Eliminate duplicative efforts</i></li> <li>• <i>Empower customers and business partners to quickly find information themselves (instead of contacting service representatives)</i></li> </ul>
IT Manager	<i>Improve responsiveness to business unit needs</i>	<ul style="list-style-type: none"> <li>• <i>Provide enterprise-wide search capabilities quickly and inexpensively</i></li> </ul>
Website Developers	<i>Enhance Website performance and business contribution</i>	<ul style="list-style-type: none"> <li>• <i>Incorporate search easily into an intranet or external site</i></li> </ul>

User	Beneficial Product Features
