

# Smarter Cloud Computing

Pete Kearney, Cloud/Analytics Leader, STG UKI

**PCTY2011** 

Pulse Comes to You

**Optimising the World's Infrastructure**

# Agenda

Smarter Computing

Optimising IBM Systems

Architecture that Matters

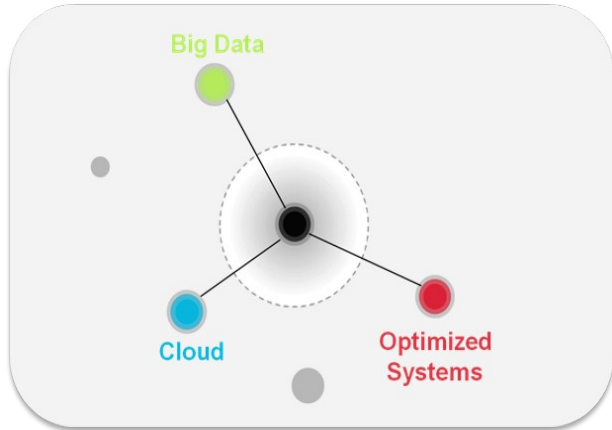

IBM Integrated Systems

IBM and Smarter Cloud Computing

## Smarter Computing The Era of Insight for Discovery

- Created by the integration of Big Data in Optimized Systems, managed as a Cloud
- Applied to deliver new insights and drive innovation
- Twice the capacity for service on a flat budget
- Achieving **'More with Less'** from your infrastructure assets

Efficient and innovative IT for improved economics

## *Optimized Systems will Address the Unique Needs of Specific Workloads*

### Domain Knowledge

- Workload characteristics
- Interdependencies
- Architecture options

### Software

- Stack integration
- Middleware tuned for hardware
- Integrated management across architectures

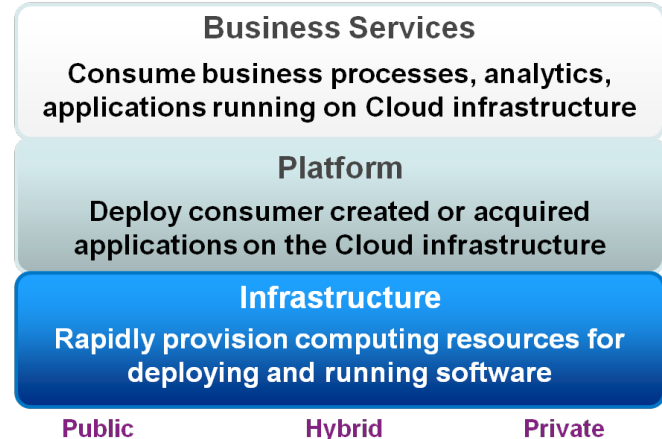

### Hardware

- Multi-core architectures
- Advanced threading
- Low latency

## *Cloud Will Play a Fundamental Role in this New Era*

### Cloud ...

- Masks complexity of underlying components
- Rapid deployment of processes and infrastructure
- Consumer driven services, process, deployment

# IBM platforms designed for Smarter Computing

## System z

**Freedom by Design**

Achieve up to **55% lower TCO per workload** – fit for purpose

## Power Systems

**Performance Redefined**

Power Systems running DB2 as low as **1/3 the cost of Oracle Database\***

## System x

**Defining a Next Generation of x86 Servers**

Industry leading Intel performance and **lower management cost by 50%**

## IBM Storage

**Storage Reinvented**

**Reduce power, operating and cooling costs by up to 60%**

## IBM Storage

**Storage Efficiency**

**Transparently compress primary storage by up to 80%**

Source: Based on IBM internal studies

\*Pricing comparison based on US list prices of IBM DB2 Advanced Enterprise Edition and the Oracle software with analogous capabilities: Oracle Database Enterprise Edition, Advanced Compression, Active Data Guard, Label Security, Partitioning, Oracle Enterprise Manager, Internet Developer Suite, Diagnostics Pack, Oracle-to-Oracle Federation, Golden Gate. All list prices based on US and valid as of 01/26/2011.

# Workload Optimised Systems - Watson

Provide New Types of Insights

## A System Designed for Answers

**Built on a cluster of commercially available Power 750 servers**

### Run 32 simultaneous tasks

- 8 cores per processor
- 4 threads per core

**Twice the bandwidth of other commercially available systems, 500 GB per chip**

**15 terabytes of RAM**

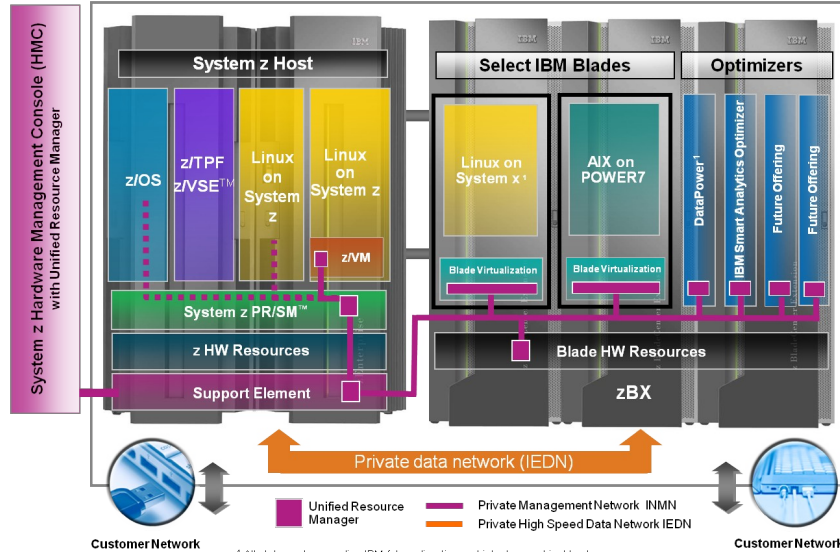

# Smarter Cloud Computing

## IBMs zEnterprise + zBX is the ultimate System of Systems ... a multi-platform Cloud-in-a-Box

Use the smarter solution to improve your application design

\* All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represents goals and objectives only.

*"The (...) change that's coming with the zBX, according to Doris Conti, director of System z marketing at IBM, is that Microsoft's Windows operating system will be supported on the Xeon blade servers inside the zBX complex. IBM has hosted over 300 workshops with mainframe customers discussing the new hybrid system, and customers were not exactly happy that IBM was restricting Linux to Xeon blades and not supporting Windows.*

*"We heard the feedback and we very much intend to deliver Windows support on zBX," says Conti."*

*The Register 2011*

# Architecture that Matters

- A Cloud Computing Architecture that incorporates a Business context
- Industry Orientation that considers typical Workloads
- IBM integration of the Technology Roadmap – inclusive of eco-system alliance partners
- Currently optimised for 2 specific Industry orientations – Telco & Healthcare

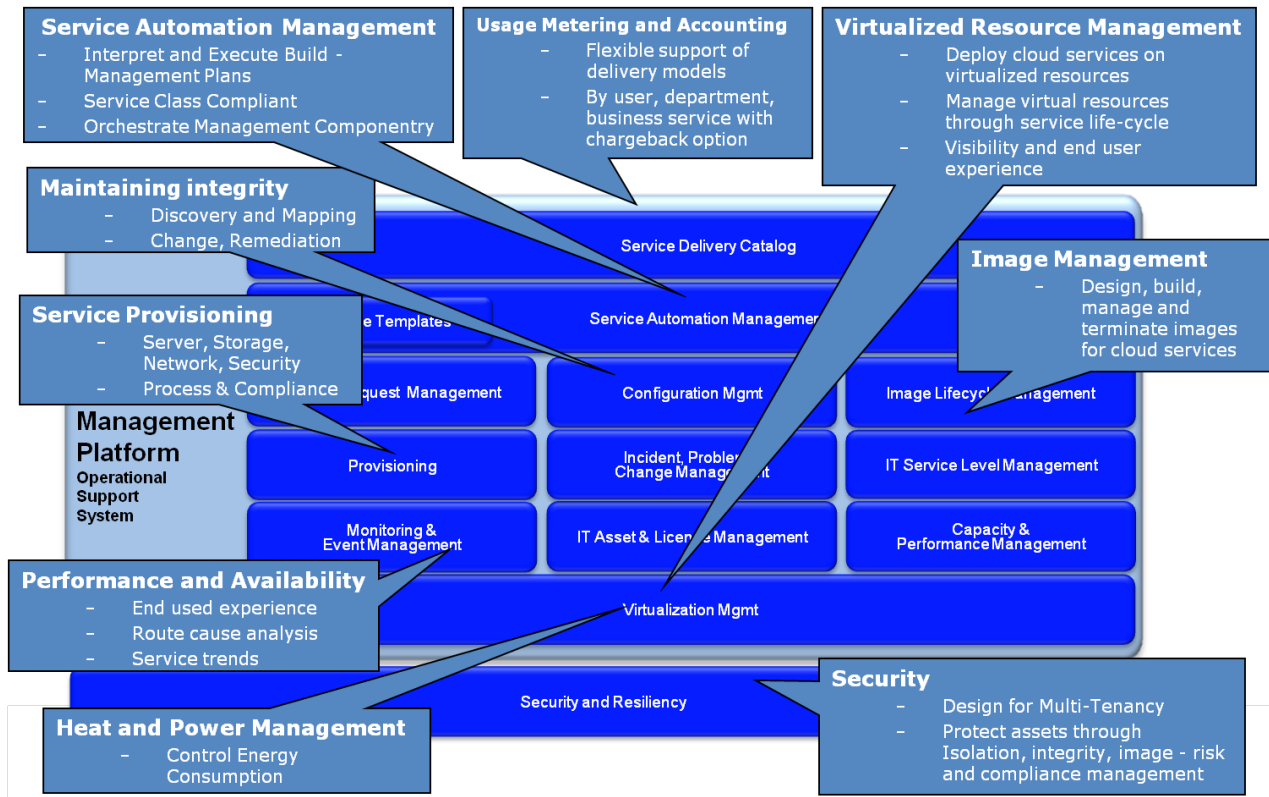

# IBM's Integrated Service Delivery Manager

## Integrated Service Delivery Manager (ISDM)

- Integrated portfolio of Cloud Computing software components
- Founded on TSAM - Service Automation & Management at its heart
- Provisioning & De-Provisioning
- Workflow patterns to enable necessary customisation
- Open Standards based

# Integrated 'Systems' - IBM Cloudburst

- **Usage and Accounting**
  - Provide metering and accounting for cloud services
- **Platform & Virtualization management**
  - Automated provisioning & mgmt of the virtual environment
- **Energy management**
  - Energy management of the hardware infrastructure
- **Storage network virtualization**
  - Improve storage utilization, Enable multi-tenancy support
- **Service automation**
  - Service catalog & Orchestration of cloud operations
- **Monitoring**
  - Monitor both physical and virtual server environments
- **High Availability**
  - Redundancy built in for high availability
- **Server, Storage, Network hardware**
  - Preinstalled and configured on IBM hardware

***"Built for Purpose" Cloud Solution***

# IBM as your Smarter Cloud Computing Partner

..... End

## Trademarks and disclaimers

Intel, Intel logo, Intel Inside, Intel Inside logo, Intel Centrino, Intel Centrino logo, Celeron, Intel Xeon, Intel SpeedStep, Itanium, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries. Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both. Microsoft, Windows, Windows NT, and the Windows logo are trademarks of Microsoft Corporation in the United States, other countries, or both. IT Infrastructure Library is a registered trademark of the Central Computer and Telecommunications Agency which is now part of the Office of Government Commerce. ITIL is a registered trademark, and a registered community trademark of the Office of Government Commerce, and is registered in the U.S. Patent and Trademark Office. UNIX is a registered trademark of The Open Group in the United States and other countries. Java and all Java-based trademarks and logos are trademarks or registered trademarks of Oracle and/or its affiliates. Other company, product, or service names may be trademarks or service marks of others. Information is provided "AS IS" without warranty of any kind.

The customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Some information addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

Prices are suggested U.S. list prices and are subject to change without notice. Starting price may not include a hard drive, operating system or other features. Contact your IBM representative or Business Partner for the most current pricing in your geography.

Photographs shown may be engineering prototypes. Changes may be incorporated in production models.
