_THE INVASION

_DAY 18: So many servers. So many servers crashing. So many servers to reboot. So many security patches to push through. So few Neds.

_We spend our nights and weekends and federal holidays rebooting servers, but it's not enough. Gil's interviewing half the I.T. guys in the state. I'm afraid he wants an army of "Neds." This is out of control.

_DAY 19: Gil's crazy. More I.T. guys aren't the answer. The business is on the road to servermageddon.

_I don't want an army of "me's" to manage my infrastructure. I want control. I want an i.

IBM

I have control. I have a System i.™

System i gives you simplicity. *The System i is a complete business system—OS, database, software, security and storage, all-in-one.*

System i gives you freedom. *Thanks to the System i's legendary reliability, you'll have more time to focus on your business. You're not a slave to the system anymore, because the System i just…works.*

System i gives you one-step security. *The System i is more secure because it's easier to secure. Its innovative one-step security is specifically designed to be virus-resistant.*

System i gives you the best of IBM in one box. *The System i is instant infrastructure, designed for simplicity. And you don't need an army to manage it.*
