Agenda

- Nortel IBM relationship
- SCS500
- Unified Communications next steps

Facts about Nortel

- Among top three leaders in Voice, Data, Applications
- 20+ years experience in SMB market leadership
- A broad portfolio of standards-based products
- An extensive partner community operating in 150 countries around the world
- Partnerships with industry leaders including Microsoft, IBM and Dell
 - **15 million SMB users**
 - **50 million Enterprise Users**
 - **50 million Data Networking Users**

IBM's Unified Communication & Collaboration Vision

- To foster innovation and business agility by making it easier for people to connect with, reach out to and collaborate with one another through a unified experience

IBM realizes this vision by delivering an open and extensible software platform with market leading hardware platforms and services that integrate presence awareness, instant messaging, e-mail, unified messaging, Web, voice, video, telephony and business applications across multivendor environments

Joint Nortel & IBM Mission

Deliver customer-centric solutions that transform enterprise and carrier communications

Market Objectives –

- Develop innovative solution together that meet customer needs
- Create new opportunities for our channel partners
- Expand opportunities for Nortel and IBM Integration Services
- Customer evolution to unified communications and communications-enabled business processes

A Solid Alliance – Nortel and IBM

- Dedicated sales and engineering support globally
- Joint development center investing in pipeline of innovation
- Complementary services partnership to ensure quality of experience
- Nortel is the exclusive IBM communications partner in SOA applications

Nortel-IBM Value

The Nortel logo features the word "NORTEL" in a bold, white, sans-serif font. The letter "O" is stylized with a white circle around it, and a white line passes through the center of the circle, creating a sense of motion or connectivity.

Vision: help our customers align their IT investments with their business strategies – business convergence

The IBM logo, consisting of the letters "IBM" in a white, bold, sans-serif font. The letters are composed of horizontal lines, with the "I" and "M" having more lines than the "B".

Vision: foster innovation and business agility via unified communications and open extendible platforms

- **Increased business agility**
- **Superior customer engagement**
- **Streamlined business processes**
- **Secure anytime/anywhere communications**
- **Network simplification and reduced TCO**
- **Simplified new service creation and delivery**
- **Seamless service mobility**
- **Differential policy enforcement**
- **Simplify business and back office processes**
- **Network management solutions**

The IBM logo, consisting of the letters "IBM" in a white, bold, sans-serif font. The letters are composed of horizontal lines, with the "I" and "M" having more lines than the "B".

**Better together for
Enterprise transformation**

The Nortel logo, featuring the word "NORTEL" in a white, bold, sans-serif font. The letter "O" is stylized with a white circle around it, and a white line passes through the center of the circle.

Data Centre Virtualisation & Green IT

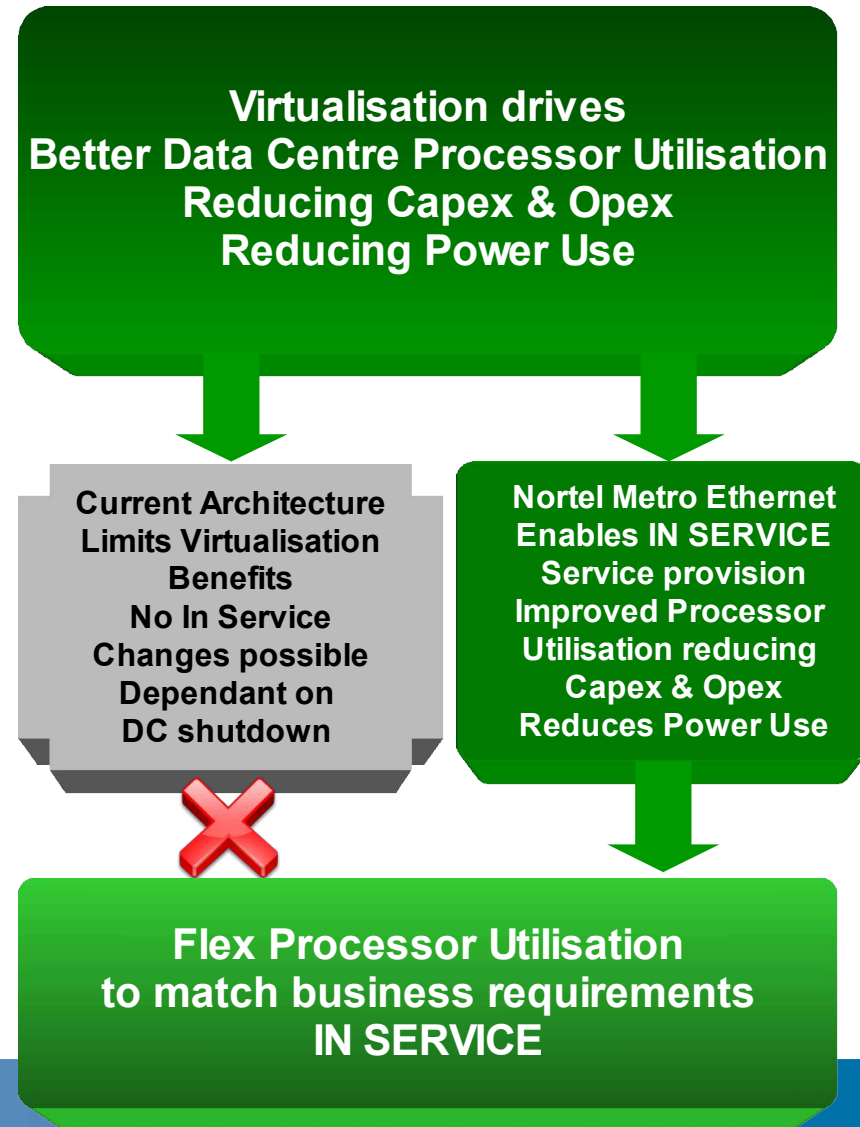

On-Demand Data Centre Resource Allocation

Need for server *Provisioning* for new projects or additional services.

Ability in near real-time to provide the appearance of continuous operations even in the face of physical hardware failure (*Dynamic Server Migration*).

Enable distribution of resources across geographically diverse data center for Business Continuity Planning (*BCP*)

Facilitate server *Roll-on and Roll-off* in the face of changing work arrival rates.

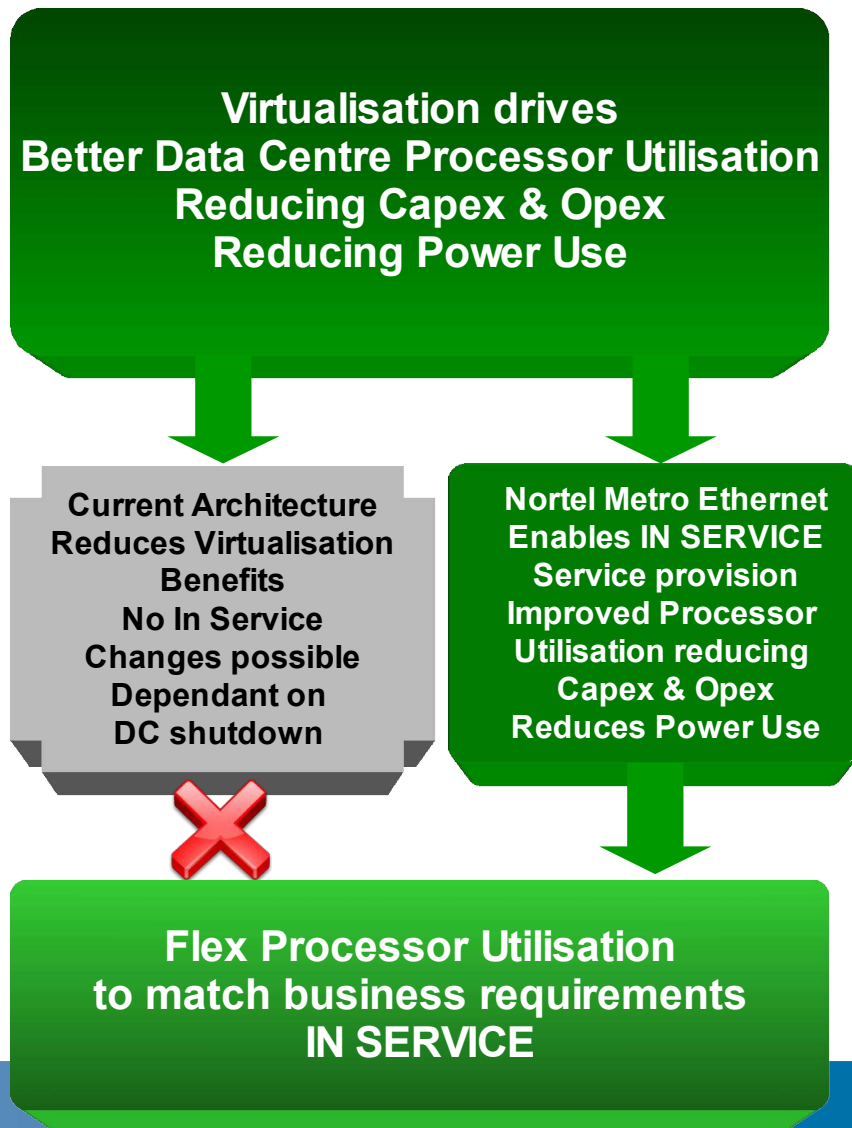

Nortel Innovation Data Centre Virtualisation

AMD recently commissioned a survey of 1,200 IT organizations on “Power Consumption and Cooling in the Datacenter”. The core finding is that enterprises are all over the map on how they’re addressing rising costs and power consumption. “While 44 percent were able to supply more power to the datacenter, 27 percent chose to consolidate servers,” the report notes, “25 percent reorganized their servers into hot-aisle/cool-aisle configurations, and 23 percent increased the size of their datacenters.”

What the study doesn't say is that despite the push for lower-power CPUs and more efficient configurations (blades and SANs and such), ***the biggest impact of rising energy costs is that it accelerates the virtualization tsunami. And the most meaningful impact of this acceleration may be more manageability and flexibility.***

Richer Communication & Collaboration

What is Unified Communications?

- One Access Point for all communications
- One method for accelerating all transactions
- A more productive operation
- One reason customers are more satisfied
- Accelerated Speed to results
- One path to greater profit potential
- Certainty in connecting with your team
- One open door to let in opportunity

Nortel SCS500/IBM Power Systems Unified Communications Solution

Product Overview

- **Combines Nortel's Software Communication Server and IBM Power Systems**
- **Designed for small and medium businesses with simplicity, reliability, and ease of use**
- **Supports industry standards like Session Initiation Protocol (SIP)**
- **Integrates with Lotus Sametime, Lotus Domino or Microsoft Exchange**

Integration with Business
And Collaboration Applications

Designed for Security and Reliability

Wide Choice of Phones and Gateways

Backed by two brands you can trust

IBM Power Systems Platform and SCS500

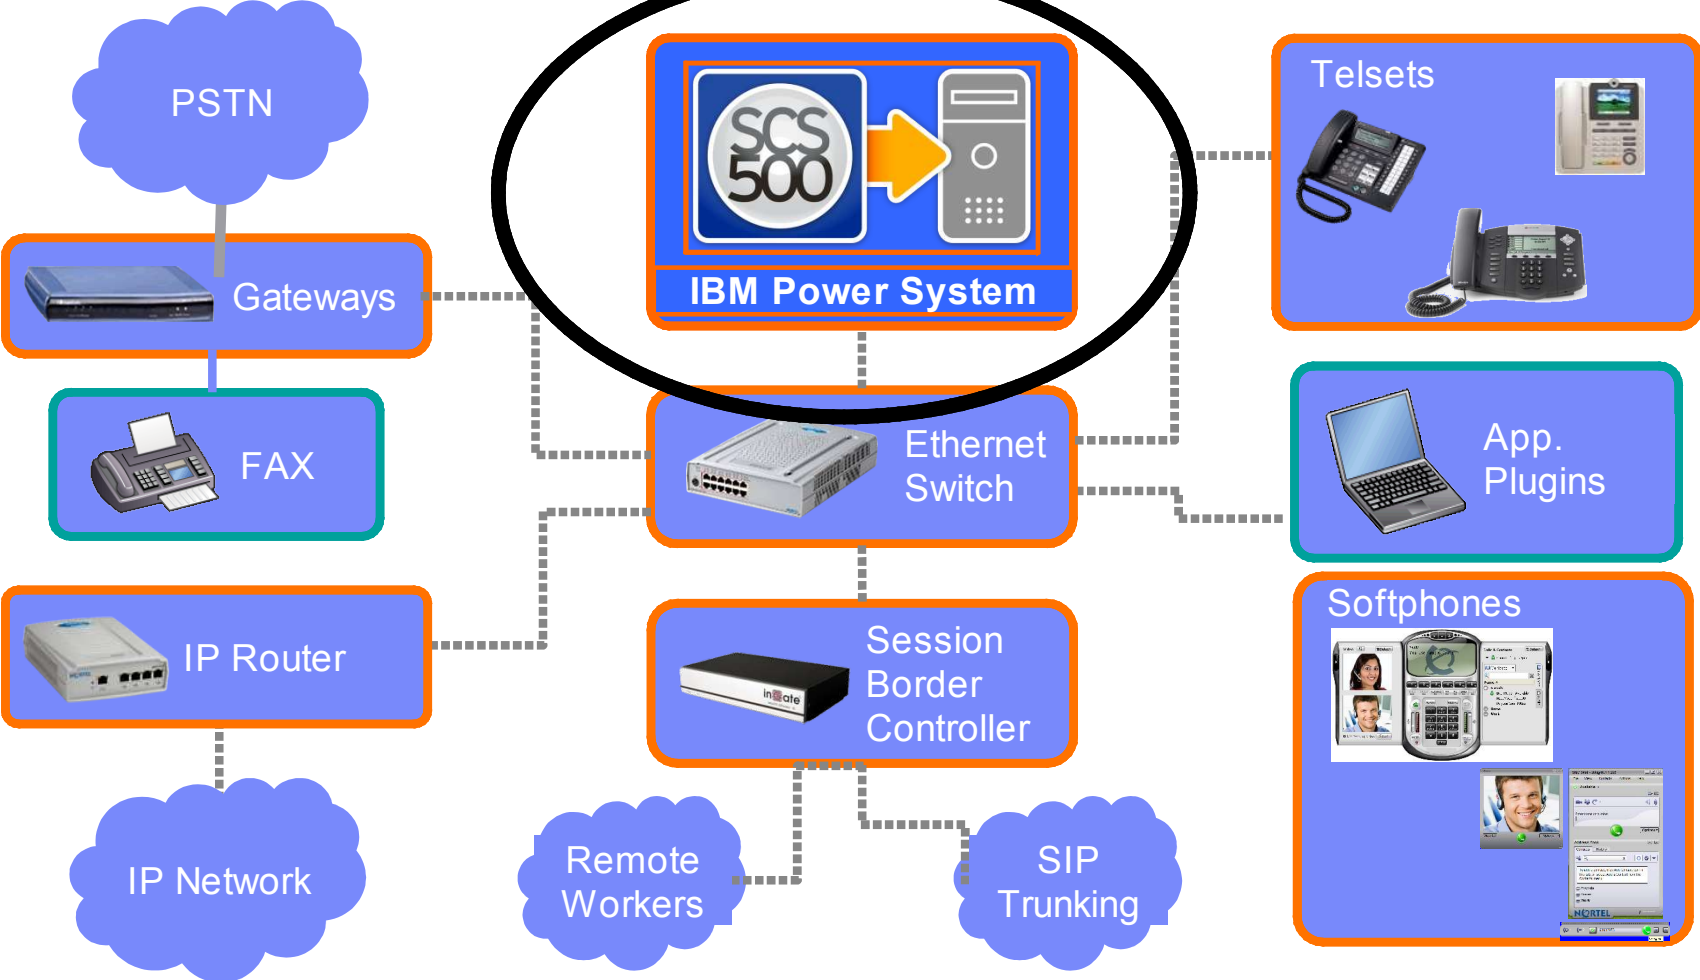

Reduce costs, boost productivity and increase your competitive advantage

Value Proposition

- Deploy a complete IP telephony suite on one system *or even part of a system*
- Leverages existing Network. Will integrate existing Voice and Data Network
- Integrate your voice, collaboration and business applications *to potentially reduce costs while increasing customer satisfaction*
- Extend the IBM Power System benefits of simplicity, reliability, integration, *vertical growth and security to IP telephony*

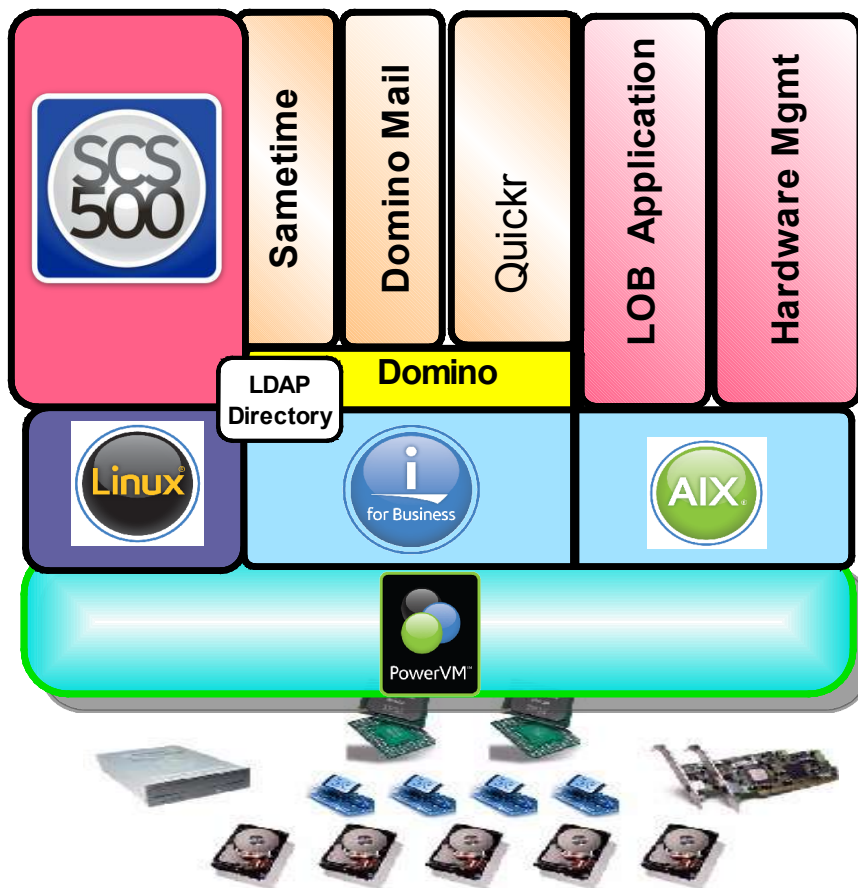

Software Communication System (SCS) 500 Solution Components

IBM Power Systems and SCS-architectural overview

The ideal platform for a hyperconnected enterprise

IBM Power Systems: The platform for the Hyperconnected Environment

● *Security and Business Resilience*

● *Highly Virtualized Resources*

● *Business-Driven Service Management*

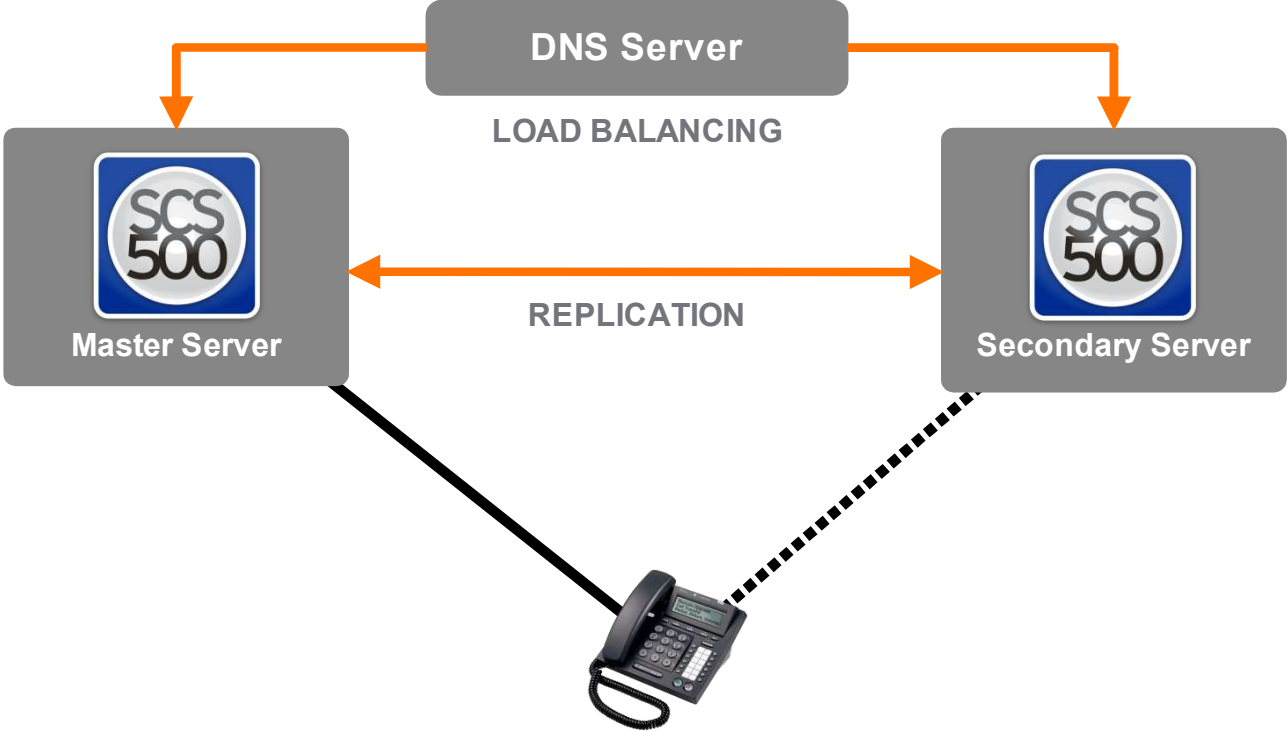

● *Efficient, Green and Optimized Infrastructure and Facilities*

● *Enterprise Communications Architecture*

SCS500 High Availability Design

Application Overview

Find me/Follow me	Sophisticated and easy-to-use, keeps your mobile employees accessible
Conferencing	Advanced, flexible and user-friendly multi-party conferencing capabilities for up to 200 attendees (including Meet me conferencing)
Auto Attendant	Enterprise-grade attendant for a personalized customer experience
Personal Auto Attendant	Empowers employees with mailbox customization; press 1 to leave a voicemail, 2 to reach my cell, etc.
ACD	Simple to configure and use yet highly effective contact center solution for up to 50 agents for businesses that just need the basics
Voice/Unified Messaging	Simple and flexible voicemail users can retrieve from their hard client, Softphone, portal or even via email.
Call Detail Reporting	Complete set of call records that are easy to access, browse and export

Phone Clients

	LG-Nortel IP Phone 6804	LG-Nortel IP Phone 6812	LG-Nortel IP Phone 6830
Level	Entry level phone	Intermediate-level phone	Professional-level functionality
User	“Low-use” common areas: lobbies, conference rooms	Knowledge workers, most employees	Attendants and office managers
LCD Display	N/A	3 line x 24 character LCD

SCS500 IBM Lotus Notes/ Sametime Plug-in

- Integrates into Sametime as a plug-in
- Integrated into Lotus Notes 8.0 as part of the Sametime integration
- Supported by Windows 2000, XP, and Vista Operating Systems

Find Me / Follow Me

- **Simple to use**
 - Intuitive web based portal
- **Sophisticated**
 - Simultaneous and sequential ring
 - Programmable ring times
 - Time of day and/or day of week options
 - Internal or external (permissions based) forwarding
- **Powerful**
 - Don't miss important calls
 - Keep mobile employees accessible

Example:

1. Incoming call is presented to desk set and cell phone simultaneously
2. If no response after 15 seconds, call is presented to one or two different numbers
3. If no response after 15 seconds, call is transferred to voice mail

**Greater accessibility + Fewer Missed Calls
= Increased Productivity**

Find Me / Follow Me

A personal attendant can be configured that answers calls that divert to voicemail. It can use keys 0 through 9, where the key 0 typically represents an assistant or group receptionist. You have to record a corresponding greeting that explains the attendants keys and their functions to inform callers about the possibilities.

Personal Auto Attendant – allows users to control menu options in personal mailbox. (example: press 1 for cell phone, press 2 for home, etc.)

Solution Components

Applications - Personal Auto Attendant

Gives users control over the way calls are handled

What is SCS500?

Voice Mail

- **Integrated voicemail system**
- **1000 voicemail boxes and MWI**
- **2000 hrs of storage on SCS 500 platforms**
- **Browser based user portal to manage personal mailbox**
- **User configurable distribution lists**
- **Manage Notifications:**
 - Email notification of new voicemail messages
 - Forwarding of message as .wav file
 - Supports several parallel notifications
- **Manage greetings: Multiple customizable greetings**
- **Operator escape from anywhere**
- **Remote voicemail access**
- **Up to 50 virtual media server ports per server (with 2GB RAM)***
- **Auto-removal of deleted messages**
- **Daily report on disk usage sent to admin**

*Shared with ACD Ports, etc.

SCS500 Conferencing

■ Simple to Use

- Intuitive Web-based portal for easy set-up and configuration

■ Flexible

- Meet me
 - Always on, informal meetings, optional passwords
- Scheduled
 - Pre-determined (with reserved capacity), formal meetings, optional passwords
- Instant
 - Participant initiates then system calls other participants, optional passwords

Savings on time, money and travel.

SCS500 Automatic Call Distribution (ACD)

New Opportunity
for Services

- ACD Server supported on same hardware as SCS applications
- Entry-level solution
- Accommodates up to 50 agents (30 active at one time)
- Up to 50 queues
- Standard feature – no Keycode required
- Ideal for customers who just want start in Contact Centre

Entry level Contact Center solution – highly configurable and easy to set up.

SCS500 Personal Auto Attendant & Voice/ Unified Messaging

- Integrated Voicemail system
- 2000 Stunden hours of storage
- Message forwarding via Email (.wav file)

Empowers employee to manage his availability

IBM Power Systems

Power = MANAGEABILITY + SAVINGS

Power = PERFORMANCE - COST

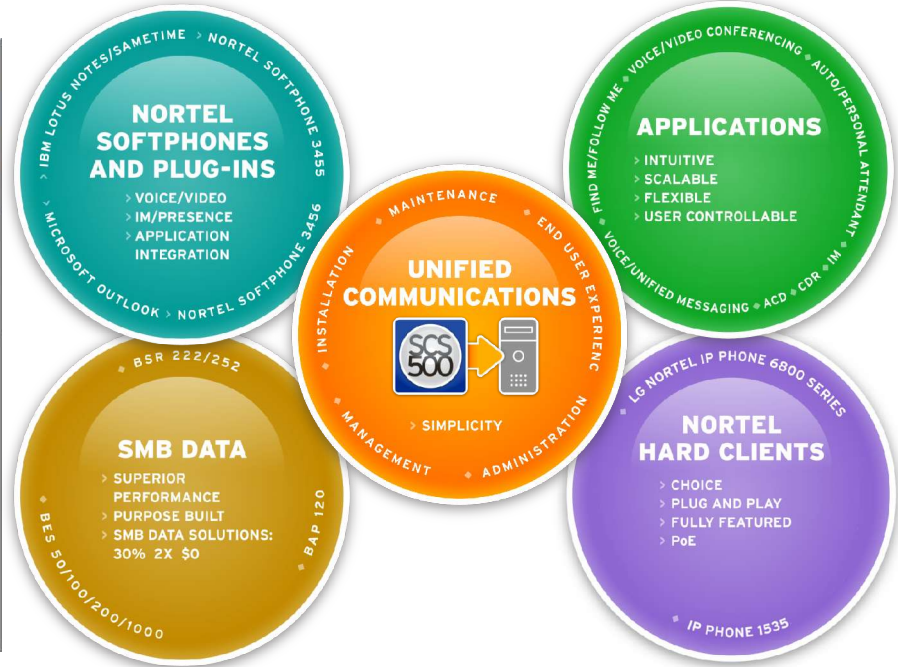

Power = 1 + P
