

_INFRASTRUCTURE LOG

_DAY 22: We've taken "add an app, add a server" to the next level: complete insanity. The servers require constant attention. Our fingers are cramping from rebooting. Haven't left the office in days.

_DAY 23: "Insane" doesn't begin to describe it. Around-the-clock maintenance is turning our staff into an army of zombies. Hey, even the undead get time and a half.

_I don't want to spend another night in the server room. I want control. I want an i.

I have control. I have a System i.™

System i gives you simplicity. *The System i is a complete business system – OS, database, software, security and storage, all in one.*

System i gives you freedom. *Thanks to the System i's legendary reliability, you'll have more time to focus on your business. You're not a slave to the system anymore, because the System i just... works.*

System i gives you one-step security. *The System i is more secure because it's easier to secure. Its innovative one-step security is specifically designed to be virus-resistant.*

System i gives you the best of IBM in one box. *The System i is instant infrastructure, designed for simplicity. And you don't need an army to manage it.*
