# VISUALAGE PACBASE BULL GCOS7, TDS 3.0 V07

## NEW FUNCTIONALITIES

### Installation and procedures

#### **VA Pacbase permanent files are now catalogued. (GCOS7 platform)(C:016707)**

VisualAge Pacbase permanent files are now catalogued.  
(GCOS7 platform)

#### **JCLs to start admin database management procedure are different than the current database ones(C:024605)**

To start procedures of database management without systematically specifying the BASE parameter (source of errors) :

- > All start JCLs are parameterized with \$BASE, n database specified at the installation.
- > The following JCLs have been created for ADMIN databas  
IVRSAD, IVARAD, IVROAD, IVSVAD, IVVING

# CORRECTED BUGS

## Batch Procedures

### **Constants extractor improvement(C:023635)**

Constants extractor improvement.

The extractor can now analyze all load modules such as compile units.

## Relational DBD

### **Useful data for DDL generation forgotten by the optimization of accesses to block descriptions(C:024260)**

DB2 DDL generation:

Elements defined in -GG of index or key are not generated.

The optimization of accesses to the block description forgot some useful data for the DB2 DDL generation.

This is now corrected.
