

IBM Cordially invites you to attend
WebSphere® Technical Briefing

part of the continuing IBM event series

Add Value to your e-business

In this complimentary session, IBM technical experts will demonstrate how WebSphere can address business integration needs to help gain a competitive advantage. Regardless of size or complexity, all companies need a flexible, integrated and manageable platform to transact e-business.

The IBM WebSphere family is a proven, reliable and secure infrastructure software that helps companies close the gap between business strategy and information technology. The WebSphere product suite, including WebSphere Application Server, WebSphere Portal and WebSphere Studio Tools are built on open standards, making it the infrastructure for enabling Web Services.

This session is specifically designed for IT Architects and Managers. Register today and learn how to build and deploy e-business applications.
