

End-2-EndDev Portal in Action – Presentation with Integrated Demos

The following are links to the presentation and integrated demos.

Presentation ONLY (6MB ppt file):

<ftp://ibm4me:qwerty1u@service2.boulder.ibm.com/Presentations/PRZPPT/current/End2EndDev/End2EndDev-PortletsInAction-WRH.ppt>

Demos (individual files) (*.avi files, *.swf files, camplay.exe and SWFPlayer.exe)

<ftp://ibm4me:qwerty1u@service2.boulder.ibm.com/Presentations/PRZPPT/current/End2EndDev/Demos/>

ALL → ZIP File with Pres and Demos (160MB zip file)

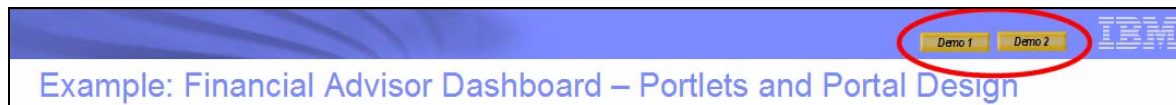

(Extracts and creates a new directory with everything in it called “.\End2EndDev-PortalInAction-PresAndDemos”

<ftp://ibm4me:qwerty1u@service2.boulder.ibm.com/Presentations/PRZPPT/current/End2EndDev/End2EndDev-PortletsInAction-WRH.ppt>

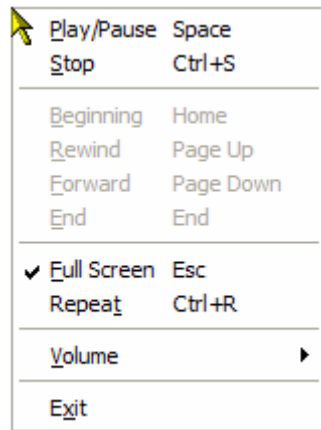

Note: If you download the presentation and demos separately (i.e. you don't use the zip file above) then make sure to put everything in ONE directory (don't create or use a separate directory called demos)

Movie Demo Playback TIPS

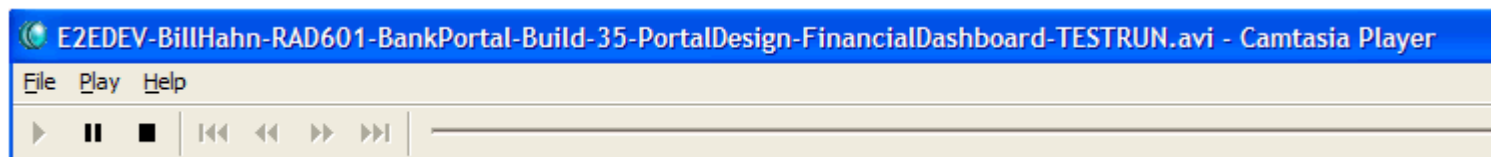

Click on the gold demo buttons at the top of some of the presentation charts when in “slideshow” mode:

Right (not left) mouse click on demos while they are running to see playback controls:

If you hit [Esc] or use the "Full Screen" item in the right-mouseclick menu (same thing) it will go out of fullscreen and you'll see a slider bar with DVD control at the top of the movie demo being played:

You'll also notice, when you're NOT in fullscreen mode, there is a progress status indicator in the lower right corner that shows minutes:seconds played / TotalMinutes:TotalSeconds:

I hope this helps to enhance your demo movie playback control experience.
