

System Management and Access on IBM i

Tim Rowe <u>timmr@us.ibm.com</u> Business Architect System Management

Before we get started.....

- A little background/history on IBM i Access family
- A Discussion on Strategy

What is System Access & Management

User Accessing the IBM i

Managing IBM i System

DB Engineer playing with the DB2 on i

Strategy

Why?

Core issues

- No support for Linux & Mac
- No support for Mobile
- Difficult to deploy for many users
- Difficult to update
- Development is costly
- Existing support is OLD The world has changed!

Answers

Solution themes

- Device & OS Neutral
- Flexible
- Easy to install and maintain
- Simple for a single user or 1000'
- Improved administrator situation
- Cost effective to create

iAccess for Windows Navigator **iAccess** Mobile Access Client Solutions **Application Runtime Expert**

DB2

IBM i Access Family

- The r7.2 / r7.1 IBM i Access Family of Products
 - IBM i Access for Windows (5770XE1)
 - Client Access
 - Most mature and widely used product
 - System i Navigator
 - 5250 Display and Printer Emulation
 - Data Transfer
 - Operations Console & Virtual Control Panel
 - IBM i Access for Web (5770XH2)
 - IBM i System Hosted HTML based web product
 - Very robust capability that has been well received
 - 5250 Display
 - Print Access
 - Database Access
 - IBM i Access for Linux (57X0XL1)
 - Lightly embraced product specifically for Linux RPM Operating Systems
 - ODBC provider
 - 5250 Display
 - Remote Command

- Data Access Providers
- Remote Command
- Print Drivers

Gongan Scholle

- Jobs

Access Client Solutions (ACS)

□ Core offering (platform independent)

- 5250 display and printer emulator
- Data transfer
- Printer Output
- Console consolidation
- Other misc features

Windows Application Package (Available at G.A.)

- Windows Installer MSI Package
- Data drivers (ODBC, OLEDB, .Net)
- Printer drivers

□ Linux Application Package (Available at G.A.)

- RPM and Debian Install Packages
- ODBC driver

Product Availability

- IBM i Access Client Solutions is identified as LPP 5733-XJ1
 - Not an IBM i OS installable LPP Client Device only!
 - <u>http://www-03.ibm.com/systems/power/software/i/access/solutions.html</u>
- Product distributed in zip files
 - Platform Independent Core Java product
 - IBM_i_Access_Client_Solutions_LCD#_*.zip
 - Contains product jar and other supporting files
 - Windows Application Package
 - IBM_i_Access_Client_Solutions_-_Win_AP_LCD#_*.zip
 - Contains 32bit and 64bit Windows installers
 - Linux Application Package
 - IBM_i_Access_Client_Solutions_-_Linux_AP_LCD#_*.zip
 - Contains Linux RPM and Debian installers

IBM

Frequently-asked Questions

- Supported connecting to IBM i OS r7.2, r7.1 and r6.1 (5.4, 5.3, 5.2,...)
- Exact Same Connectivity
 - Same 57xxXW1 Licenses for 5250 and Data Transfer
 - Connects to the same IBM i Access Host Servers
 - Connects to the same Ports

NOW!! Let's talk about the emulator

- Show of hands:
 - Who has tried the Access Client Solutions emulator?
 - Who has made the new emulator their own "go to"?
 - Who has made this emulator the organization standard?

Lets Compare....

IBM i Access Client Solutions is the newest member of the IBM i Access family. It provides a Java based, platform-independent interface that runs on most operating systems that support Java, including Linux, Mac, and Windows[™].

Access videos

IBM i Access Client Solutions consolidates the most commonly used tasks for managing your IBM i into one simplified location. The latest version of IBM i Access Client Solutions is available to customers with an IBM i software maintenance contract.

IBM

Improved ACS User Deployment – Singe & Multi User

New Deployment Wizard to Simplify and Improve ACS Deploy

- Administrator Options for Multi User Deployment
- Create Desktop Shortcut to Runtime location
 - Local or Network location
- Create File Associations
 - Old .ws files
 - New .hod files
 - Data Transfer
- Customization of Available Function
 - Control what functions display

How about deployment time?

• go from "just downloaded" to "deployed and running" in...

Less than a minute!

Really?

Yes, really!

- 1. Extract the downloaded .zip file
- 2. browse into the Start_Programs directory
- 3. Find the appropriate launcher and double-click!

Auto-push configuration

- Not only that, but product settings can be automatically pushed out to all users!
- This includes emulator stuff!
 - 5250 session profiles
 - Color mappings
 - Key mappings
 - Stuff we're going to talk about
 - etc.
- See product documentation for 'com.ibm.iaccess.autoimport' and 'com.ibm.iaccess.autoimport.version' properties for more info
- Article on deployment!!!

http://www.ibm.com/developerworks/ibmi/library/i-ibmi-access-client-solutions-customization-trs/index.html?ca=drs-

How about new features?

And you can do a bunch with them!

- You can drag them around (even between windows)
- · You can detach them to their own window
- you can even choose where to place them on the screen

And you can do a bunch with them!

• Not enough room on the screen? NO PROBLEM!

Yes, you can switch between tabs with the keyboard

- <alt>+<tab> switches between windows
- <ctrl>+<tab> switches between tabs within a window (you can customize)
- You can also define a key sequence for "Jump Next" and "Jump Previous", which will traverse all 5250 sessions (different tabs and windows)

 "Multiple sessions" types shows up in my 5250 session manager (just like with PC5250)

Anyone keeping score?

Don't worry... We're not done yet!

How about SSL?

- Show of hands:
 - Who uses SSL more often than unsecured connections?
 - Whose company enforces an SSL-only policy for IBM i?

Configuring SSL CA trust – The PC5250 way!

- 1. Open System i Navigator.
- 2. Right-click the name of your system.
- 3. Select Properties.
- 4. Select the Secure Sockets tab.
- 5. Click Download. This downloads the i5/OS certificate authority certificate automatically into the certificate key database.
- 6. You are prompted for your key database password. Unless you have previously changed the password from the default, enter ca400. A confirmation message displays. Click OK.

Relies on

- Non-SSL connection to IBM i IFS
- Certificate authority file in IFS matching what the server offers
- Not assigning multiple certificates on the server (new function in 7.2)

Configuring SSL CA trust – The ACS way!

Still only needed for self-signed certific	cates
Inquiry Message	
The following certificate authority was discovered during SSL negotiations: Issuer: CN=lp03ut28_CA, O=IBM, ST=MIN, C=US Subject: CN=lp03ut28_CA, O=IBM, ST=MIN, C=US Signature algorithm: SHA256withRSA OID: 1.2.840.113549.1.1.11 Validity begin date: September 28, 2014 Validity end date: September 24, 2034 Serial number: 1412004733 Public Key Type: RSA Would you like to add this certificate authority to your trusted set?	

Relies on:Clicking "Yes"

Work with Your Data

Works on Windows, Mac & Linux!!!

Run SQL Scripts

- Faster Startup Time
- Line Numbers
- Highlighting
- Color Coding
- Improved Usability
- Status Bar
- Stop Runaway
 Queries
- Find (supports Regex)
- Lots of Editor features
- Save Results .xlsx

How do you get the product....

- Product Web Site
 - <u>http://www-03.ibm.com/systems/power/software/i/access/</u> <u>solutions.html</u>
- Used to have to go to ESS
- No longer, down load from Product Web Page.

Summary

The ACS emulator is better than PC5250!!

Any Questions?

This document was developed for IBM offerings in the United States as of the date of publication. IBM may not make these offerings available in other countries, and the information is subject to change without notice. Consult your local IBM business contact for information on the IBM offerings available in your area.

Information in this document concerning non-IBM products was obtained from the suppliers of these products or other public sources. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

IBM may have patents or pending patent applications covering subject matter in this document. The furnishing of this document does not give you any license to these patents. Send license inquires, in writing, to IBM Director of Licensing, IBM Corporation, New Castle Drive, Armonk, NY 10504-1785 USA.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

The information contained in this document has not been submitted to any formal IBM test and is provided "AS IS" with no warranties or guarantees either expressed or implied.

All examples cited or described in this document are presented as illustrations of the manner in which some IBM products can be used and the results that may be achieved. Actual environmental costs and performance characteristics will vary depending on individual client configurations and conditions.

IBM Global Financing offerings are provided through IBM Credit Corporation in the United States and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates are based on a client's credit rating, financing terms, offering type, equipment type and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension or withdrawal without notice.

IBM is not responsible for printing errors in this document that result in pricing or information inaccuracies.

All prices shown are IBM's United States suggested list prices and are subject to change without notice; reseller prices may vary.

IBM hardware products are manufactured from new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

Any performance data contained in this document was determined in a controlled environment. Actual results may vary significantly and are dependent on many factors including system hardware configuration and software design and configuration. Some measurements quoted in this document may have been made on development-level systems. There is no guarantee these measurements will be the same on generally-available systems. Some measurements quoted in this document may have been estimated through extrapolation. Users of this document should verify the applicable data for their specific environment.
