

Providing virtually unsurpassed expertise
for efficient ENOVIA LCA implementation

IBM Product Lifecycle Management Services

Provides implementation for ENOVIA Version 5 Lifecycle Application

a flexible and tailored implementation path, our services can make it easier for you to efficiently complete all the necessary implementation steps, from planning and installation to custom application development and user and administrative training.

Using our insight to help accelerate your implementation process

Our 18-year partnership with Dassault Systèmes allows us to provide unsurpassed insight into ENOVIA and CATIA applications. Dassault is one of the industry leaders who deliver a broad range of innovative product lifecycle management solutions, and you can leverage our in-depth product knowledge to rapidly adopt ENOVIA and CATIA technology across your enterprise. Our proven industry expertise can also help you use industry best practices with your ENOVIA LCA implementation.

Giving you flexibility while capitalizing on proven methods

Each ENOVIA Version 5 LCA implementation follows a verified methodology and uses predefined ENOVIA project templates. We have developed these templates based on our global experience to help ensure a smooth and efficient implementation.

Highlights

- **Offers virtually unsurpassed ENOVIA expertise based on the IBM-Dassault partnership**
- **Leverages proven implementation methods while supporting flexibility**
- **Eases systems integration with a breadth of available skills**
- **Extends ENOVIA enterprise-wide to capitalize on your application investment**

Helping you successfully migrate to ENOVIA Version 5 LCA

An off-the-shelf, role-based suite of applications, ENOVIA Version 5 Lifecycle Application (LCA) can be rapidly deployed across your entire enterprise. However, to maximize the return on your investment, you must carefully plan the entire implementation process.

IBM Product Lifecycle Management (PLM) Services provides implementation for ENOVIA Version 5 Lifecycle Application to help you smoothly and effectively transition to the ENOVIA LCA environment. Designed to provide

While basic elements are common to many projects, your plan can be specifically tailored to the size and complexity of your ENOVIA implementation—helping to ensure that no project component is missed, no unnecessary steps are taken and each step is performed as effectively and efficiently as possible.

Easing the challenge of integration with a range of options

Because implementing ENOVIA Version 5 LCA can affect many other areas of your business, successful and efficient systems integration is vital. With IBM PLM Services implementation for ENOVIA Version 5 LCA, you have access to the full extent of the integration skills and experience of the people of IBM Global Services. Our knowledge of plant floor systems, enterprise resource planning systems and supply chain management systems as well as other applications in your enterprise gives you the resources you need for successful application integration. We can also help you synchronize your ENOVIA Version 5 LCA implementation plans with CATIA Version 5 implementation plans to help ensure overall project success.

Enhancing your return on investment through enterprisewide adoption

To fully capitalize on your ENOVIA investment, you need to make the new functionality available to everybody involved in your product lifecycle processes by extending ENOVIA across your extended enterprise, including your supplier network.

Our e-business hardware, software and consulting expertise can help you smooth the ENOVIA adoption process enterprisewide by providing the right infrastructure and the understanding of how best to implement collaboration environments that extend throughout and beyond the enterprise.

Relying on the breadth of IBM PLM services

IBM PLM Services provides product lifecycle management consulting and systems integration throughout the world. Our team is focused on CATIA and ENOVIA products and other product lifecycle management systems for automotive, aerospace/defense, electronics and fabrication/assembly industries. Other offerings from PLM Services include Implementation for CATIA V5, Headstart for ENOVIA VPM, CAD data exchange, enhanced support and Virtual Product Innovation consulting services.
