

IBM Managed Security Services.

**Save up to 55% on security
management costs.***

Protection for business continuity, company assets and brand reputation – 24/7, 365 days a year.

IBM Managed Security Services (MSS) is a flexible, cost-effective solution that is designed to protect your IT infrastructure, whilst potentially improving uptime, productivity and business performance. Delivered under two portfolios: Managed Security Services and Cloud Security Services, you could avoid the need for large investment in technology and resources as its engineered to scan Web content for threats and block them before they reach your network.

Protection that comes with a £31,000 money-back protection guarantee on the Premium Level service.**

Some vendors may only offer a day of free service if a violation occurs, which might not be sufficient compensation considering the financial damage an attack could cause. MSS will give you up to a month free if any goals listed in your Service Level Agreement (SLA) are not met, as well as a standard of protection with guaranteed response times and countermeasures.

Furthermore, IBM is the only security provider offering pre-emptive protection and a money-back protection guarantee with our Premium Level service. So in the unlikely event of a security breach resulting from a threat listed on the IBM X-Force Certified Attack List, you will receive a cash payment of £31,000.**

Protection that enables IT staff to focus on more strategic initiatives.

By delegating the management of your security operations to IBM, your business gains the advantage of an array of tools, skills, processes and experience. MSS could also provide better protection at a lower Total Cost of Ownership (TCO) and free up your IT team from the day-to-day running of your security systems.

Ultimate protection that helps ensure you maintain compliance with government and industry security regulations, including:

- Gramm-Leach-Bliley Act.
- HIPAA.
- Payment Card Industry (PCI).
- Sarbanes-Oxley Act.
- ISO/IEC 27002/1.
- FISMA Compliance.
- SCADA Security Assessment.
- California Senate Bill No.1386.

Protection regardless of security vendors and business size.

In addition to managing IBM Internet Security System products, MSS supports vendors such as 3Com (IPS), Check Point (firewall), Cisco (IDS/firewall), Juniper (firewall), McAfee (IPS) and many more. IBM also works to blend their leading services, technologies and security intelligence into a single solution that is specific to your exact business and protection requirements.

Save up to 55% on your security management services* and help ensure your business receives the ultimate protection by calling 0800 028 6282 or emailing youribm@uk.ibm.com now.
