

Let the Classroom Come to You with IBM WebSphere Education Instructor-Led Online Training

- Experience the benefits of a live, instructor-led course with the convenience of an online format
- Eliminate the time and expense of traveling to a classroom location
- Instructor-led online (ILO) classes have exactly the same content — including hands-on labs — as the traditional classroom version
- Interact with your instructor and classmates in real time

Many companies are increasingly turning to the benefits made available through advancements in online learning environments. With IBM WebSphere Education's instructor-led online (ILO) courses you eliminate the expense of traveling to a classroom location. This saving can then be directed to additional advanced follow-on training or training additional members of your project team.

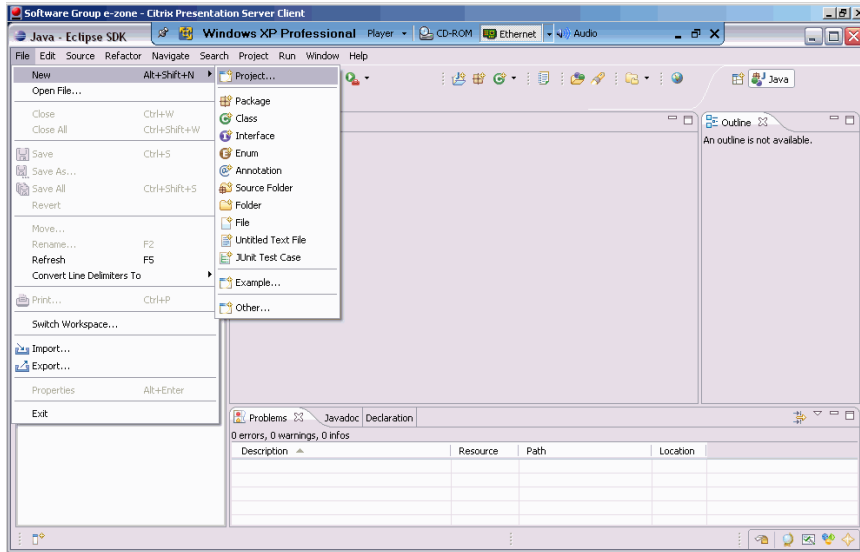

WebSphere Education's ILO courses can offer you the learning experience of a classroom course coupled with the time- and cost-efficiency of online training. You're linked with an instructor in a live, real-time, interactive learning experience without leaving your desk. With speakers, a microphone, or a headset, you become part of a virtual classroom where you can interact with the instructor — just like you would in a conventional classroom setting.

The classroom comes to you

Beyond the virtual classroom experience, WebSphere Education's ILO courses can offer:

Hands-on labs: The best way to learn is by doing. With WebSphere Education ILO training, you have access to the same hands-on labs available in classroom courses. The labs use the full version of the software you are studying and are available 24x7 during the duration of the course via servers accessible from your computer. In addition, the course instructor has the ability to shadow you as you work through the lab exercises to provide guidance and to address your questions and issues.

Consistent content and materials: The content provided in a WebSphere Education ILO course is exactly the same as that taught in the live classroom version — right down to the course materials. These are shipped directly to your location, and are also available as PDFs for future reference.

In ILO hands-on labs you will practice your new skills by working with fully-functioning versions of the software you studied

Dedicated class time: Just like a traditional classroom-based course, your training is focused. You'll have class during a dedicated time period.

Flexibility: All you need to participate in a WebSphere Education ILO course is a standard broadband connection. You can even take the training from your home.

Experience WebSphere Education ILO training

Learn more about how ILO classes are delivered, experience the online classroom environment, and see a sample hands-on lab through the WebSphere Education ILO training demonstration.

To view the online demo, visit ibm.com/training/us/ilo.

Get started now with WebSphere Education ILO

WebSphere Education currently offers over 40 ILO courses from across the WebSphere product portfolio and service-oriented architecture (SOA).
