**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

The platform detected a problem with a processor. The processor is not functional.

Look in the Serviceable Event View for a B1xx xxxx error that implicates a processor.

If the Serviceable Event View contains no B1xx xxxx error, or if resolving the error fails to correct the problem, contact your next level of support.

**Failing Item:**

- SVCDOCS
- 

**B7005433**

**Explanation:** The requested memory to be mirrored is now only partially mirrored due to a hardware issue.

**Response:** If a repair action was in progress, check for deconfigured memory. If that memory was a part of the service action and was replaced, disregard this SRC. Otherwise, if no service action involving memory was being performed, check the serviceable event view for memory-DIMM related errors and take the appropriate service action for repair.

**Failing Item:**

- SVCDOCS
- 

**B7005442**

**Explanation:** A parity error was detected in the hardware Segment Lookaside Buffer (SLB).

**Response:** A threshold on the number of SLB parity errors has been reached and the firmware has requested that the service processor guard out the failing processor core.

Collect all the SRC words and then contact your next level of support.

**Failing Item:**

- ANYPROC
  - NEXTLVL
- 

**B70054DD**

**Explanation:** System log entry only, no service action required

**Response:** A processor checkstop recovery occurred. A previous error log should provide notification of the failure, as well as any necessary service action.

This error log provides additional information regarding the detected reason for the failure and the recovery action taken.

---

**B7005600**

**Explanation:** System log entry only, no service action required.

**Response:** An attempt to initialize, read or use system VPD was unsuccessful. No action is required for this SRC.

Look for other hardware errors in the Serviceable Event View and if present, perform the actions indicated.

---

**B7005601**

**Explanation:** Platform LIC failure

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

There was a problem initializing, reading, or using system VPD.

**Failing Item:**

- NEXTLVL
- 

**B7005602**

**Explanation:** VPD LIDs may be out of date. System log entry only, no service action required.

---

---

**B7005603**

**Explanation:** Enclosure feature code and/or serial number not valid.

Platform Licensed Internal Code detected invalid VPD (feature code and/or serial number) for a System or I/O Enclosure. The invalid VPD may prevent the use of Concurrent Maintenance on any FRU in the enclosure and prevent hardware errors from being reported correctly, so it should be fixed at the next opportunity.

**Response:** Look at the FRU callout list in the serviceable events view for the B7005603 SRC to obtain the location information which contains the invalid feature code and/or serial number.

Note: This SRC does not require a service action if the location information is "U####.###.#####".

Next, find the System or I/O enclosure associated with this location, and locate the enclosure's physical label which contains the correct feature code and serial number.

Depending on whether the invalid VPD is for a System or I/O Enclosure, use the procedure below to correct the VPD.

If System enclosure:

Note: the system must be powered off prior to changing the System Enclosure VPD.

1. Using ASM, select: System Configuration -> Program Vital Product Data -> System Enclosures.
2. Update the feature code and/or serial number with the correct value, and then Save the changes.

If I/O expansion unit:

1. Using ASM, select: System Configuration -> Configure I/O Enclosures -> Change Settings.
2. Update the feature code and/or serial number with the correct value, and then Save the changes.

If the problem has not been resolved, contact your next level of support.

- LICCODE
  - SVCPROC
- 

**B70069C2**

**Explanation:** HSL OptiConnect established a normal connection to another system or partition. System log entry only, no service action required.

---

**B70069C3**

**Explanation:** HSL OptiConnect disconnected normally from a remote node. System log entry only, no service action required.

---

**B70069C6**

**Explanation:** Platform LIC detected an error

**Response:** Abnormal or unexpected HSL OptiConnect disconnection from a remote system or partition.

The local system or partition disconnected from a remote system or partition due to an unexpected event or failure. The problem, which most likely originates with the remote system or partition, probably requires intervention at the remote system. Examine both the local and remote HSL OptiConnected systems or partitions for problems on this RIO or HSL loop.

Possible reasons include: A fatal software or hardware error in the remote system or partition, or a power failure in the remote system.

If a complete RIO or HSL loop did not exist before this error occurred, the cause of this error might be a failure or power down in a RIO or HSL component between the local system or partition and the remote system or partition. Check for a problem with the following:

- A RIO or HSL cable
- The RIO or HSL I/O bridge
- Power in an expansion I/O tower or unit on this loop

On the local system or partition, examine the Service Action Log (SAL) or serviceable event view. Look for RIO or HSL failures that occurred on the same RIO or HSL loop at approximately the same time as this error.

Examine the remote system or partition for problems. If the remote system or partition is powered on and IPL'd, examine the SAL or serviceable event view on the remote system or partition. Look for problems on the same RIO or HSL loop that occurred at approximately the same time as this error.

Correct any problems you find with the remote and local systems or partitions that happened at approximately the same time and involve HSL Opticonnect or RIO or HSL loop components.

When the remote system is IPL'd, it will automatically reconnect with this system or partition. If you find no problems with either the local or the remote systems or partitions, collect all the Product Activity Log (PAL) information for this failure on both systems. Be sure to record all words in the SRC. Contact your next level of support.

**Failing Item:**

- SVCDOCS

- LICCODE

---

**B70069C7**

**Explanation:** Platform LIC detected an error

**Response:** Abnormal or unexpected HSL OptiConnect disconnection from a remote system or partition.

The local system or partition disconnected from a remote system or partition due to an unexpected event or failure. Licensed Internal Code will attempt to recover from the error. Intervention at the local or remote system or partition might be required.

Possible causes include time out, hang, or hardware failure. The problem may be with the local system or partition or the remote system or partition. If a complete RIO or HSL loop did not exist before this error occurred, the cause of this error might be a failure or power down in a RIO or HSL component between the local system or partition and the remote system or partition. Check for SRCs with FRUs that indicate problems with the following:

- RIO or HSL cables
- The RIO or HSL I/O bridge
- Power in an expansion I/O tower or unit on this loop

On the local system or partition, examine the SAL or serviceable event view. Look for failures on the same loop or with the RIO or HSL controller that occurred at approximately the same time as this error.

Examine the remote system or partition for problems. Correct any RIO or HSL controller problems you find with the remote and local systems or partitions. If you find no problems with either the local or the remote systems or partitions, collect all the PAL information for this failure on both systems. Be sure to record all words in the SRC. Contact your next level of support.

**Failing Item:**

- SVCDOCS
- LICCODE

---

**B70069C8**

**Explanation:** Platform LIC detected an error

**Response:** Abnormal or unexpected HSL OptiConnect disconnection from a remote system or partition.

The local system or partition disconnected from a remote system or partition due to an unexpected event or failure. All of the HSL OptiConnect connections on this loop will be in a failed state. Licensed Internal Code will attempt to recover from the error. Intervention at the local or remote system or partition might be required. Possible causes are:

- Time out of a critical message
- Licensed Internal Code code / table problem

- Network deadlock detected

The problem may be with:

- The local system or partition
- The remote system or partition

On the local system or partition, examine the SAL or serviceable event view. Look for RIO or HSL failures on the same RIO or HSL loop or with the RIO or HSL controller that occurred at approximately the same time as this error.

Examine the remote system or partition for problems. On the remote system or partition, examine the SAL or serviceable event view. Look for problems on the same RIO or HSL loop or with the RIO or HSL controller that occurred at approximately the same time as this error.

Correct any problems you find with the remote and local systems or partitions that happened at approximately the same time and involve HSL Opticonnect or RIO or HSL loop components.

If there are no problems with the remote system or partition and there are no problems with the local system or partition then collect all the Product Activity Log information for this failure on all systems or partitions. Be sure to record all words in the SRCs. Contact your next level of support.

**Failing Item:**

- SVCDOCS
- LICCODE

---

### B70069C9

**Explanation:** Platform LIC detected an error

**Response:** Abnormal or unexpected HSL OptiConnect disconnection from a remote system or partition.

The local system or partition disconnected from a remote system or partition due to an failure in a Licensed Internal Code virtualized bus unit. Licensed Internal Code will attempt to recover from the error.

Possible causes are:

- Licensed Internal Code problem where the local bus unit is offline.
- Licensed Internal Code problem where the remote bus unit is offline.

On the local system or partition, examine the SAL or the serviceable event view. Look for HSL Opticonnect failures that occurred at approximately the same time as this error.

Examine the remote system or partition for problems. On the remote system or partition, examine the SAL or

the serviceable event view. Look for HSL Opticonnect problems that occurred at approximately the same time as this error.

Collect all the Product Activity Log information for this failure on all systems and partitions on this RIO or HSL loop. Be sure to record all words in the SRCs. Contact your next level of support.

**Failing Item:**

- SVCDOCS
- LICCODE

---

### B70069CF

**Explanation:** Platform LIC detected an error

**Response:** Abnormal or unexpected HSL OptiConnect disconnection from a remote system or partition.

Licensed Internal Code internal error. All systems participating in HSL OptiConnect will be disconnected. You must re-IPL the system to recover. Before re-IPL'ing the system, start a platform dump.

On the local system or partition, after getting the dump, examine the SAL or the serviceable event view. Look for HSL Opticonnect failures that occurred at approximately the same time as this error.

Examine the remote systems or partitions for problems. On the remote systems or partitions, examine the SAL or the serviceable event view. Look for HSL Opticonnect problems that occurred at approximately the same time as this error.

Collect all the PAL information for this failure on all systems and partitions on this RIO or HSL loop. Be sure to record all words in the SRCs. Contact your next level of support.

**Failing Item:**

**Explanation:** Host Channel Adapter (HCA) failure

**Response:** The 12X Host Channel Adapter has failed.

**Failing Item:**

- HCA

---

### B70069E3

**Explanation:** System log entry only, no service action required

**Response:** Part of the HCA chip failed but was not terminating. When thresholded, these errors will result in a B70069E1.

## B70069E4 • B7006A24

---

### B70069E4

**Explanation:** An invalid 12X configuration was detected

**Response:** An error was detected in the 12X fabric. Have the customer check for problems reported at the IBM Network Manager. This includes cases such as path migration, etc.

**Failing Item:**

- SVCDOCS

---

### B70069E5

**Explanation:** System log entry only, no service action required

**Response:** A 12X communications error occurred. Unrecognized command from Subnet Manager. Does not require service.

---

### B70069E6

**Explanation:** System log entry only, no service action required

**Response:** The cable connection to the 12X switch is broken. Verify that the cable is connected and the switch is powered on. After repairing the problem, verify that the connection has been restored by using the IBM Network Manager. Does not require service.

---

### B70069E7

**Explanation:** System log entry only, no service action required

**Response:** The cable connection to the 12X switch has been restored. No service action required.

---

### B70069E9

**Explanation:** System log entry only, no service action required

**Response:** Initial communication has occurred with the Subnet Manager. No service action required. The CEC and switch firmware are now communicating.

---

### B70069EA

**Explanation:** System log entry only, no service action required

**Response:** Subnet Manager connection is established. No service action required.

---

### B70069EB

**Explanation:** User intervention required

**Response:** A 12X configuration error was detected by the HCA. Verify that the 12X configuration is correct at

the HCA. The Port 1 and 2 configurations conflict.

**Failing Item:**

- SVCDOCS

---

### B7006A20

**Explanation:** Invalid/Unsupported Hardware configuration detected

**Response:** Work with IBM support to determine the unsupported HW configuration.

**Failing Item:**

- SVCDOCS

---

### B7006A22

**Explanation:** A PCI-E Switch had a recoverable failure. However, all downstream I/O had to be failed during recovery. Recovery for the PCI-E Switch failure is being attempted. If the recovery is successful, no other SRC is logged.

**Response:** Once the PCI-E switch is recovered, the downstream I/O adapters should recover. The partition/application associated with the failed downstream I/O may have to be restarted.

**Failing Item:**

- SVCDOCS

---

### B7006A23

**Explanation:** PCI-E Switch recovery failure. All downstream I/O is failed.

**Response:** Exhaustive attempts to recover the PCI-E Switch failed.

If there are AIX/LINUX errors logged against I/O Adapters on this switch, do not replace any I/O Adapter hardware. This SRC is the root cause.

Work with your service provider to collect error logs. Then work with the FRU list in the Serviceable Event View if there is one; otherwise, use the FRU list documented here to determine the parts to exchange. After the FRU has been replaced, the partition/application associated with the failed downstream I/O may have to be restarted.

**Failing Item:**

- PCIE\_SW
- PCICARD

---

### B7006A24

**Explanation:** PCI-E Switch failure. All downstream I/O is failed.

**Response:** Collect error logs, informational logs, and configuration data associated with I/O adapters below the PCI-E Switch. Replace the PCI-E Switch FRU, and

send the failed FRU along with the collected data to IBM for fault analysis.

**Failing Item:**

- PCIE\_SW

---

**B7006A28**

**Explanation:** PCI-E Switch had a correctable error, Downstream I/O is not affected.

---

**B7006A2A**

**Explanation:** PCI-E Switch downstream I/O bus had a recoverable failure. A downstream I/O Adapter may be failed.

**Response:** Check the Serviceable Event view for other SRCs logged at approximately the same time as this SRC, and perform the actions indicated for those SRCs.

If no other SRC was logged, then the PCI-E Switch recovery was successful.

In either case, determine if any downstream I/O Adapters are in failed states and to which partitions they belong. The partition/application associated with the failed downstream I/O may have to be restarted.

**Failing Item:**

- PCICARD
- PCIE\_SW

---

**B7006A2B**

**Explanation:** PCI-E Switch downstream bus had recoverable failure, but has reached the threshold of recovery attempts. The Downstream I/O Adapter is failed.

**Response:** Collect error logs, informational logs, and configuration data associated with I/O Adapters below the PCI-E Switch. Work with the FRU list in the Serviceable Event View if there is one, otherwise, use the FRU list documented here to determine the parts to exchange. After the FRU has been replaced, the partition/application associated with the failed downstream I/O may have to be restarted.

**Failing Item:**

- PCICARD
- PCIE\_SW

---

**B7006A30**

**Explanation:** This reference code indicates that a PCI-E bus internal connection initialized to a lower bus configuration than expected. The bus is operational but operating at a bandwidth below its rated capacity. This may lead to degraded I/O throughput.

**Response:** If this event appears in a serviceable event view, work with the failing item list found there. If this

event does not appear in a serviceable event view, no service action is required.

**Failing Item:**

- PCIE\_SW

---

**B7006A72**

**Explanation:** IO downstream from a PCI-E Host Bridge (PHB) has been experiencing recoverable errors in a volume which exceeds an expected threshold.

**Response:** No immediate action is necessary. There are two repair actions recommended prior to replacing hardware identified by the FRU list. At the earliest convenient time or service window complete the following actions. If performing these repair actions resolves the problem, there is no need to consider the additional FRUs in the FRU list. If the same SRC is logged again as a serviceable event identifying the same location code after these repair actions have been completed, continue to the additional FRUs in the FRU list.

If you have recently completed the first of these actions for the failing FRU, continue to the second action. If you have recently completed both of these actions for the failing FRU, continue to the next item in the FRU list.

Reseat the IO adapter(s) at the location provided for the failing FRU. This will require a system power down for FRUs which are not hot-pluggable PCI adapters.

- If there is no location information provided, continue to the FRU list.
- If the location provided is for a single embedded or PCI adapter location, reseat the adapter at that location.
- If the location provided is for a FRU with multiple adapters plugged into it, such as an IO backplane, reseat each of the adapters plugged into the FRU at the location code provided.

Update the firmware on the adapter.

- If the location provided is for a single embedded or PCI adapter location, check for adapter firmware updates. Apply the update if one is available.
- If the location provided is for a FRU with multiple adapters plugged into it, check for adapter firmware updates for each of the adapters plugged into the FRU at the location code provided. Apply the updates if any are available.

**Failing Item:**

- SVCDOCS
- PCICARD
- BACKPLN
- PROCPHB

---

**B7006A76**

**Explanation:** A PCIe link failed to train to a slot in a PCIe3 I/O expansion drawer.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange. The FRU list in the serviceable event may have two PCICARD callouts as the first and second FRU callouts. The first PCICARD is for the adapter in the slot within the I/O expansion drawer. The second PCICARD is for the PCIe3 cable adapter used to extend the PCIe link from the system to a PCIe3 I/O expansion drawer. The PCICARD and PCIEXTN FRUs can be replaced in the same repair action.

**Failing Item:**

- PCICARD
- PCIEXTN
- DRWRMOD
- AOCABLE
- PROCPHB
- BACKPLN

---

**B7006A80**

**Explanation:** Failure of a PCIe3 cable path from the system to a PCIe3 I/O expansion drawer was detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- AOCABLE

---

**B7006A81**

**Explanation:** A lane sparing operation was performed on a PCIe3 expansion drawer cable running from the system to a PCIe3 I/O expansion drawer.

**Problem determination:** None

---

**B7006A82**

**Explanation:** A misconfigured PCIe3 cable path from the system to a PCIe3 I/O expansion drawer was detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP07
- AOCABLE
- DRWRMOD

---

**B7006A83**

**Explanation:** A misconfigured PCIe3 cable path from the system to a PCIe3 I/O expansion drawer was detected when exiting a Concurrent Maintenance operation.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP07
- DRWRMOD

---

**B7006A84**

**Explanation:** A failure of a PCIe3 cable adapter used to extend the PCIe link from the system to a PCIe3 I/O expansion drawer was detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- PCICARD
- PCIEXTN

---

**B7006A85**

**Explanation:** The firmware is unable to communicate with the transceiver module on the PCIe3 cable adapter. The PCIe3 cable adapter is used to extend a PCIe link from the system to a PCIe3 I/O expansion drawer.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- AOCABLE
- PCICARD
- PCIEXTN

---

**B7006A86**

**Explanation:** A CXP transceiver module Power Good fault was detected. This transceiver is used to extend the PCIe link from the system to a PCIe3 I/O expansion drawer.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- PCICARD
- PCIEXTN
- AOCABLE

---

**B7006A87**

**Explanation:** A bad Field Programmable Gate Array (FPGA) status was detected in a PCIe3 I/O expansion drawer module.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- DRWRMOD
- 

**B7006A88**

**Explanation:** The control path on the PCIe link is not trained.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- AOCABLE
  - PCICARD
  - PCIEXTN
  - DRWRMOD
- 

**B7006A89**

**Explanation:** Unable to communicate with transceiver module in one of the I/O modules of a PCIe3 I/O expansion drawer.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- AOCABLE
  - DRWRMOD
- 

**B7006A8A**

**Explanation:** A CXP transceiver module presence or power good fault was detected on the PCIe3 I/O expansion drawer module side of the PCIe3 expansion drawer cable.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- DRWRMOD
  - AOCABLE
- 

---

**B7006A8B**

**Explanation:** A PCIe Bus is running degraded (or potentially failed) to a PCIe3 I/O expansion drawer.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange. The PCICARD and PCIEXTN FRUs can be replaced in the same repair action.

**Failing Item:**

- PCICARD
  - PCIEXTN
  - DRWRMOD
  - AOCABLE
  - PROCPHB
  - BACKPLN
- 

**B7006A8C**

**Explanation:** A PCIe3 cable adapter and the PCIe3 I/O expansion drawer module Field Programmable Gate Array (FPGA) firmware versions do not match.

---

**B7006A8D**

**Explanation:** A PCIe3 cable adapter Field Programmable Gate Array (FPGA) was reset by hardware.

---

**B7006A8E**

**Explanation:** A PCIe3 I/O expansion drawer module Field Programmable Gate Array (FPGA) was reset by hardware.

---

**B7006A8F**

**Explanation:** PCIe link width degraded as detected by cable path health check.

---

**B7006A90**

**Explanation:** A PCIe3 I/O expansion drawer module bus reset threshold has been reached.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- DRWRMOD
  - DRWRMC
-

---

**B7006A91**

**Explanation:** The PCIe3 I/O expansion drawer module detected a retimer fault.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- DRWRVRM
- DRWRMOD

---

**B7006A92**

**Explanation:** A bus timeout occurred while attempting to communicate to the PCIe3 cable adapter Field Programmable Gate Array (FPGA).

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Problem determination:** Find the location code for the PCIe3 cable adapter (Un-Px-Cy-Cz) in the serviceable event view for the field-replaceable unit (FRU) associated with this reference code callout. If a PCIe3 cable adapter location code exists in this format, check the serviceable event view for other serviceable events with a system reference code of B1xxxxxx which callout the PCIe extender (Un-Px-Cy). If a serviceable event is found, follow the service procedures for that event. If no serviceable event is found or if no location code exists in this format, continue with the next FRU in the FRU list.

**Failing Item:**

- SVCDOCS
- PCICARD
- PCIEXTN

---

**B7006A93**

**Explanation:** No trained control path links exist on the PCIe bus running over the expansion drawer cable pair.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP07
- DRWRMOD
- PCICARD
- PCIEXTN

---

**B7006A94**

**Explanation:** The PCIe3 I/O expansion drawer chassis management card (CMC) is not ready.

---

**B7006A95**

**Explanation:** The chassis management card (CMC) has detected a fault.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- DRWRMC
- DRWRMOD
- DRWRMID

---

**B7006A96**

**Explanation:** Unsupported PCIe3 I/O expansion drawer module type detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP01
- DRWRMOD

---

**B7006A97**

**Explanation:** PCIe3 I/O expansion drawer main power is off when not expected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP03
- DRWRMOD

---

**B7006A98**

**Explanation:** The service path between the PCIe3 cable adapter and the chassis management card (CMC) in a PCIe3 expansion drawer is missing.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP02
- DRWRMOD

---

**B7006A99**

**Explanation:** An unmasked CXP Transceiver Module alarm was detected. This transceiver is used to extend the PCIe link from the system to a PCIe3 I/O expansion drawer.

---

**B7006A9A**

**Explanation:** An unsupported operation has been attempted against a PCIe3 cable adapter.

**Response:** Reconfigure the LPAR to remove the subject slot or perform I/O slot Concurrent Maintenance to remove the identified PCIe3 Cable Adapter before re-attempting the original operation (IPL or slot power control).

---

**B7006A9B**

**Explanation:** An unsupported PCIe3 cable adapter configuration was detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- PCICARD
- PCIEXTN

---

**B7006A9C**

**Explanation:** A PCIe path to the PCIe3 I/O expansion drawer experienced a recoverable event.

---

**B7006A9D**

**Explanation:** A misconfigured PCIe3 cable path from the system to a PCIe3 I/O expansion drawer was detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP07
- AOCABLE
- PCICARD
- PCIEXTN

---

**B7006A9E**

**Explanation:** PCIe3 I/O expansion drawer main power in unexpected state during IPL.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP04
- DRWRMOD

---

**B7006A9F**

**Explanation:** Mismatched or unavailable PCIe3 I/O expansion drawer module VPD detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP05
- DRWRMOD

---

**B7006AA0**

**Explanation:** A misconfigured PCIe3 cable path from the system to a PCIe3 I/O expansion drawer was detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP07
- DRWRMOD

---

**B7006AA1**

**Explanation:** A misconfigured PCIe3 cable path from the system to a PCIe3 I/O expansion drawer was detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP07
- DRWRMOD
- PCICARD
- PCIEXTN

---

**B7006AA2**

**Explanation:** A misconfigured PCIe3 cable path from the system to a PCIe3 I/O expansion drawer was detected.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP07
  - AOCABLE
-

---

**B7006AA3**

**Explanation:** A misconfigured PCIe3 cable path from the system to a PCIe3 I/O expansion drawer was detected when exiting a Concurrent Maintenance operation.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP07
- AOCABLE
- DRWRMOD

---

**B7006AA4**

**Explanation:** The PCIe3 I/O expansion drawer experienced a recoverable failure.

---

**B7006AA5**

**Explanation:** The PCIe3 I/O expansion drawer connection has recovered from a thermal overtemp condition.

---

**B7006AA6**

**Explanation:** A CXP transceiver module connected to a PCIe3 cable adapter has reported an overtemp thermal alarm. This transceiver is used to extend the PCIe link from the system to a PCIe3 I/O expansion drawer.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP08
- PCICARD
- AOCABLE

---

**B7006AA7**

**Explanation:** A CXP transceiver module connected to a PCIe3 I/O expansion drawer module has reported an overtemp thermal alarm. This transceiver is used to extend the PCIe link from the system to a PCIe3 I/O expansion drawer.

**Response:** Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- MEXIP08
- DRWRMOD
- AOCABLE

---

**B7006AA8**

**Explanation:** A Reset Link operation has been initiated from the PCIe Hardware Topology.

---

**B7009900**

**Explanation:** (N/A for external service docs)

---

**B7009901**

**Explanation:** (N/A for external service docs)

---

**B7009902**

**Explanation:** (N/A for external service docs)

---

**B7009904**

**Explanation:** (N/A for external service docs)

---

**B7009905**

**Explanation:** (N/A for external service docs)

---

**B7009906**

**Explanation:** (N/A for external service docs)

---

**B7009907**

**Explanation:** (N/A for external service docs)

---

**B700990F**

**Explanation:** (N/A for external service docs)

---

**B7009999**

**Explanation:** (N/A for external service docs)

---

**B70099FF**

**Explanation:** (N/A for external service docs)

---

**B700BA01**

**Explanation:** During analysis of a previous serviceable error, a request to activate a FRU Fault indicator was not successful.

**Response:** Look in the serviceable event view to determine the location of the FRU associated with the FRU Fault Indicator activate failure. If the problem persists after the FRU has been replaced, contact your next level of support.

**Failing Item:**

- SVCDOCS

---

**B700BA02**

**Explanation:** Unexpected SRC found in Error Analysis processing.

**Failing Item:**

- LICCODE
- 

**B700BAD1**

**Explanation:** Platform firmware detected an error

**Response:** Platform firmware detected unexpected or not valid data returned from non-platform firmware.

Contact your next level of support.

**Failing Item:**

- NEXTLVL
- 

**B700BAD2**

**Explanation:** Platform firmware detected a condition which may impact error reporting to a partition.

**Response:** Collect the error logs and contact your next level of support.

**Failing Item:**

- NEXTLVL
- 

**B700BAFD**

**Explanation:** Task flight recorder data logged prior to wrapping. No service action is required.

---

**B700CA00**

**Explanation:** A coherently attached accelerator has encountered an error condition that does not disrupt its normal operation.

---

**B700CA10**

**Explanation:** A coherently attached accelerator has encountered an error condition.

**Response:** Collect the error logs and contact your next level of support.

**Failing Item:**

- SVCDOCS
- 

**B700CA20**

**Explanation:** A coherently attached accelerator has encountered an error condition.

**Response:** One or more resource dumps may have been initiated. Collect these for analysis. Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

---

**Failing Item:**

- PCICARD
  - PROCPHB
  - BACKPLN
- 

**B700CA21**

**Explanation:** A coherently attached accelerator has encountered an error condition.

**Response:** One or more resource dumps may have been initiated. Collect these for analysis. Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange. The FRU list in the serviceable event may have two PCICARD callouts. The first PCICARD is for the adapter in the slot within the PCIe3 I/O expansion drawer. The second PCICARD is for the PCIe3 cable adapter used to extend the PCIe link from the system to a PCIe3 I/O expansion drawer.

**Failing Item:**

- PCICARD
  - AOCABLE
  - DRWRMOD
  - PROCPHB
  - BACKPLN
- 

**B700CA80**

**Explanation:** A coherently attached accelerator has encountered an error condition.

**Response:** One or more resource dumps may have been initiated. Collect these for analysis. Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- PROCPHB
- 

**B700CA81**

**Explanation:** A coherently attached accelerator has encountered an error condition.

**Response:** One or more resource dumps may have been initiated. Collect these for analysis. Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- PCICARD
-

---

**B700CA82**

**Explanation:** A coherently attached accelerator has encountered an error condition.

**Response:** One or more resource dumps may have been initiated. Collect these for analysis. Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange.

**Failing Item:**

- PCICARD
- PROCPHB
- BACKPLN

---

**B700CA83**

**Explanation:** A coherently attached accelerator has encountered an error condition.

**Response:** One or more resource dumps may have been initiated. Collect these for analysis. Work with the FRU list in the serviceable event view if there is one, otherwise use the FRU list documented here to determine the parts to exchange. The FRU list in the serviceable event may have two PCICARD callouts. The first PCICARD is for the adapter in the slot within the PCIe3 I/O expansion drawer. The second PCICARD is for the PCIe3 cable adapter used to extend the PCIe link from the system to a PCIe3 I/O expansion drawer.

**Failing Item:**

- PCICARD
- AOCABLE
- DRWRMOD
- PROCPHB
- BACKPLN

---

**B700F103**

**Explanation:** Platform LIC failure

**Response:** Work with the FRU list on the serviceable event view if there is one, otherwise, use the FRU list documented here to determine the parts to exchange.

The platform LIC detected an internal problem.

Collect all the SRC words and the platform system dump, then contact your next level of support.

**Failing Item:**

- LICCODE

---

**B700F104**

**Explanation:** Operating System error

**Response:** Platform Licensed Internal Code terminated a partition.

If SRC word 3 is 0018, then a user may have initiated a

function 22 prior to the operating system completing the IPL. If a function 22 was not performed, or if SRC word 3 is not 0018, look for other serviceable errors which occurred at same time frame.

If SRC word 3 is 0017, it means that during partition mobility an unrecoverable error occurred after the partition had resumed on the target system. Close this problem and look for other serviceable errors that occurred around the same time. Perform any actions indicated to resolve those errors.

If SRC word 3 is 0007 or 0009, then the failing partition received a Machine Check without having a Machine Check handler enabled. This could be due to the Machine Check occurring while the partition was in an IPL. If an IPL was not in progress, or word 3 is different, look for other serviceable errors which occurred at approximately the same time, and contact your next level of support.

**Failing Item:**

- SVCDOCS

---

**B700F105**

**Explanation:** Platform LIC detected an error

**Response:** The platform LIC detected an internal problem.

Collect all the SRC words and the platform system dump, then contact your next level of support.

**Failing Item:**

- NEXTLVL

---

**B700F106**

**Explanation:** Platform LIC detected an error

**Response:** The system will terminate.

Collect all the SRC words and then contact your next level of support.

**Failing Item:**

- ANYPROC
- NEXTLVL

---

**B700F107**

**Explanation:** Dynamic replacement of checkstopped processor failed.

**Response:** Collect all the SRC words and then contact your next level of support.

**Failing Item:**

- NEXTLVL
-

---

**B700F108**

**Explanation:** A firmware error caused the system to terminate.

**Response:** Collect all the SRC words and the platform system dump, and then contact your next level of support.

**Problem determination:** Perform a platform dump.

**Failing Item:**

- SVCDOCS
  - NEXTLVL
- 

**B700F10A**

**Explanation:** Platform LIC detected an error

**Response:** Look for errors with SRCs of the form B1xx xxxx in the Serviceable Event View. Work those errors first. If that does not correct the problem, collect all the SRC words and the platform system dump, then contact your next level of support.

**Failing Item:**

- SVCDOCS
- 

**B700F10B**

**Explanation:** A resource has been disabled due to hardware problems

**Response:** The platform detected a problem with a processor. The processor is not functional.

Work with the FRU list in the serviceable event view if there is one, otherwise contact your next level of support.

**Failing Item:**

- SVCDOCS
- 

**B700F10C**

**Explanation:** The platform LIC detected an internal problem performing Partition Mobility

**Response:** Collect all the SRC words and the platform system dump, then contact your next level of support.

**Failing Item:**

- NEXTLVL
- 

**B700F120**

**Explanation:** Platform firmware detected an error

**Response:** The platform is unable to support the requested architecture options requested by the operating system via `ibm,client-architecture-support` interface.

---

**B700F121**

**Explanation:** There are insufficient general-purpose processor cores available to activate the partition. Power IFL (Integrated Facility for Linux) processor cores cannot be used to activate this type of partition.

**Response:** Reduce the overall usage of general-purpose processor cores to allow this partition to boot or reduce the desired resources specified for this partition. See Power Integrated Facility for Linux for additional information.

---

**B700F124**

**Explanation:** A performance data collection error has occurred.

**Response:** If this event appears in a serviceable event view, work with the failing item list found there. If this event does not appear in a serviceable event view, no service action is required.

**Failing Item:**

- LICCODE
- 

**B700F130**

**Explanation:** Thermal Power Management Device firmware error was detected.

**Response:** Check for server firmware updates and install them, if available. If that does not resolve the problem, contact your next level of support.

**Problem determination:****Failing Item:**

- LICCODE
- 

**B700F142**

**Explanation:** Hypervisor informational log.

---

**B7881201**

**Explanation:** During Power Hypervisor Initial Program Load (IPL), a problem was detected with the real-time hardware clock setting. The system IPL has been stopped.

**Response:** Power down the system. A control panel function code 8 (fast power off) or ASMI immediate power off may be required to power off the system. With the system powered off, use the ASMI System Configuration -> Time of Day menu to correct the Time of Day for the system and then power on the system. If the system is powered on before the real-time hardware clock setting is corrected, an incorrect time may be provided to the logical partitions. Check the Serviceable Event view for events indicating Real Time Clock failures and perform the actions indicated for those Serviceable Events if any are found.

---

**B7881224**

**Explanation:** During Power Hypervisor Initial Program Load (IPL), a problem was detected with the real-time hardware clock setting. The system IPL has continued and the system time has been set to the epoch time.

**Response:** If logical partitions are powered on, the partition time settings may be incorrect. It is recommended to power down the system and use ASMI to set the correct Time of Day for the system before powering on logical partitions.

---

## (B9xx) Reference codes

A B9xx reference code indicates that an event or error was detected and logged by the IBM i operating system.

---

**B9003000**

**Explanation:** Unexpected exception in QINITT before ICO exists.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message then perform any actions given in the console message associated with this SRC.

the console message associated with this SRC.

---

**B9003007**

**Explanation:** Unexpected exception in INT1 program.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** Perform any actions given in the console message associated with this SRC.

---

**B9003001**

**Explanation:** Error in interface to console from QINITT.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** Perform any actions given in the console message associated with this SRC.

---

**B9003008**

**Explanation:** Operator terminated in response to message.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message then perform any actions given in the console message associated with this SRC.

---

**B9003004**

**Explanation:** Wait time-out on 'console available' event.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message then perform any actions given in the console message associated with this SRC.

---

**B9003010**

**Explanation:** QSYINT2 could not find required user profile.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message then perform any actions given in the console message associated with this SRC.

---

**B9003005**

**Explanation:** Error in interface to console from INT1 program.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** Perform any actions given in

---

**B9003011**

**Explanation:** QSYINT2 could not find system object.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message

then perform any actions given in the console message associated with this SRC.

---

**B9003012**

**Explanation:** Previously unmarked damage detected.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message then perform any actions given in the console message associated with this SRC.

---

**B9003013**

**Explanation:** INT1 program not found in QINSTALL (after load).

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message then perform any actions given in the console message associated with this SRC.

---

**B9003014**

**Explanation:** Could not start CPF process.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** Perform any actions given in the console message associated with this SRC.

---

**B9003015**

**Explanation:** Terminating error message issued.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** Perform any actions given in the console message associated with this SRC.

---

**B9003016**

**Explanation:** Error during link/load of SLIC MRI.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** Perform any actions given in the console message associated with this SRC.

---

**B9003017**

**Explanation:** Attempt to display message but ICO pointer is null.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** Perform any actions given in the console message associated with this SRC.

---

**B900308D**

**Explanation:** Recursive invocation of Install Part 1 PDEH.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message then perform any actions given in the console message associated with this SRC.

---

**B900308F**

**Explanation:** Internal failure in install code.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** Perform any actions given in the console message associated with this SRC.

---

**B9003400**

**Explanation:** XPF IPL or run time failure.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message then perform any actions given in the console message associated with this SRC.

---

**B9003460**

**Explanation:** Unexpected exception in INT1 program.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** Perform any actions given in the console message associated with this SRC.

---

**B9XXXXXX**

**Explanation:** XPF IPL or run time failure.

This SRC is an IBMi software event. If this SRC was reported as a serviceable event or if this SRC appears

on the IBMi LPAR's panel then report the SRC as an IBMi software problem.

**Problem determination:** If there is a console message then perform any actions given in the console message associated with this SRC.

---

## **(BAxx) Reference codes**

The partition firmware detected a failure.

The first eight characters in the display represent the SRC. Any additional characters represent the associated location code. Record the location code as well as the reference code, then find the SRC in the following list.

---

**BA000010**

**Explanation:** The device data structure is corrupted

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH
- 

**BA000020**

**Explanation:** Incompatible firmware levels were found

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH
- 

**BA000030**

**Explanation:** An lpevent communication failure occurred

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH
- 

**BA000031**

**Explanation:** An lpevent communication failure occurred

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH
- 

**BA000032**

**Explanation:** The firmware failed to register the lpevent queues

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH
- 

**BA000034**

**Explanation:** The firmware failed to exchange capacity and allocate lpevents

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH
- 

**BA000038**

**Explanation:** The firmware failed to exchange virtual continuation events

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH
- 

**BA000039**

**Explanation:** Failed to register RPC buffer for DS8000 partitions.

**Problem determination:**

1. Reboot system
  2. Reflash firmware
- 

**BA000040**

**Explanation:** The firmware was unable to obtain the RTAS code lid details

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH
- 

**BA000050**

**Explanation:** The firmware was unable to load the RTAS code lid

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

#### BA000060

**Explanation:** The firmware was unable to obtain the open firmware code lid details

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

#### BA000070

**Explanation:** The firmware was unable to load the open firmware code lid

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

#### BA000080

**Explanation:** The user did not accept the license agreement

**Problem determination:** There is no further action required. If the user did not accept the license agreement, the system will not function.

#### BA000081

**Explanation:** Failed to get the firmware license policy

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

#### BA000082

**Explanation:** Failed to set the firmware license policy

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

#### BA000091

**Explanation:** Unable to load a firmware code update lid

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

#### BA000100

**Explanation:** The partition firmware was not actually updated and a reboot is required to recover. This SRC does call home.

**Problem determination:** Reboot the system or partition.

#### BA000101

**Explanation:** The partition firmware activation failed due to a failing hypervisor service. During a partition migration or concurrent firmware update, the partition firmware component of the update failed leaving the previous level in effect.

**Problem determination:** Reboot the affected partition(s) to activate the latest installed partition firmware level.

#### BA000110

**Explanation:** The registration of a partition firmware platform dump failed. If a partition resource dump is initiated, it may have incomplete or no data.

**Problem determination:**

- Reboot the system or partition.
- Look for server firmware updates; apply if available.

#### BA00E830

**Explanation:** Failure when initializing ibm,event-scan

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

#### BA00E840

**Explanation:** Failure when initializing PCI hot plug

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

---

**BA00E843**

**Explanation:** Failure when initializing interface to AIX or Linux

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

---

**BA00E850**

**Explanation:** Failure when initializing dynamic reconfiguration

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

---

**BA00E860**

**Explanation:** Failure when initializing sensors

**Problem determination:** Reboot the system or partition.

**Failing Item:**

- FWFLASH

---

**BA00F104**

**Explanation:** Partition Firmware requested termination of a partition.

**Problem determination:**

1. Review error logs for entries posted at approximately the same time as this reference code and take appropriate actions for those error logs.
2. Check for system firmware updates. Apply update if available.
3. Contact your next level of support for assistance.

---

**BA010000**

**Explanation:** There is insufficient information to boot the partition

**Failing Item:**

- FWIPIPL

---

**BA010001**

**Explanation:** The client IP address is already in use by another network device

**Failing Item:**

- FWIPIPL

---

**BA010002**

**Explanation:** One or more of the keywords that was specified is not supported by this device.

**Problem determination:** Refer to partition firmware progress codes using code CA00E174.

**Failing Item:**

- FWHOST

---

**BA010003**

**Explanation:** The specified (or default) discovery protocols failed to return the parameters that are required to boot.

**Problem determination:** Refer to partition firmware progress codes using code CA00E174.

**Failing Item:**

- FWHOST

---

**BA010004**

**Explanation:** The IP address specified for the discovery server was not a valid IPv6 address.

**Problem determination:** Refer to partition firmware progress codes using code CA00E174.

---

**BA010005**

**Explanation:** The IP address specified for the discovery server was not a valid IPv4 address.

**Problem determination:** Refer to partition firmware progress codes using code CA00E174.

---

**BA010006**

**Explanation:** A keyword was specified that is not supported by the iSCSI booting extensions.

**Failing Item:**

- FWADIPL

---

**BA010007**

**Explanation:** The device does not have the required device\_type property.

**Response:** Contact service support.

---

**BA010008**

**Explanation:** The device\_type property for this device is not supported by the iSCSI booting extensions.

**Response:** Contact service support.

---

**BA010009**

**Explanation:** The arguments specified for the ping function are invalid.

**Response:** Verify that all arguments comply with the iSCSI initiator configuration specification.

---

**BA01000A**

**Explanation:** The itname parameter string exceeds the maximum length allowed.

**Response:** Verify that all arguments comply with the iSCSI initiator configuration specification.

---

**BA01000B**

**Explanation:** The ichapid parameter string exceeds the maximum length allowed.

**Response:** Verify that all arguments comply with the iSCSI initiator configuration specification.

---

**BA01000C**

**Explanation:** The ichappw parameter string exceeds the maximum length allowed.

**Response:** Verify that all arguments comply with the iSCSI initiator configuration specification.

---

**BA01000D**

**Explanation:** The iname parameter string exceeds the maximum length allowed.

**Response:** Verify that all arguments comply with the iSCSI initiator configuration specification.

---

**BA01000E**

**Explanation:** The LUN specified is not valid.

**Response:** Verify that all arguments comply with the iSCSI initiator configuration specification.

---

**BA01000F**

**Explanation:** The chapid parameter string exceeds the maximum length allowed.

**Response:** Verify that all arguments comply with the iSCSI initiator configuration specification.

---

**BA010010**

**Explanation:** Partition firmware error during SMS menus

**Failing Item:**

- FWFLASH
- 

**BA010011**

**Explanation:** SET-ROOT-PROP could not find the / (root) package

**Response:** Look for server firmware updates; apply if available.

---

**BA010012**

**Explanation:** The arguments specified for IP v6 are invalid.

**Response:** Verify that all arguments comply with the iSCSI initiator configuration specification, and that the server addresses are correct.

---

**BA010013**

**Explanation:** The information in the error log entry for this SRC provides network trace data.

**Problem determination:** Informational message: no action is required.

---

**BA010014**

**Explanation:** The information in the error log entry for this SRC provides network trace data.

**Problem determination:** Informational message: no action is required.

---

**BA010015**

**Explanation:** The information in the error log entry for this SRC provides network trace data.

**Problem determination:** Check for system firmware update. Contact your next level support for assistance.

---

**BA010020**

**Explanation:** A trace entry addition failed because of bad trace type.

**Problem determination:** Upgrade to latest firmware.

---

**BA010021**

**Explanation:** The value of the vlan tag parameter is not valid.

**Problem determination:** Verify that the tag complies with the IEEE 802.1Q specification.

---

**BA012010**

**Explanation:** Opening the TCP node failed.

**Response:** Look for server firmware updates; apply if available.

---

---

**BA012011**

**Explanation:** TCP failed to read from the network

**Response:** Look for server firmware updates; apply if available

---

**BA012012**

**Explanation:** TCP failed to write to the network.

**Response:** Look for server firmware updates; apply if available.

---

**BA012013**

**Explanation:** Closing TCP failed.

**Response:** Look for server firmware updates; apply if available.

---

**BA012014**

**Explanation:** The TCP re-transmission count of 8 was exceeded. This indicates a large number of lost packets between this client and the boot or installation server.

**Response:**

1. Look for problems or errors on the boot or installation servers. If any are found, correct them.
  2. Look for problems or errors on the network switches between the boot or installation server and this client. If any problems are found, correct them.
  3. Try another network adapter on the client.
- 

**BA017020**

**Explanation:** Failed to open the TFTP package

**Response:** Verify that the TFTP parameters are correct.

---

**BA017021**

**Explanation:** Failed to load the TFTP file

**Response:** Verify the the TFTP server and network connections are correct.

---

**BA01B010**

**Explanation:** Opening the BOOTP node failed.

**Response:** Look for server firmware updates; apply if available.

---

**BA01B011**

**Explanation:** BOOTP failed to read from the network

**Response:** Refer to the actions for checkpoint CA00E174.

---

---

**BA01B012**

**Explanation:** BOOTP failed to write to the network

**Response:** Refer to the actions for checkpoint CA00E174.

---

**BA01B013**

**Explanation:** The discover mode is invalid

**Response:** Look for server firmware updates; apply if available.

---

**BA01B014**

**Explanation:** Closing the BOOTP node failed

**Response:** Look for server firmware updates; apply if available.

---

**BA01B015**

**Explanation:** The BOOTP discover server timed out

**Response:** Refer to the actions for checkpoint CA00E174.

---

**BA01D001**

**Explanation:** Opening the DHCP node failed

**Response:** Look for server firmware updates; apply if available.

---

**BA01D020**

**Explanation:** DHCP failed to read from the network

**Response:**

1. Verify that the network cable is connected, and that the network is active.
  2. Look for server firmware updates; apply if available.
- 

**BA01D030**

**Explanation:** DHCP failed to write to the network

**Response:**

1. Verify that the network cable is connected, and that the network is active.
  2. Look for server firmware updates; apply if available.
- 

**BA01D040**

**Explanation:** The DHCP discover server timed out

**Response:**

1. Ensure that the DHCP server has addresses available.

2. Insure that the DHCP server's configuration file is not overly constrained such that it was not able to meet the configuration requested by the client.
3. Refer to the actions for checkpoint CA00E174.

---

**BA01D050**

**Explanation:** DHCP::discover no good offer

**Response:** DHCP discover did not receive any DHCP offers from the server(s) that meet the client's requirements. Insure that the DHCP server's configuration file is not overly constrained such that it was not able to meet the configuration requested by the client.

---

**BA01D051**

**Explanation:** DHCP::discover DHCP request timed out

**Response:**

1. DHCP discover did receive a DHCP offer from the server(s) that meet the client's requirements, but the server did not send DHCP ack (the acknowledgement) to the client's DHCP request. It is possible that another client was using the address that was served.
2. Insure that the DHCP server has addresses available.

---

**BA01D052**

**Explanation:** DHCP::discover: 10 incapable servers were found

**Response:** Ten DHCP servers have sent DHCP offers, none of which met the requirements on the client. Check the configuration that the client is requesting, and the server's DHCP configuration files, for compatibility.

---

**BA01D053**

**Explanation:** DHCP::discover received a reply, but without a message type

**Response:** Insure that the DHCP server is properly configured.

---

**BA01D054**

**Explanation:** DHCP::discover received a reply, but without a message type

**Response:**

1. DHCP discover did receive a DHCP offer from the server(s) to meet the client's requirements, but the server did send DHCP (not acknowledged) to the client's DHCP request. (It is possible that another client was using the address that was served.) This usually occurs when there are multiple DHCP servers on the same network, and server A does not

know the subnet configuration of server B, and vice-versa. This can also occur when the pool of addresses is not truly divided. The DHCP server's configuration file should also be set to "authoritative".

2. Insure that the DHCP server is functioning properly.

---

**BA01D055**

**Explanation:** DHCP::discover: DHCP decline

**Response:**

1. DHCP discover did receive a DHCP offer from the server(s) to meet the client's requirements, but the client performed an ARP test on the address and found that another client was using the address. DHCP decline was sent to the server, but no additional DHCP offers were received by the client. The client still does not have a valid address.
2. Insure that the DHCP server is functioning properly.

---

**BA01D056**

**Explanation:** DHCP::discover: unknown DHCP message

**Response:** DHCP discover received an unknown DHCP message type. Insure that the DHCP server is functioning properly.

---

**BA01D0FF**

**Explanation:** Closing the DHCP node failed.

**Response:** Look for server firmware updates; apply if available.

---

**BA04000F**

**Explanation:** Selftest failed on device, no error and/or location code information available

**Problem determination:** If there was a location code reported with the error, replace the device specified by the location code.

**Failing Item:**

- NEXTLVL

---

**BA040010**

**Explanation:** Self test failed on device; cannot locate package.

**Failing Item:**

- NEXTLVL

---

**BA040020**

**Explanation:** The machine type and model are not recognized by the server firmware.

**Failing Item:**

- FWFLASH
- 

**BA040030**

**Explanation:** The firmware was not able to build the UID properly for this system. As a result, problems may occur with the licensing of the AIX operating system.

**Problem determination:**

1. Using the Advanced System Management Interface (ASMI) menus, insure that the machine type, model, and serial number in the VPD for this system are correct.
  2. If this is a new system, check for server firmware updates and apply them, if available.
- 

**BA040035**

**Explanation:** The firmware was unable to find the "plant of manufacture" in the VPD. This may cause problems with the licensing of the AIX operating system.

**Problem determination:**

1. Using the Advanced System Management Interface (ASMI) menus, insure that the machine type, model, and serial number in the VPD for this system are correct.
  2. If this is a new system, check for server firmware updates and apply them, if available.
- 

**BA040040**

**Explanation:** Setting the machine type, model, and serial number failed.

**Failing Item:**

- FWFWPBL
- 

**BA040041**

**Explanation:** Retrieving the machine type, model, and serial number failed.

**Response:** Look for server firmware updates; apply if available.

---

**BA040050**

**Explanation:** The h-call to switch off the boot watchdog timer failed.

**Failing Item:**

- FWFWPBL
- 

---

**BA040060**

**Explanation:** Setting the firmware boot side for the next boot failed.

**Failing Item:**

- FWFWPBL
- 

**BA050001**

**Explanation:** Rebooting a partition in logical partition mode failed.

**Failing Item:**

- FWFWPBL
- 

**BA050004**

**Explanation:** Locating a service processor device tree node failed.

**Failing Item:**

- FWFWPBL
- 

**BA05000A**

**Explanation:** Failed to send boot failed message to the service processor

**Failing Item:**

- FWFWPBL
- 

**BA060020**

**Explanation:** The environment variable "boot-device" exceeded the allowed character limit.

**Failing Item:**

- FWNIM
- 

**BA060021**

**Explanation:** The environment variable "boot-device" contained more than 5 entries.

**Failing Item:**

- FWNIM
- 

**BA060022**

**Explanation:** The environment variable "boot-device" contained an entry that exceeded 255 characters.

**Failing Item:**

- FWNIM
- 

**BA060023**

**Explanation:** The operating system does not support the minimum processing unit that was specified.

**Failing Item:**

- FWNIM

---

**BA060030**

**Explanation:** Logical partitioning with shared processors is enabled and the operating system does not support it.

**Problem determination:**

1. Install or boot a level of the operating system that supports shared processors.
2. Disable logical partitioning with shared processors in the operating system.

---

**BA060032**

**Explanation:** The operating system does not support active memory sharing (AMS).

**Problem determination:** Install or boot a version of the operation system that supports AMS.

---

**BA060033**

**Explanation:** The operating system does not support active memory expansion (AME).

**Problem determination:** Install or boot a version of the operation system that supports AME.

---

**BA060040**

**Explanation:** The system or partition is configured to use huge pages, but the operating system image does not support huge pages.

**Problem determination:** Do one of the following:

- Install a newer version of the operating system that supports huge pages.
- Use the ASMI to remove the huge pages.

---

**BA060050**

**Explanation:** The hypervisor supports dynamic partitioning of the huge page-type of memory allocation, but dynamic partitioning of huge pages is not supported.

**Problem determination:** Use the ASMI to disable dynamic partitioning of huge pages.

---

**BA060060**

**Explanation:** The operating system expects an IOSP partition, but the operating system failed to make the transition to alpha mode.

**Problem determination:**

1. Insure that the alpha-mode operating system image is intended for this partition.
2. Insure that the configuration of the partition supports an alpha-mode operating system.

---

**BA060061**

**Explanation:** The operating system expects a non-IOSP partition, but the operating system failed to make the transition to MGC mode.

**Problem determination:**

1. Insure that the nonalpha-mode operating system image is intended for this partition.
2. Insure that the configuration of the partition supports a non-alpha-mode operating system.

---

**BA060070**

**Explanation:** The operating system does not support system's processor(s).

**Problem determination:** Boot a newer version of the operating system that supports the system's processors.

---

**BA060071**

**Explanation:** Invalid number of vectors from the operating system.

**Problem determination:** Boot a newer version of the operating system.

---

**BA060072**

**Explanation:** Client-arch-support hcall error.

**Failing Item:**

- FWFLASH

---

**BA060075**

**Explanation:** Client-arch-support firmware error.

**Failing Item:**

- FWFLASH

---

**BA060100**

**Explanation:** Attempt to allocate memory failed. Error log entry includes additional information.

**Problem determination:**

1. Reboot system/partition.
2. Check for and apply any system firmware update.
3. Contact your next level of support for assistance.

---

**BA060200**

**Explanation:** Failed to set the operating system's boot list from the MM bootlist

**Problem determination:**

1. Verify that the bootlist in the MM is correct.
2. Check for firmware updates (MM, H8, system firmware), and apply if available.

---

**BA060201**

**Explanation:** Failed to read VPD "boot path" field value

**Problem determination:** Check for firmware updates (MM, H8, system firmware), and apply if available.

---

**BA060202**

**Explanation:** Failed to update VPD with new "boot path" field value

**Problem determination:** Check for firmware updates (MM, H8, system firmware), and apply if available.

---

**BA060300**

**Explanation:** An I/O error on the adapter from which the boot was attempted prevented the operating system from being booted.

---

**BA060411**

**Explanation:** Unable to resolved the MAC address that was specified; the boot list has not been changed.

---

**BA070001**

**Explanation:** SCSI controller error

**Response:**

1. Verify the SCSI cabling and termination.
  2. Retry with minimal bus configuration to isolate the failing device.
  3. Replace the controller and/or device.
- 

**BA070002**

**Explanation:** SAS Controller - Memory Allocation/MapIn failure.

**Response:**

1. Reboot partition.
  2. Reflash system firmware.
- 

**BA070003**

**Explanation:** SAS Controller - Generic trace buffer log.

**Response:**

1. None.
- 

**BA070004**

**Explanation:** SAS Disk - Generic trace buffer log.

**Response:**

1. None.
- 

---

**BA090001**

**Explanation:** SCSI disk unit: test unit ready failed; hardware error

**Failing Item:**

- FWSCSI1
- 

**BA090002**

**Explanation:** SCSI disk unit: test unit ready failed; sense data available

**Failing Item:**

- FWSCSI2
- 

**BA090003**

**Explanation:** SCSI disk unit: send diagnostic failed; sense data available

**Failing Item:**

- FWSCSI3
- 

**BA090004**

**Explanation:** SCSI disk unit: send diagnostic failed: devofl command

**Failing Item:**

- FWSCSI3
- 

**BA090005**

**Explanation:** The virtual fibre channel boot driver had an unexplained time out when trying to access the boot media.

**Problem determination:**

- Look for fibre channel errors in the virtual operating system (VIOS) error log; resolve all that are found.
  - Insure that the VIOS has the latest fibre channel n\_port ID virtualization (NPIV) driver updates.
  - Verify that the fibre channel storage server is working correctly. Correct any problems that are found.
- 

**BA090006**

**Explanation:** Unable to access the boot media due to "busy" response from the fibre channel storage server.

**Problem determination:**

- Look for error log entries in the virtual operating system (VIOS) that point to the fibre channel storage server. Correct any problems that are found.
  - Reduce the load on the fibre channel server.
-

---

**BA090007**

**Explanation:** An attempt to read the boot disk failed because of a reserve condition.

**Problem determination:**

- Identify and remove any active RESERVES on the fibre channel storage server.
- 

**BA090008**

**Explanation:** An attempt to send a command to the fibre channel boot disk failed at the NPIV layer.

**Problem determination:**

- Look for fibre channel errors in the virtual operating system (VIOS) error log; resolve all that are found.
  - Verify that the fibre channel storage server is working correctly. Correct any problems that are found.
- 

**BA090009**

**Explanation:** An event happened on the virtual fibre channel adapter that forced a full disconnection from the fibre channel fabric.

**Problem determination:**

- Insure that a firmware update was not occurring on the fibre channel host bus adapter.
  - Insure that the cabling between the fibre channel host bus adapter and the fibre channel storage server is correct.
  - Insure that the virtual operating system (VIOS) has the latest fibre channel n\_port ID virtualization (NPIV) device driver updates.
- 

**BA09000A**

**Explanation:** Vendor specification error

**Failing Item:**

- NEXTLVL
- 

**BA09000B**

**Explanation:** Generic SCSI sense error.

**Problem determination:** Generic SCSI sense error can be:

- X4 - Hardware Error
  - X5 - Illegal Request
  - X7 - Data Protect
  - X8 - Blank Check
  - X9 - Vendor Specific
  - XA - Copy Aborted
  - XB - Aborted Command
  - XC - Equal
  - XD - Volume Overflow
- 

- XE - Mismatch
  - XF - RESERVED
- 

**BA09000C**

**Explanation:** The media are write-protected

**Problem determination:** Check the media and retry the operation.

---

**BA09000D**

**Explanation:** The media are unsupported or are unrecognizable.

**Problem determination:** Check the media and retry the operation.

---

**BA09000E**

**Explanation:** The media are not formatted correctly.

**Problem determination:** Replace the media and retry the operation.

---

**BA09000F**

**Explanation:** The media are not present

**Problem determination:** Insert or replace the media and retry the operation.

---

**BA090010**

**Explanation:** Request sense command failed

**Failing Item:**

- FWSCSI1
- 

**BA090011**

**Explanation:** The number of times the retry command has to be executed has exceeded the limit.

**Failing Item:**

- FWSCSI1
- 

**BA090012**

**Explanation:** The SCSI device type is not supported

**Problem determination:** Replace the SCSI device with a supported device.

---

**BA09XXXX**

**Explanation:** Generic SCSI error troubleshooting.

---

---

**BA100001**

**Explanation:** SCSI tape: test unit ready failed; hardware error.

**Failing Item:**

- FWSCSI1

---

**BA100002**

**Explanation:** SCSI tape: test unit ready failed; sense data available.

**Failing Item:**

- FWSCSI4

---

**BA100003**

**Explanation:** SCSI tape: send diagnostic failed; sense data available.

**Failing Item:**

- FWSCSI3

---

**BA100004**

**Explanation:** SCSI tape: send diagnostic failed: devofl command.

**Failing Item:**

- FWSCSI3

---

**BA110001**

**Explanation:** SCSI changer: test unit ready failed; hardware error

**Problem determination:** Before replacing any system components refer to the notes in error code BA09xxxx.

1. Replace the SCSI device.
2. Replace the SCSI cable.
3. Replace the SCSI controller.

**Failing Item:**

- FWSCSI1

---

**BA110002**

**Explanation:** SCSI changer: test unit ready failed; sense data available.

**Failing Item:**

- FWSCSI4

---

**BA110003**

**Explanation:** SCSI changer: send diagnostic failed; sense data available.

**Failing Item:**

- FWSCSI3

---

**BA110004**

**Explanation:** SCSI changer: send diagnostic failed: devofl command.

**Failing Item:**

- FWSCSI3

---

**BA120001**

**Explanation:** On an undetermined SCSI device, test unit ready failed; hardware error.

**Failing Item:**

- FWSCSI5

---

**BA120002**

**Explanation:** On an undetermined SCSI device, test unit ready failed; sense data available

**Failing Item:**

- FWSCSI4

---

**BA120003**

**Explanation:** On an undetermined SCSI device, send diagnostic failed; sense data available

**Failing Item:**

- FWSCSI4

---

**BA120004**

**Explanation:** On an undetermined SCSI device, send diagnostic failed; devofl command

**Failing Item:**

- FWSCSI4

---

**BA120010**

**Explanation:** An I/O error on the adapter from which the boot was attempted prevented the operating system from being booted.

**Failing Item:**

- FWFLASH

---

**BA130001**

**Explanation:** SCSI CD-ROM: test unit ready failed; hardware error.

**Failing Item:**

- FWSCSI1

---

**BA130002**

**Explanation:** SCSI CD-ROM: test unit ready failed; sense data available

**Failing Item:**

- FWSCSI3
- 

**BA130003**

**Explanation:** SCSI CD-ROM: send diagnostic failed; sense data available.

**Failing Item:**

- FWSCSI3
- 

**BA130004**

**Explanation:** SCSI CD-ROM: send diagnostic failed: devofl command.

**Failing Item:**

- FWSCSI3
- 

**BA130010**

**Explanation:** USB CD-ROM: device remained busy longer than the time-out period.

**Problem determination:** Retry the operation.

**Failing Item:**

- FWFWPBL
- 

**BA130011**

**Explanation:** USB CD-ROM: execution of ATA/ATAPI command was not completed within the allowed time.

**Problem determination:** Retry the operation.

**Failing Item:**

- FWCD1
- 

**BA130012**

**Explanation:** USB CD-ROM: execution of ATA/ATAPI command failed.

**Problem determination:**

1. Verify that the power and signal cables going to the USB CD-ROM are properly connected and are not damaged. If any problems are found, correct them, then retry the operation.
2. If the problem persists, the CD in the USB CD-ROM drive might not be readable. Remove the CD and insert another CD.

**Failing Item:**

- NEXTLVL
- 

---

**BA130015**

**Explanation:** USB CD-ROM: ATA/ATAPI packet command execution failed.

**Problem determination:** The CD in the USB CD-ROM may not be readable. Try another CD.

**Failing Item:**

- FWCD2
- 

**BA140001**

**Explanation:** SCSI read/write optical: test unit ready failed; hardware error.

**Failing Item:**

- FWSCSI1
- 

**BA140002**

**Explanation:** SCSI read/write optical: test unit ready failed; sense data available.

**Failing Item:**

- FWSCSI1
- 

**BA140003**

**Explanation:** SCSI read/write optical: send diagnostic failed; sense data available

**Failing Item:**

- FWSCSI3
- 

**BA140004**

**Explanation:** SCSI read/write optical: send diagnostic failed; devofl command.

**Failing Item:**

- FWSCSI3
- 

**BA155001**

**Explanation:** Insufficient partition firmware resources for CX3 adapter.

**Problem determination:**

1. Ensure the system logical memory block size is 256 megabytes (MB) or greater, and change as necessary.
  2. Contact next level of support.
- 

**BA155101**

**Explanation:** Insufficient partition firmware resources for CX4 adapter.

**Problem determination:**

1. Ensure the system logical memory block size is 256 megabytes (MB) or greater, and change as necessary.
  2. Contact next level of support.
-

---

**BA155102**

**Explanation:** CX4 Adapter Initialization Failure.

**Problem determination:**

1. Check the trace for details on which init step failed.
2. Contact next level of support.

---

**BA157001**

**Explanation:** A register property was not found.

**Problem determination:**

1. Check for system firmware updates; apply if available.
2. Check for adapter firmware updates; apply if available.
3. Replace the adapter.

---

**BA157002**

**Explanation:** Device initialization failed.

**Problem determination:**

1. Check for system firmware and device firmware updates; apply if available.
2. Retry the last SMS operation that was attempted, such as pinging from the SMS menus, or network boot or installation.
3. Replace the adapter.

---

**BA157003**

**Explanation:** Registry property map-in failed.

**Problem determination:**

1. Check for system firmware and device firmware updates; apply if available.
2. Replace the adapter.

---

**BA158001**

**Explanation:** VPD (vital product data) capability not found.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA158002**

**Explanation:** A problem was found in the adapter's VPD (vital product data).

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.

2. Replace the adapter specified by the location code reported with the SRC.

---

**BA158003**

**Explanation:** VPD (vital product data) keyword error. Additional error log data should show whether the keyword was missing or invalid.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA158004**

**Explanation:** Failed to allocate the VPD (vital product data) buffer.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA15A001**

**Explanation:** A registry property was not found.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA15A002**

**Explanation:** The assigned-address property was not found.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA15A003**

**Explanation:** Memory map-in failed for the control register set memory region.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA15A004**

**Explanation:** Failed to acquire the semaphore for the flash register.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA15A005**

**Explanation:** The flash register was not ready when initially checked prior to reading the MAC address.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA15A006**

**Explanation:** The flash register was not ready following the reading of the MAC transition.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA15A007**

**Explanation:** A parity error occurred when reading the MAC address from the flash memory.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA15A008**

**Explanation:** Initialization of the adapter chip set failed.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.

---

**BA15A009**

**Explanation:** Failed to open the OBP-TFTP package.

**Problem determination:**

1. Verify that the boot parameters in the SMS menus are correct.
2. Check for adapter microcode or firmware updates; apply if available.
3. Replace the adapter specified by the location code reported with the SRC.

---

**BA15B001**

**Explanation:** Mailbox command failure. The error log has additional information regarding the failure.

**Problem determination:**

1. Retry the last firmware operation that was attempted, such as an SMS ping, or network boot or installation attempt.
2. Check for adapter microcode or firmware updates; apply if available.
3. Replace the adapter specified by the location code reported with the SRC.

---

**BA15B002**

**Explanation:** Error reading the PCI configuration register.

**Problem determination:**

1. Follow the repair actions for a freeze error that has been reported on the adapter identified by the location code.
2. Check for adapter microcode or firmware updates; apply if available.
3. Replace the adapter specified by the location code reported with the SRC.

---

**BA15B003**

**Explanation:** Initialization error.

**Problem determination:**

1. Retry the last firmware operation that was attempted, such as an SMS ping, or network boot or installation attempt.
2. Check for adapter microcode or firmware updates; apply if available.
3. Replace the adapter specified by the location code reported with the SRC.

---

**BA15B004**

**Explanation:** Adapter VPD error. The error log entry includes additional details.

**Problem determination:**

## BA15B005 • BA15D002

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code reported with the SRC.
3. Contact your next level of support.

---

### BA15B005

**Explanation:** DMA allocation or mapping operation failed. The error log has additional information regarding the failure.

**Problem determination:**

1. Retry the last firmware operation that was attempted, such as an SMS ping, or network boot or installation attempt.
2. Check for adapter microcode or firmware updates; apply if available.
3. Replace the adapter specified by the location code reported with the SRC.

---

### BA15B006

**Explanation:** Unexpected command response. The error log has additional information regarding the failure.

**Problem determination:**

1. Retry the last firmware operation that was attempted, such as an SMS ping, or network boot or installation attempt.
2. Check for adapter microcode or firmware updates; apply if available.
3. Replace the adapter specified by the location code reported with the SRC.

---

### BA15B007

**Explanation:** A transmit operation timed out. The error log has additional information regarding the failure.

**Problem determination:**

1. Retry the last firmware operation that was attempted, such as an SMS ping, or network boot or installation attempt.
2. Check for adapter microcode or firmware updates; apply if available.
3. Replace the adapter specified by the location code reported with the SRC.

---

### BA15C001

**Explanation:** Adapter code detected a problem while accessing system firmware or retrieving information from an adapter.

**Problem determination:**

1. Determine the adapter firmware level.

2. Is the adapter firmware level 0310204100102 or 0310303970033? Yes: The adapter code was not able access system firmware. Continue with the next step. No: Continue with step 6.
3. Verify the network configuration and boot parameters. If there are no errors, continue with the next step. Otherwise, this ends the procedure.
4. Check for and apply any I/O adapter firmware updates. If applying firmware updates resolves the problem, this ends the procedure. Otherwise, continue with the next step.
5. Replace the adapter. This ends the procedure.
6. The adapter is installed with adapter firmware level 0400003260003 or later. The command to retrieve the MAC address from the adapter failed. Continue with the next step.
7. Check for and apply any adapter I/O adapter firmware updates.
8. Does the problem still exist? Yes: Replace adapter. No: This ends the procedure.

---

### BA15C002

**Explanation:** The command to retrieve the MAC address from the adapter failed.

**Problem determination:**

1. Check for and apply any adapter microcode or firmware driver updates.
2. Replace the adapter.

---

### BA15D001

**Explanation:** The adapter failed during activation.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Retry the last firmware operation that was attempted, such as pinging from the SMS menus, or network boot or installation.
3. Verify the adapter cables are connected correctly.
4. Verify the adapter is seated properly.
5. Replace the adapter specified by the location code reported with the SRC.

---

### BA15D002

**Explanation:** Gigabit Ethernet failure.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code (if present) reported with the SRC.

---

**BA15D003**

**Explanation:** DMA allocation or mapping operation failure.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code (if present) reported with the SRC.

---

**BA15D004**

**Explanation:** Bootcode completion failure.

**Problem determination:**

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code (if present) reported with the SRC.

---

**BA15D007**

**Explanation:** Transmit time out.

**Problem determination:**

1. Check for system firmware and device firmware updates; apply if available.
2. Retry the last firmware operation that was attempted, such as pinging from the SMS menus, or network boot or installation.
3. Replace the adapter.

---

**BA15D101**

**Explanation:** Mailbox command failure. Error log has additional information regarding failure.

**Problem determination:**

1. Retry the last firmware operation attempted such as an SMS Ping or network boot/install attempt.
2. Update adapter firmware.
3. Contact next level of support.

---

**BA15D102**

**Explanation:** Error reading PCI configuration register.

**Problem determination:**

1. Follow repair actions for any freeze error that may be reported against the adapter identified by the location code.
2. Update adapter firmware.
3. Replace adapter.

---

**BA15D103**

**Explanation:** An initialization error occurred.

**Problem determination:**

1. Retry the last firmware operation attempted such as an SMS Ping or network boot/install attempt.
2. Update adapter firmware.
3. Contact next level of support.

---

**BA15D104**

**Explanation:** Adapter VPD error. The Error log entry includes further error details.

**Problem determination:**

1. Update adapter firmware.
2. Contact next level of support.

---

**BA15D105**

**Explanation:** DMA allocation or mapping operation failed. Error log has additional information regarding failure.

**Problem determination:**

1. Retry the last firmware operation attempted such as an SMS Ping or network boot/install attempt.
2. Update adapter firmware.
3. Contact next level of support.

---

**BA15D106**

**Explanation:** Unexpected command response. Error log has additional information regarding failure.

**Problem determination:**

1. Retry the last firmware operation attempted such as an SMS Ping or network boot/install attempt.
2. Update adapter firmware.
3. Contact next level of support.

---

**BA15D107**

**Explanation:** Transmit time out. Error log has additional information regarding failure.

**Problem determination:**

1. Retry the last firmware operation attempted such as an SMS Ping or network boot/install attempt.
2. Update adapter firmware.
3. Contact next level of support.

---

**BA15E001**

**Explanation:** The command to retrieve the MAC address from the adapter failed.

**Problem determination:**

## BA15E002 • BA160130

1. Check for adapter microcode or firmware updates; apply if available.
2. Replace the adapter specified by the location code (if present) reported with the SRC.

---

### BA15E002

**Explanation:** The VLAN ID provided to the driver is not configured.

**Problem determination:**

1. Verify the configuration and insure that the VLAN ID configured in the SMS menus is valid for the network to which the port is connected.
2. Check for adapter microcode or firmware updates; apply if available.
3. Replace the adapter specified by the location code (if present) reported with the SRC.

---

### BA15E003

**Explanation:** The MAC address obtained from the hardware at IPL time does not match the value currently returned by the hardware.

**Problem determination:**

1. If the MAC address change was done by the user, please change the MAC address before the partition is started to avoid this error.
2. If this error continues to be logged, update the adapter firmware to the latest level.
3. Replace the adapter specified by the location code (if present) reported with the SRC.

---

### BA15F001

**Explanation:** Failed to acquire the EEPROM.

**Problem determination:**

1. Verify that the card is installed properly.
2. Move the adapter to another slot.
3. Replace the adapter specified by the location code (if present) reported with the SRC.

---

### BA15F101

**Explanation:** Failed to acquire the EEPROM.

**Problem determination:**

1. Verify that the card is installed properly.
2. Move the adapter to another slot.
3. Replace the adapter specified by the location code (if present) reported with the SRC.

---

### BA160001

**Explanation:** Problem changing adapter MSI allocation. Error log has additional information regarding failure.

**Problem determination:**

1. Restart the partition.
2. Update system firmware.
3. Contact next level of support.

---

### BA160002

**Explanation:** Problem initializing adapter. Error log has additional information regarding failure.

**Problem determination:**

1. Restart the partition.
2. Update system firmware.
3. Contact next level of support.

---

### BA160007

**Explanation:** Failure to allocate buffer space.

**Problem determination:**

1. Reboot the machine.
2. Update system firmware.
3. Contact next level of support.

---

### BA160110

**Explanation:** Invalid USB configuration descriptor. Device not enumerated.

**Problem determination:**

1. Reboot partition.
2. Replace USB device.
3. Check for system firmware update.

---

### BA160120

**Explanation:** Invalid USB interface structure. Device not enumerated.

**Problem determination:**

1. Reboot partition.
2. Replace USB device.
3. Check for system firmware update.

---

### BA160130

**Explanation:** USB keyboard not responsive.

**Problem determination:**

1. Reboot partition.
2. Check for system firmware update.
3. Replace USB device.

---

**BA160200**

**Explanation:** NVMe Controller - Memory Allocation/MapIn failure.

**Problem determination:**

- Reboot partition.
  - Reflash system firmware.
- 

**BA160201**

**Explanation:** NVMe Controller - Open failure.

**Problem determination:**

- Update to the latest adapter firmware.
  - Replace adapter.
- 

**BA160202**

**Explanation:** NVMe Controller - Controller Level Reset failure.

**Problem determination:**

- Update to the latest adapter firmware.
  - Replace adapter.
- 

**BA160203**

**Explanation:** NVMe Controller - Shutdown did not complete.

**Problem determination:**

- Update to the latest adapter firmware.
  - Reboot the partition.
- 

**BA160204**

**Explanation:** NVMe Controller - Asynchronous Event Notification.

**Problem determination:**

- Take appropriate action based on the event type.
  - Update to the latest adapter firmware.
- 

**BA160205**

**Explanation:** NVMe Controller - Command Failure.

**Problem determination:**

- Update to the latest adapter firmware.
- 

**BA160206**

**Explanation:** NVMe Controller - Namespace OPEN failure.

**Problem determination:**

- Verify the file system format is supported.
  - Verify that the namespace contains a valid boot image.
- 

- Update to the latest adapter firmware.
- 

**BA170100**

**Explanation:** NVRAM data validation check failed

**Problem determination:** Reboot the system or partition; this failure should correct itself.

**Failing Item:**

- FWNVR2
- 

**BA170201**

**Explanation:** The firmware was unable to expand the target partition -saving configuration variable

**Failing Item:**

- FWNVR1
- 

**BA170202**

**Explanation:** The firmware was unable to expand the target partition - writing error log entry

**Failing Item:**

- FWNVR1
- 

**BA170203**

**Explanation:** The firmware was unable to expand the target partition - writing VPD data

**Failing Item:**

- FWNVR1
- 

**BA170220**

**Explanation:** The firmware was unable to write a variable value into NVRAM because not enough space exists in NVRAM.

**Problem determination:** Do the following:

- Reduce the number of partitions, if possible, so that each of the remaining partitions has more NVRAM allocated to it.

**Failing Item:**

- NEXTLVL
- 

**BA170221**

**Explanation:** The setenv/\$setenv function had to delete network boot information to free space in NVRAM.

**Problem determination:** You might need to use the SMS menus to reenter the parameters for network installation or boot.

---

**BA170998**

**Explanation:** NVRAMRC script evaluation error - command line execution error.

**Failing Item:**

- FWNVR3
- 

**BA170999**

**Explanation:** NVRAMRC script evaluation error - stack unbalanced on completion.

**Problem determination:** This is a firmware debug environment error. There is no user action or FRU replacement for this error.

**Failing Item:**

- NEXTLVL
- 

**BA180007**

**Explanation:** Unable to allocate all adapter memory space requirements.

**Response:**

1. Move adapter to another slot.
  2. Check for available adapter firmware updates. Apply update if available.
  3. Check for available system firmware updates. Apply update if available.
  4. Contact the next level of support.
- 

**BA180008**

**Explanation:** PCI device FCode evaluation error.

**Failing Item:**

- FWPCI1
- 

**BA180009**

**Explanation:** The FCode on a PCI adapter left a data stack imbalance.

**Problem determination:** You should load the new adapter Fcode before you use the adapter (specified by the location code associated with this error) for booting.

**Failing Item:**

- FWPCI1
- 

**BA180010**

**Explanation:** PCI probe error, bridge in freeze state.

**Failing Item:**

- FWPCI2
- 

---

**BA180011**

**Explanation:** Partition has reached its maximum Open Firmware size. Partition will continue to boot, but some I/O may be unusable as boot devices.

**Problem determination:**

1. No action required if I/O used as a boot device functions without failure.
  2. Update to latest system firmware level.
  3. Contact your next level of support.
- 

**BA180012**

**Explanation:** Partition unable to increase size of Real Mode Offset region. Partition will continue to boot, but some I/O may be unusable as boot devices.

**Problem determination:**

1. No action required if I/O used as a boot device functions without failure.
  2. Update to latest system firmware level.
  3. Contact your next level of support.
- 

**BA180013**

**Explanation:** A PCI adapter was found that this machine type and model does not support.

**Problem determination:** Is this system an IBM Intellistation model?

- Yes: Complete the following steps.
    1. Check for and apply any available server firmware updates.
    2. Replace the adapter at the location code that was reported with the error.
  - No: Remove the PCI adapter specified by the location code.
- 

**BA180014**

**Explanation:** MSI software error

**Failing Item:**

- FWFLASH
- 

**BA180015**

**Explanation:** PCI slot error operation recovery timed out.

**Failing Item:**

- FWPCI1
- 

**BA180020**

**Explanation:** No response was received from a PCI slot during probing

**Failing Item:**

- FWPCI1

---

**BA180030**

**Explanation:** A PHB reset/recovery was successful.

---

**BA180031**

**Explanation:** A PHB was reset more than once during the boot or reboot of a system or partition.

---

**BA180099**

**Explanation:** PCI probe error, bridge in freeze state, slot in reset state.

**Failing Item:**

- FWFLASH

---

**BA180101**

**Explanation:** Stack underflow from fibre-channel adapter.

**Failing Item:**

- FWFWPBL

---

**BA188000**

**Explanation:** An unsupported adapter was found in a PCI slot.

**Problem determination:** Remove the unsupported adapter in the slot specified by the location code.

---

**BA188001**

**Explanation:** EEH event detected and successfully recovered.

**Problem determination:** This is an informational code only, and no action is required. The location code indicates which I/O slot experienced the recovery.

---

**BA188002**

**Explanation:** EEH event detected but failed to recover for a specified slot or I/O adapter.

**Problem determination:** Replace the adapter in the slot specified by the location code. Replace parts specified as secondary location codes, as necessary.

---

**BA191001**

**Explanation:** The hypervisor function to turn on the speaker reported an error.

**Failing Item:**

- FWFWPBL

---

**BA201001**

**Explanation:** The serial interface dropped data packets

**Failing Item:**

- FWFWPBL

---

**BA201002**

**Explanation:** The serial interface failed to open.

**Problem determination:** Check console settings to ensure the console is defined to the correct port. Ensure the console cables are connected to the port that is defined as the console.

**Failing Item:**

- FWFWPBL

---

**BA201003**

**Explanation:** The firmware failed to handshake properly with the serial interface.

**Problem determination:** Check for system firmware update.

Contact your next level support for assistance.

**Failing Item:**

- FWFWPBL

---

**BA210000**

**Explanation:** Partition firmware reports a default catch.

**Failing Item:**

- FWFWPBL

---

**BA210001**

**Explanation:** Partition firmware reports a stack underflow was caught.

**Failing Item:**

- FWFWPBL

---

**BA210002**

**Explanation:** Partition firmware was ready before stand-out was ready.

**Failing Item:**

- FWFWPBL

---

**BA210003**

**Explanation:** Partition firmware detected a data storage error.

**Failing Item:**

- FWPCI1

---

**BA210004**

**Explanation:** An open firmware stack-depth assert failed .

**Problem determination:** Check for system firmware update. Contact your next level support for assistance.

---

**BA210005**

**Explanation:** Open firmware free memory chain corruption detected and isolated.

**Problem determination:** Check for system firmware update. Contact your next level support for assistance.

---

**BA210010**

**Explanation:** The transfer of control to the SLIC loader failed.

**Failing Item:**

- FFWFPBL

---

**BA210011**

**Explanation:** The transfer of control to the I/O reporter failed.

**Failing Item:**

- FFWFPBL

---

**BA210012**

**Explanation:** NVRAMRC forced-boot problem; unable to load operating system that was loaded on previous boot.

**Problem determination:** Use the bootlist menus in the SMS to verify that the operating system image can still be detected by firmware. If firmware does not see the image, reload the operating system.

---

**BA210013**

**Explanation:** There was a partition firmware error when in the SMS menus.

**Response:** Look for server firmware updates; apply if available.

---

**BA210020**

**Explanation:** The I/O configuration exceeds the maximum size allowed by partition firmware.

**Problem determination:** Increase the logical memory block size to 256 megabytes (MB) and reboot the managed system. (If the logical memory block size is already 256 MB, contact your next level of support.)

**Failing Item:**

- NEXTLVL

---

**BA210100**

**Explanation:** The partition firmware was unable to log an error with the server firmware. No reply was received from the server firmware to an error log that was sent previously.

**Failing Item:**

- NEXTLVL

---

**BA210101**

**Explanation:** The partition firmware error log queue is full.

**Problem determination:** Contact service support.

**Failing Item:**

- NEXTLVL

---

**BA210102**

**Explanation:** There was a communication failure between partition firmware and the hypervisor. The lpevent that was expected from the hypervisor was not received.

**Response:**

1. Review the error logs for errors that occurred around the time of this error. Correct any errors that are found and reboot the blade server.
2. Look for server firmware updates; apply if available.

---

**BA210103**

**Explanation:** There was a communication failure between partition firmware and the hypervisor. There was a failing return code with the lpevent acknowledgement from the hypervisor.

**Response:**

1. Review the error logs for errors that occurred around the time of this error. Correct any errors that are found and reboot the blade server.
2. Look for server firmware updates; apply if available.

---

**BA220020**

**Explanation:** CRQ registration error; partner vslot not valid.

**Problem determination:** From the HMC, verify that this client virtual-slot device has a valid server virtual-slot device in a hosting partition.

---

**BA220030**

**Explanation:** Subordinate CRQ registration error, partner vslot not valid.

**Problem determination:** From the HMC/IVM, verify that this client virtual-slot device has a valid server virtual-slot device in a hosting partition.

---

**BA250010**

**Explanation:** dlpdr error in open firmware.

**Failing Item:**

- FWLPAR
- 

**BA250020**

**Explanation:** dlpdr error in open firmware due to an invalid dlpdr entity. This error may have been caused by an errant or hung operating system process.

**Problem determination:** Do the following:

1. Check for operating system updates that resolve problems with dynamic logical partitioning (dlpdr) and apply them, if available.
  2. Check for server firmware updates and apply them, if available.
- 

**BA250030**

**Explanation:** A hotplug operation in dynamic logical partitioning (dlpdr) was terminated for concurrent firmware update.

**Problem determination:** Retry the hotplug operation after the concurrent firmware update is complete.

---

**BA250040**

**Explanation:** Unable to generate device-tree node for partition migration

**Problem determination:** After performing the FWFLASH procedure, check for operating system updates and apply them if available.

**Failing Item:**

- FWFLASH
- 

**BA278001**

**Explanation:** Failed to flash firmware; invalid image file

**Problem determination:** Obtain a valid firmware image for this system.

---

**BA278002**

**Explanation:** Flash file is not designed for this eServer platform.

**Problem determination:** Obtain a valid firmware image for this system.

---

**BA278003**

**Explanation:** Unable to lock the firmware update lid manager.

**Problem determination:** Do the following:

1. Reboot the system.
  2. Make sure that the operating system is authorized to update the firmware. If the system is running multiple partitions, verify that this partition has service authority.
- 

**BA278004**

**Explanation:** An invalid firmware update lid was requested.

**Problem determination:** Obtain a valid firmware image for this system.

---

**BA278005**

**Explanation:** Failed to flash a firmware update lid.

**Problem determination:** Obtain a valid firmware image for this system.

---

**BA278006**

**Explanation:** Unable to unlock the firmware update lid manager.

**Problem determination:** Reboot the system.

---

**BA278007**

**Explanation:** Failed to reboot the system after a firmware flash update.

**Problem determination:** Manually reboot the system.

---

**BA278008**

**Explanation:** A server firmware update was attempted from the operating system. You must perform the update by using the Hardware Management Console (HMC).

**Problem determination:** Perform the flash update from the HMC.

---

---

**BA278009**

**Explanation:** The server firmware update management tools for the version of Linux that you are running are incompatible with this system.

**Problem determination:** Go to the Service and productivity tools for Linux on POWER link and download the latest service aids and productivity tools for the version of Linux that you are running.

---

**BA27800A**

**Explanation:** Firmware flash failed due to hardware error being reported.

**Problem determination:** Resolve any problems that are found in the error logs, then retry the firmware flash.

---

**BA27800B**

**Explanation:** Firmware flash failed because flash image's release date is later than system's firmware maintenance entitlement date.

**Problem determination:**

1. Update system's firmware maintenance entitlement date.
2. See additional logs for more information.

---

**BA280000**

**Explanation:** RTAS discovered a hardware or firmware error.

**Problem determination:** Do the following:

1. Review error logs for other entries posted at approximately the same time as this entry.
2. Check error logs posted in ASM if the service processor is available.
3. If no other entries found, check for system firmware update.

**Failing Item:**

- NEXTLVL

---

**BA290000**

**Explanation:** RTAS discovered an internal stack overflow

**Failing Item:**

- FWFWPBL

---

**BA290001**

**Explanation:** RTAS low memory corruption

**Failing Item:**

- FWFWPBL

---

**BA290002**

**Explanation:** RTAS low memory corruption

**Failing Item:**

- FWFWPBL

---

**BA300010**

**Explanation:** The partition exceeded the maximum number of logical memory blocks allowed under the new memory allocation scheme.

**Problem determination:** Reduce the total logical memory block limit in the partition profile, then reactivate the partition. (The maximum number of logical memory blocks per partition is 128 kilobytes (Kb) under the new memory allocation scheme.)

---

**BA300020**

**Explanation:** Function call to isolate a logical memory block failed under the standard memory allocation scheme.

**Problem determination:** Do the following:

1. Check for system firmware updates; apply if available.
2. Upgrade the operating system to a level that supports the new memory representation, or edit the profile to have fewer logical memory blocks than the 8K maximum.
3. Reboot the partition.

---

**BA300030**

**Explanation:** Function call to make a logical memory block unusable failed under the standard memory allocation scheme.

**Problem determination:** Do the following:

1. Check for system firmware updates; apply if available.
2. Upgrade the operating system to a level that supports the new memory representation, or edit the profile to have fewer logical memory blocks than the 8K maximum.
3. Reboot the partition.

---

**BA300040**

**Explanation:** The partition, which is running the traditional memory representation, exceeded the limit of 8192 logical memory blocks allowed by the standard memory allocation scheme.

**Problem determination:** Do the following:

1. Upgrade the operating system to a level that supports the new memory representation, or edit the profile to have fewer logical memory blocks than the 8K maximum.

2. Reboot the partition.

---

**BA310010**

**Explanation:** The firmware could not obtain the SRC history.

**Failing Item:**

- FWFLASH

---

**BA310020**

**Explanation:** The firmware received an invalid SRC history.

**Failing Item:**

- FWFLASH

---

**BA320030**

**Explanation:** The firmware operation to write the MAC address to vital product data (VPD) failed

**Failing Item:**

- FWFLASH

---

**BA320060**

**Explanation:** Invalid vital product data (VPD): no description was found.

**Failing Item:**

- FWFLASH

---

**BA330000**

**Explanation:** Memory allocation error in partition firmware.

**Problem determination:**

- Reboot partition
- Reflash firmware

---

**BA330001**

**Explanation:** memory allocation error

**Problem determination:**

- Reboot partition
- Reflash firmware

---

**BA330002**

**Explanation:** memory allocation error

**Problem determination:**

- Reboot partition
- Reflash firmware

---

**BA330003**

**Explanation:** memory allocation error

**Problem determination:**

- Reboot partition
- Reflash firmware

---

**BA330004**

**Explanation:** memory allocation error

**Problem determination:**

1. Reboot the partition.
2. Check for system firmware updates; apply if available.

---

**BA330010**

**Explanation:** A virtual real memory (VRM) pin page function call failed.

**Problem determination:**

1. Check for the system firmware updates; apply if available.
2. Contact your next level of support.

---

**BA330011**

**Explanation:** A virtual real memory (VRM) unpin page function call failed.

**Problem determination:**

1. Check for the system firmware updates; apply if available.
2. Contact your next level of support.

---

**BA340001**

**Explanation:** Logical partition (LP) event communication failure reading integrated fabric manager parameter data structure from service processor.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA340002**

**Explanation:** Logical partition (LP) event communication failure reading integrated fabric manager parameter location code mapping data from service processor.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA340003**

**Explanation:** Internal firmware error. Could not allocate memory for integrated fabric manager location code mapping data.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA340004**

**Explanation:** Internal firmware error. Integrated fabric manager parameter data corrupted.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA340005**

**Explanation:** Internal firmware error. Location code mapping table corrupted.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA340006**

**Explanation:** Logical partition (LP) event communication failure reading system initiator capability data from service processor.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA340007**

**Explanation:** Internal firmware error. Integrated fabric manager system initiator capability data corrupted.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA340008**

**Explanation:** Internal firmware error. Integrated fabric manager system initiator capability data version not correct.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA340009**

**Explanation:** Internal firmware error. Integrated fabric manager system initiator capability processing encountered unexpected error.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA34000A**

**Explanation:** Integrated fabric manager parameter data version not supported by partition firmware.

**Problem determination:**

1. Apply updated Management Module and system firmware, if available.
2. Contact the next level of support for assistance.

---

**BA340010**

**Explanation:** Internal firmware error detected during integrated integrated fabric manager processing.

**Problem determination:**

1. Apply updated system firmware if available.
2. Contact the next level of support for assistance.

---

**BA340011**

**Explanation:** Attempt to assign user-specified fabric addresses failed.

**Problem determination:**

1. Apply updated I/O adapter firmware if available.
2. Replace adapter identified by the location code.
3. Contact the next level of support for assistance.

---

**BA340012**

**Explanation:** I/O adapter does not have integrated fabric management capability even though user-assigned fabric addresses have been provided for address reassignment.

**Problem determination:**

1. Apply updated I/O adapter firmware if available.
2. Replace adapter identified by the location code
3. Contact your next level of support for assistance.

---

**BA340013**

**Explanation:** Attempt to force I/O adapter to revert from use of fabric ID to its manufacturing assigned address failed.

**Problem determination:**

1. Apply updated I/O adapter firmware if available.
2. Replace adapter identified by the location code.

3. Contact the next level of support for assistance.

---

**BA340020**

**Explanation:** Logical partition (LP) event communication failure writing integrated fabric manager parameter data to service processor.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA340021**

**Explanation:** Logical partition (LP) event communication failure writing integrated fabric manager system initiator capabilities data to service processor.

**Problem determination:**

1. Apply updated firmware if available.
2. Contact the next level of support for assistance.

---

**BA350000**

**Explanation:** An error occurred when attempting to create a system plan; this normally results in no system plan being created. This is an informational code; typically, no hardware needs to be replaced. The problem may be an intermittent hardware error, or may be firmware-related.

**Problem determination:**

1. Try again to create a system plan. If the retry is successful and the system plan is created, no other action is required.
2. Check the error logs for hardware errors, and verify that I/O hardware is reporting correctly to the server. If a problem is found, correct it, then try again to create a system plan.
3. Check for and apply any available system firmware update.
4. Contact your next level of support.

---

**BA350100**

**Explanation:** Informational message: the string property value is longer than the buffer that was allocated. The string has been truncated to fit in the buffer space that was allocated.

---

**BA350103**

**Explanation:** Failed to obtain the time and date from firmware.

**Problem determination:**

1. Check for system firmware updates; apply if available.
2. Reboot the system.

---

**BA350104**

**Explanation:** An error occurred in the firmware function that manages parent topology identifiers.

**Problem determination:**

1. Reboot the system.
2. Check for system firmware updates; apply if available.

---

**BA400001**

**Explanation:** DMA trace buffer overflow; informational message.

**Response:** Check for system firmware updates; apply if available.

---

**BA400002**

**Explanation:** DMA map-out size mismatch; informational message.

**Problem determination:** Check for system firmware updates; apply if available.

---

**BA54504D**

**Explanation:** A Virtual Trusted Platform Module (vTPM) driver entered a failure state.

**Problem determination:** Check for system firmware updates; apply if available.

---

**BA54505D**

**Explanation:** An error occurred while trying to return the Virtual Trusted Platform Module (vTPM) to the init state.

**Problem determination:** Check for system firmware updates; apply if available.

---

**BA550200**

**Explanation:** This informational log entry was made on behalf of a debugging utility. No devices need to be repaired unless indicated by other SRCs with the same device location code.

**Problem determination:**

1. Contact your next level of support.

---

**BA550201**

**Explanation:** This informational log entry was made on behalf of a debugging utility. No devices need to be repaired unless indicated by other SRCs with the same device location code.

**Problem determination:**

1. Contact your next level of support.

---

**BA600001**

**Explanation:** Unsupported trace type value specified.

**Problem determination:**

1. Check for and apply any system firmware update.
2. Contact your next level of support for assistance.

**Explanation:** Stack depth incorrect for trace entry type value specified.

**Problem determination:**

1. Check for and apply any system firmware update.
2. Contact your next level of support for assistance.

---

**BA600002**

---

**(BBxx) Reference codes**

A BBxx reference code indicates that an event or error was detected and logged by the kernel-based virtual machine (KVM).

---

**BB821010**

**Explanation:** An in-band firmware update using the update-flash tool failed on PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.

**Problem determination:** The problem might be due to the firmware image. Try the firmware update again using a different image. If that does not resolve the problem then perform the problem determination steps below and contact your next level of support.

**Problem determination:** Reboot the machine and try the firmware update again. If that does not resolve the problem then perform the problem determination steps below and contact your next level of support.

---

**BB821013**

**Explanation:** An in-band firmware Commit / Reject operation failed on PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.

**Problem determination:** Reboot the machine and try the firmware update again. If that does not resolve the problem then perform the problem determination steps below and contact your next level of support.

---

**BB821011**

**Explanation:** An in-band firmware update initialization failed on PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.

**Problem determination:** Reboot the machine and try the firmware update again. If that does not resolve the problem then perform the problem determination steps below and contact your next level of support.

---

**BB821014**

**Explanation:** An in-band firmware update failed to allocate memory on PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.

**Problem determination:** Reboot the machine and try the firmware update again. If that does not resolve the problem then perform the problem determination steps below and contact your next level of support.

---

**BB821012**

**Explanation:** During an in-band firmware update, host kernel failed to send the image properly.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.

---

**BB821015**

**Explanation:** An in-band firmware update got unknown notification from service processor.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.

**Problem determination:** Reboot the machine and try the firmware update again. If that does not resolve the problem then perform the problem determination steps below and contact your next level of support.

#### BB821016

**Explanation:** An in-band firmware update failed to retrieve all required components of the new firmware.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.

**Problem determination:** Reboot the machine and try the firmware update again. If that does not resolve the problem then perform the problem determination steps below and contact your next level of support.

#### BB821110

**Explanation:** PowerNV failed to read from or write to the serial communication interface.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

#### BB821111

**Explanation:** PowerNV failed to read from or write to the serial communication interface by using an indirect path.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

#### BB821112

**Explanation:** PowerNV failed to reset the serial communication interface.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

#### BB821113

**Explanation:** XSCOM read/write operation failed since the XSCOM unit is busy.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

#### BB821410

**Explanation:** A fatal OPAL error occurred.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dumps.
3. Contact your next level of support.

#### BB821510

**Explanation:** The service processor failed to report correctable or uncorrectable memory errors to the Hypervisor.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

#### BB821511

**Explanation:** The service processor failed to report large scale memory deallocation errors to the Hypervisor.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:  
"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821610**

**Explanation:** PowerNV failed to initialize the memory controller.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821611**

**Explanation:** PowerNV failed to read from or write to the memory controller.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821710**

**Explanation:** PowerNV failed to communicate to an internal monitoring and control bus.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821810**

**Explanation:** OPAL failed to initialize the service processor dump retrieval infrastructure.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821811**

**Explanation:** OPAL was not able to find the dump with the said ID in its list of dumps.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821812**

**Explanation:** OPAL's dump retrieval infrastructure experienced an error. See user data section for more details.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821813**

**Explanation:** Initialization of the dump descriptor table failed in OPAL.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821814**

**Explanation:** Dump descriptor table update failed in OPAL.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821815**

**Explanation:** Adding a new entry to the dump descriptor table failed in OPAL.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB821816**

**Explanation:** Failed to remove a dump descriptor table entry in OPAL.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB821910**

**Explanation:** A System Power Control Network (SPCN) command failed in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB821911**

**Explanation:** Invalid memory buffer.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB821912**

**Explanation:** PowerNV failed to find an LED location code.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB821913**

**Explanation:** PowerNV Failed to change an LED state.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB821914**

**Explanation:** LED support not present in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB822010**

**Explanation:** Failure initializing an internal sensor in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB822011**

**Explanation:** OPAL failed to read the sensor data from Service Processor.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB822012**

**Explanation:** Invalid sensor data returned from service processor.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
-

---

**BB822110**

**Explanation:** Component initialization failure in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB822111**

**Explanation:** Failure reading a registry from the service processor.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB822112**

**Explanation:** Failure writing a registry from service processor.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB822113**

**Explanation:** Failure setting registry in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB822210**

**Explanation:** Service processor response timed out.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB822310**

**Explanation:** PowerNV failed to initialize an I2C controller.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB822311**

**Explanation:** I2C controller failed to send start request.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB822312**

**Explanation:** I2C controller timed out while waiting for the response of sent request.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB822313**

**Explanation:** I2C controller failed to read/write data.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
-

---

**BB822314**

**Explanation:** PowerNV failed to reset an I2C engine.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB822410**

**Explanation:** PowerNV failed to send an IPMI request.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB822411**

**Explanation:** PowerNV failed to get an IPMI response.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB822412**

**Explanation:** PowerNV received an IPMI DMA error response.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB823010**

**Explanation:** PowerNV reboot requested due to a Platform error.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"

2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB826010**

**Explanation:** PowerNV failed to initialize NVRAM on the system.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB826011**

**Explanation:** The NVRAM open interface failed in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB826012**

**Explanation:** NVRAM file size is not valid in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB826013**

**Explanation:** NVRAM write failed in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
-

---

**BB826014**

**Explanation:** NVRAM read failed in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB827010**

**Explanation:** Real Time Clock (RTC) read failed in PowerNV.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB827011**

**Explanation:** OPAL failed to send read TOD (Time of Day) request to the service processor.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB828010**

**Explanation:** OPAL failed to initialize the Service Processor connection monitoring interface.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB828011**

**Explanation:** OPAL received an incorrect response to a connection monitoring status query. A reset/reload of the service processor was therefore initiated.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB828012**

**Explanation:** OPAL timed out waiting for an acknowledgement of the connection monitoring ping. A reset/reload of the service processor was therefore initiated.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB82A010**

**Explanation:** Hypervisor timed out while reading internal bus state data.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB82A011**

**Explanation:** Hypervisor timed out while writing internal bus state data.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB82A012**

**Explanation:** SYNC error detected on LPC bus.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
2. Collect service processor and system dump.
3. Contact your next level of support.

---

**BB82A013**

**Explanation:** SYNC error detected on LPC bus when platform is in manufacturing mode. .

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB82B010**

**Explanation:** PowerNV failed to initialize the universal asynchronous receiver or transmitter.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB82C010**

**Explanation:** PowerNV failed to reset an on-chip controller.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB82C011**

**Explanation:** PowerNV failed to load an on-chip controller.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

---

**BB82C012**

**Explanation:** PowerNV failed to initialize states in an on-chip controller.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB82C013**

**Explanation:** PowerNV timed out while initialization of all on-chip controller chips.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB82D010**

**Explanation:** PowerNV failed to update the control panel.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

**BB82F012**

**Explanation:** PSI Link timeout, may be lost connection with service processor.

**Response:** Collect the following data to analyze the problem:

1. Collect debug data. Run the following command to collect debug data on the PowerNV system:"sosreport"
  2. Collect service processor and system dump.
  3. Contact your next level of support.
- 

## (BCxx) Reference codes

A BCxx reference code indicates that an event or exception occurred in boot firmware. To resolve any BCxx reference code, determine if the SRC requires a service action or if it is for tracking purposes only.

## BC100102 • BC100302

Diagnostics analyze an event when it occurs to determine if the event requires service or if the event will only be recorded for tracking purposes and future reference. The determination is based on machine type, model, installed features, configuration, topology and activations at the time of the event.

If you do not find the SRC in a serviceable event view then it is a tracking event only and does not require service.

- Tracking events appear as "informational" or "Misc." or "temp" in the IBM i product activity log and the Advanced System Manage Interface (ASMI).
- Serviceable event views are:
  - AIX® Diagnostics Results Log
  - IBM i problem log
  - IBM i service action log (SAL)
  - Management console service focal point
  - Linux® Diagnostic Messages Log
  - System control panel
  - ASMI listed under serviceable events

---

### BC100102

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100103

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100104

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100105

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100107

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

### BC100202

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100203

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100204

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100301

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100302

**Explanation:** During processor/memory subsystem

initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100303

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100305

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100306

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100307

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100308

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100401

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100402

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100403

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100404

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100405

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100406

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100407

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

#### BC100501

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC10050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep message received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC100603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC10060B**

**Explanation:** A problem occurred during the IPL of the system. status register.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both TOCs are corrupted.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100616**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC100617**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both TOCs are corrupted.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TOC

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10061A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid partition table.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10061B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: invalid section passed to getSectionInfo.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10061C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: UNCORRECTABLE ECC.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10061D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: section size is zero.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC10061E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: mm\_remove\_pages failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10061F**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100620**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100621**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Non ECC protected section is passed to fixECC.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100622**

**Explanation:** A problem occurred while reading PNOR partition table.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100623**

**Explanation:** A problem occurred while reading PNOR partition table.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100627**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Side not supported.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC100629**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No valid TOCs found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Module does not exist.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC100806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100911**

**Explanation:** A problem occurred during the IPL of the system

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC100912**

**Explanation:** A problem occurred during the IPL of the system

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC10091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC100923**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC10092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC100933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC100939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC100A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC100A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC100B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time

---

## BC100B0F • BC100C08

of the failure. See the error log for the actual replacement strategy.

---

### BC100B0F

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC100B10

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC100B11

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC100B12

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC100B80

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100B81

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100C01

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100C03

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100C04

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100C05

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100C06

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100C07

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC100C08

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC100D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC100E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC100F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC100F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC10100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC10110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

## BC101605 • BC101708

of the failure. Examine the error log for the actual replacement strategy.

---

### BC101605

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC101606

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC101607

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC101608

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC101609

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC10160B

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC101701

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC101702

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC101703

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC101704

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC101705

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC101706

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC101708

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to `getParentAffinityTarget` requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: MBOX send not supported in HBRT.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC101D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC101E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC101EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No TPMs found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC101EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EAB**

**Explanation:** TPM log operation failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EAC**

**Explanation:** TPM log buffer init failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EAD**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional TPMs exist in the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EAE**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EAF**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC101EB0**

**Explanation:** TPM log invalid format.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EB1**

**Explanation:** Firmware error during system boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EB2**

**Explanation:** Firmware error during system boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101EB3**

**Explanation:** Firmware error during system boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC101F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10200F**

**Explanation:** Error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC102026**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC102027**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC102030**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC102031**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC102033**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC102034**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC102035**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC10203B**

**Explanation:** Hardware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC10203D**

**Explanation:** Error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC102101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC102201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC10220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC10220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC102212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC102213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC102404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Set state only allowed on master OCC.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC102602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Set of OCC state failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid OCC state requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC102701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC102707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC102709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC10270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC102A41**

**Explanation:** An inband scom failure occurred.

**Response:** If this is a tracking event, no service actions are required. Otherwise, use the FRU and procedure callouts detailed with the SRC to determine service actions.

---

**BC130102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep message received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC13050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both TOCs are corrupted.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC130614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130627**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC130712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC13091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC13092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

---

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC130B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC130C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC130D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC130F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC130F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC13100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC13110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC131401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to `getParentAffinityTarget` requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BC13170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC131E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC131EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC131F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132026**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC132027**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC132030**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC132031**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC132033**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC132034**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC132035**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC13203B**

**Explanation:** Hardware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC13203D**

**Explanation:** Error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC132101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC132102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC132208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC13220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC132211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC132213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC132217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC132402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC132409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC13260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC132635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC132705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC132709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC13270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC13270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC14050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep message received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140627**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BC140710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC14091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC140932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC140938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC140B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC140C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC140D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC140F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC140F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC14100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC14110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC14120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC141604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC14160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC14170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC14190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC141D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC141E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC141EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC141EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC141F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC142101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC142102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC142201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

---

---

**BC142213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC142602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC142623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC142701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC142709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC14270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC200102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep message received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC200601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC200615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200627**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC20070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20070F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C offset length is invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC200710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was a request for an invalid EEPROM page.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC20091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC200932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC200938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC200B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC200C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC200D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC200F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC200F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC201003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC20100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC20110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC201202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC20120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC201604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC20160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC201708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC201901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC201A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC201A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC201A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC201C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC201D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC201D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC201D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC201EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC201EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC201EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC201F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC202202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC20220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC20220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC202212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

## BC202213 • BC202403

of the failure. Examine the error log for the actual replacement strategy.

---

### BC202213

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Mismatch with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202214

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202215

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Mismatch with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202216

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202217

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202218

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202300

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202301

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202302

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202303

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202401

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202402

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC202403

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC202602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC202623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC202701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC202707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC202709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC20270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC20E504**

**Explanation:** A hardware failure was detected in the central electronics complex (CEC).

**Response:** If this is a tracking event, no service actions are required. Otherwise, use the FRU and procedure callouts detailed with the SRC to determine service actions.

---

**BC210102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep message received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC21050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC210614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210627**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC21091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210929**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC21092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC210939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BC210B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC210D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC210F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC210F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC21100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC211605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC21160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC211708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC211901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC211A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC211A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC211C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC211D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC211D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC211D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC211D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC211E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC211EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC211EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC211F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC212203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC21220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC21220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC212213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC212214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC212406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC212605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC212625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212656**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC reset threshold reached. Leaving OCCs in reset state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC212702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid TPM chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC212708**

**Explanation:** A problem occurred during the IPL of the system: TPM buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC212709**

**Explanation:** A problem occurred during the IPL of the system: TPM underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21270A**

**Explanation:** A problem occurred during the IPL of the system: TPM timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC21E504**

**Explanation:** A hardware failure was detected in the central electronics complex (CEC).

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep message received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC220702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC22070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC22091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220929**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC22092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC220935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC22093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC220D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC220F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC220F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC22100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC22170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC221D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC221E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC221EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC221EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC221F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC222101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC222207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC22220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC222210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC222213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC222216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC222401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC222408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC222606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC22261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC222704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC222709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC22270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC22270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC23050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: PNOR::validateAltMaster> Fail verifying FFS Header on Master Candidate PNOR TOC0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC230610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BC23070F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C offset length is invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was a request for an invalid EEPROM page.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC230931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC23093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC230D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC230F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC230F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC23110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC23120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

## BC231603 • BC231704

of the failure. Examine the error log for the actual replacement strategy.

---

### BC231603

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC231604

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC231605

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC231606

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC231607

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC231608

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC231609

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC23160A

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC23160B

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC231701

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC231702

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC231703

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC231704

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC23170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC231D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC231E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC231EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC231EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC231F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC232207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC23220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC232210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC232213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC232216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC232401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC232408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC232606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC23261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232656**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC reset threshold reached. Leaving OCCs in reset state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid TPM chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC232708**

**Explanation:** A problem occurred during the IPL of the system: TPM buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC232709**

**Explanation:** A problem occurred during the IPL of the system: TPM underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23270A**

**Explanation:** A problem occurred during the IPL of the system: TPM timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC23E504**

**Explanation:** A hardware failure was detected in the central electronics complex (CEC).

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC500104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC500402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC500502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC50050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC50060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC50070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC50090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC500916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC500920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC500927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC50092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC500936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC50093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

## BC500A10 • BC500B0B

of the failure. Examine the error log for the actual replacement strategy.

---

### BC500A10

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500A11

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500A12

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B01

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B02

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B03

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B04

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B05

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B06

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B07

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B08

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B09

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B0A

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC500B0B

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

#### BC500B0C

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

#### BC500B0D

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BC500B0E

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BC500B0F

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BC500B10

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BC500B11

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BC500B12

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BC500B80

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

#### BC500B81

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

#### BC500C01

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

#### BC500C03

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

#### BC500C04

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

#### BC500C05

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC500C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC500D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC500E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC500F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC50100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC501111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC50120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC501602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC501609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC50170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC50190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC501A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC501A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC501C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC501C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC501D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC501D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC501D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC501EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC501EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC501F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC50200F**

**Explanation:** Error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC502026**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC502027**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC502030**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC502031**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC502033**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC502034**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC502035**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC50203B**

**Explanation:** Hardware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC50203D**

**Explanation:** Error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC502101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC50220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC50220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC502213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC502216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC502408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC502606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC502626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC502704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC502709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC50270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC50270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC55050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC550610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BC550710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC55091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC550932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC550938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC550C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC550D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC550F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC550F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC55100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC551102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC55120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC551604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC55160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC55170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC551A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC551A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC551C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC551D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC551D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC551D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC551D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC551E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC551EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC551EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC551F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55200F**

**Explanation:** Error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC552026**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC552027**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC552030**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC552031**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC552033**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC552034**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC552035**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC55203B**

**Explanation:** Hardware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC55203D**

**Explanation:** Error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC552101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC552102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC552201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC552202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC552203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC552204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC552206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC552207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC552208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC55220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC552210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC552211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC552212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC552213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC552217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC552402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC552409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC55260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC55261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552656**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC reset threshold reached. Leaving OCCs in reset state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC552704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid TPM chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552708**

**Explanation:** A problem occurred during the IPL of the system: TPM buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC552709**

**Explanation:** A problem occurred during the IPL of the system: TPM underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC55270A**

**Explanation:** A problem occurred during the IPL of the system: TPM timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC55270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC56050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BC56070F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C offset length is invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was a request for an invalid EEPROM page.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC560931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC56093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC560D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC560F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC560F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC56110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC56120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

---

## BC561603 • BC561704

of the failure. Examine the error log for the actual replacement strategy.

---

### BC561603

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC561604

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC561605

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC561606

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC561607

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC561608

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC561609

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC56160A

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC56160B

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC561701

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC561702

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC561703

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC561704

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC56170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC561D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC561E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC561EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Module (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC561EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC561F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC562208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC56220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC562211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC562213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC562217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC562402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC562409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC56260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC56261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC562635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC562705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC562709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC56270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC56270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC57050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

---

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57090F**

**Explanation:** Error initializing processor/memory subsystem during boot. Examine FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC57091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC57092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC570933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC570939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC570B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC570D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC570E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC570F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC57100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC57110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC571605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC571901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC571D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC571E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC571EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC571EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC571EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC571F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC572202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC57220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC57220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC572212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC572213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC572404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC572602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read `FREQ_EXT_BIAS` attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572656**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC reset threshold reached. Leaving OCCs in reset state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid TPM chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC572706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572708**

**Explanation:** A problem occurred during the IPL of the system: TPM buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC572709**

**Explanation:** A problem occurred during the IPL of the system: TPM underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57270A**

**Explanation:** A problem occurred during the IPL of the system: TPM timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC57270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC580102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

## BC580204 • BC580406

of the failure. Examine the error log for the actual replacement strategy.

---

### BC580204

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580301

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580302

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580303

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580305

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580306

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580307

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

### BC580308

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580401

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580402

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580403

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580404

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580405

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC580406

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC580407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC580508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC580607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC580614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC58070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC580711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC580807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58090F**

**Explanation:** Error initializing processor/memory subsystem during boot. Examine FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC580912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC58091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC580923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC58092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC580933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC580A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC580B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC580B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BC580B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC580D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC580E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC580F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC580F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC58100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC58110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

---

## BC581605 • BC581706

of the failure. Examine the error log for the actual replacement strategy.

---

### BC581605

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC581606

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC581607

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC581608

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC581609

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC58160A

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC58160B

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC581701

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC581702

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC581703

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC581704

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC581705

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC581706

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC581901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC581E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC581EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC581EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC581EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC581F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC58220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC58220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC582213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC582214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC582302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC582406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time

---

## BC582605 • BC582624

of the failure. See the error log for the actual replacement strategy.

---

### BC582605

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC582606

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read `FREQ_EXT_BIAS` attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC58260E

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC582616

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC582618

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC582619

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC58261B

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC58261C

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC58261D

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC582622

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC582623

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC582624

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC582703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC582708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC582709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC58270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A070F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C offset length is invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was a request for an invalid EEPROM page.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A090F**

**Explanation:** Error initializing processor/memory subsystem during boot. Examine FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A0936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC5A093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

## BC5A0B05 • BC5A0B11

of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A0B05

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A0B06

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A0B07

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A0B08

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A0B09

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A0B0A

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A0B0B

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A0B0C

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A0B0D

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5A0B0E

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5A0B0F

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5A0B10

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5A0B11

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A0D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A0E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A0F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC5A1602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC5A1609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

## BC5A170C • BC5A1A08

of the failure. See the error log for the actual replacement strategy.

---

### BC5A170C

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5A170D

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5A1901

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A1902

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A1903

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A1904

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A190C

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A1A01

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A1A02

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A1A03

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A1A04

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A1A05

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC5A1A08

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A1D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A1E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A1EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A1EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A1EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A1F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A2206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5A220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5A2213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC5A2216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A2408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A2606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read `FREQ_EXT_BIAS` attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A2626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2656**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC reset threshold reached. Leaving OCCs in reset state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid TPM chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A2708**

**Explanation:** A problem occurred during the IPL of the system: TPM buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5A2709**

**Explanation:** A problem occurred during the IPL of the system: TPM underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A270A**

**Explanation:** A problem occurred during the IPL of the system: TPM timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5A270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C090F**

**Explanation:** Error initializing processor/memory subsystem during boot. Examine FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C0931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C0937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C0A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C0B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C0C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C0D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C0F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C0F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C1003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C1202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C1A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C1A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C1C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C1D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C1D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C1D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC5C1D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C1E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C1EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C1EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C1F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC5C2212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

## BC5C2213 • BC5C2403

of the failure. Examine the error log for the actual replacement strategy.

---

### BC5C2213

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2214

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2215

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2216

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2217

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2218

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2300

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2301

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2302

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2303

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2401

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2402

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC5C2403

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC5C2602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read `FREQ_EXT_BIAS` attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C2623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C2701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC5C2707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C2709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC5C270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC600102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep message received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC600601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC600615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC60070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC600712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60090F**

**Explanation:** Error initializing processor/memory subsystem during boot. Examine FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC60091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC60092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

## BC60093C • BC600A0D

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC60093C

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC60093D

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC60093E

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC600A01

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC600A03

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC600A04

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC600A06

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC600A08

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC600A09

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC600A0A

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC600A0B

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC600A0C

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC600A0D

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC600B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC600C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC600D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC600F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC600F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC60100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC60110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC601401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC60170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC601D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC601E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC601EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC601EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC601F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC602204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC60220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC60220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC602213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC602215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC602407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC602606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read `FREQ_EXT_BIAS` attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC602626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602656**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC reset threshold reached. Leaving OCCs in reset state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC602703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid TPM chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC602708**

**Explanation:** A problem occurred during the IPL of the system: TPM buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC602709**

**Explanation:** A problem occurred during the IPL of the system: TPM underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60270A**

**Explanation:** A problem occurred during the IPL of the system: TPM timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC60270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC70050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC70060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC70070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70090F**

**Explanation:** Error initializing processor/memory subsystem during boot. Examine FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC700931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC700937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC70093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC700B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC700D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC700F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC700F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC70110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC70120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC701603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC70170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC701D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC701E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC701EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC701EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC701F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70200F**

**Explanation:** Error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC702026**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC702027**

**Explanation:** Hardware access error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC702030**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC702031**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC702033**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC702034**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC702035**

**Explanation:** Error accessing VPD information while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC70203B**

**Explanation:** Hardware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC70203D**

**Explanation:** Error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC702101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC702208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC70220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC702211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC702213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC702217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC702402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC702409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read `FREQ_EXT_BIAS` attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC70260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC702635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC702705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC702709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC70270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC70270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC7A1703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC81050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC810610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BC810710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81090F**

**Explanation:** Error initializing processor/memory subsystem during boot. Examine FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid num of parent chip found for input CFAM target chiplet.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC81091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC810938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC810B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC810C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC810D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC810F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC810F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC81100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC811102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC81110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC811202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC81120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC811604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC81170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC811A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC811A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC811C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC811D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC811D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC811D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC811D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC811E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC811EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC811EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No TPMs found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC811EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC811F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812001**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812011**

**Explanation:** Firmware error, update code to the latest release.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC812013**

**Explanation:** Firmware error during code update, some power management function may be lost.

**Response:** Consult FRU list to determine exact failure.

---

**BC812014**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812017**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812018**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC81201F**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812020**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812021**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812022**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812023**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC812024**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812025**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812028**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812029**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC81202A**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC81202B**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC81202C**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC81202D**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC81202E**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC81202F**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812032**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812036**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812037**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812038**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812039**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC81203A**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC81203C**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812041**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC812042**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC812101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC812206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC81220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC81220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC812213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC812216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC812606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read `FREQ_EXT_BIAS` attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC81261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC812626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC812704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC812709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC81270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC81270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC82050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC820610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC820710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820807**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820901**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82090F**

**Explanation:** Error initializing processor/memory subsystem during boot. Examine FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820911**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC82091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC820932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC820938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC820A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC820B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC820C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC820D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC820E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC820F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC82100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC82110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC82120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

---

of the failure. Examine the error log for the actual replacement strategy.

---

**BC821604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC821901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821C03**

**Explanation:** ADuring processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC821D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC821E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC821EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC821EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC821F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822001**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822011**

**Explanation:** Firmware error, update code to the latest release.

**Response:** Consult FRU list to determine exact failure.

---

**BC822013**

**Explanation:** Firmware error during code update, some power management function may be lost.

**Response:** Consult FRU list to determine exact failure.

---

**BC822014**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822017**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC822018**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC82201F**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822020**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822021**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822022**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822023**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822024**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822025**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822028**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC822029**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC82202A**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC82202C**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC82202D**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC82202E**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC82202F**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822032**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822036**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822037**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

---

**BC822038**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822039**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC82203A**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC82203C**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822041**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822042**

**Explanation:** Firmware error while initializing power management hardware.

**Response:** Consult FRU list to determine exact failure.

---

**BC822101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC822201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC82220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC82220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC822212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC822213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC822405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC822603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC822626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC822655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC82270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0103**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0104**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A050A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0601**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0602**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0603**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0604**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0605**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0606**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0607**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0608**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0609**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A060B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0610**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0616**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0617**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both TOCs are corrupted.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TOC

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A061A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid partition table.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A061B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: invalid section passed to getSectionInfo.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A061C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: UNCORRECTABLE ECC.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A061D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: section size is zero.

**Response:** The FRU callouts are calculated at the time

---

## BC8A061E • BC8A0707

of the failure. See the error log for the actual replacement strategy.

---

### BC8A061E

**Explanation:** During processor/memory subsystem initialization, an error was encountered: mm\_remove\_pages failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC8A061F

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC8A0620

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC8A0621

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Non ECC protected section is passed to fixECC.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC8A0622

**Explanation:** A problem occurred while reading PNOR partition table.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC8A0623

**Explanation:** A problem occurred while reading PNOR partition table.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC8A0627

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Side not supported.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

### BC8A0629

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No valid TOCs found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BC8A0702

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0703

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0705

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0706

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0707

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A070B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

## BC8A0807 • BC8A091B

of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0807

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0901

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0902

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A090F

**Explanation:** Error initializing processor/memory subsystem during boot. Examine FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0910

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0911

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0912

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0913

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0914

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0915

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0916

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A0917

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

### BC8A091B

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A091C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A091D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A091E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A091F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0920**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0921**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0922**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0923**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0924**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0925**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0926**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0927**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0929**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC8A0933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC8A0939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0B01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0B08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B0D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0B0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC8A0B0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0C81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0C82**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A0D01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0D02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0E03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0E04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0E05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0E06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0E07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0E08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0F02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A0F03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0F04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0F05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A0F07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time

of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC8A160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A170A**

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A170B**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A170C**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A170D**

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1901**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1902**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1903**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1904**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A190C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1A04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A0B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A0C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1A0E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A11**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A12**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A14**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A1D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BC8A1D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1E07**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A1EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC8A1EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A1F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2201**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2202**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2203**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

---

**BC8A2204**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2206**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2207**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2208**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A220A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A220B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A220C**

**Explanation:** The power state of the system was not valid for the IPL lock that was requested.

**Response:** If this is a tracking event, no service actions are required. Otherwise, use the FRU and procedure callouts detailed with the SRC to determine service actions.

---

---

**BC8A220D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2210**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2211**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered.

**Response:** The FRU callouts are calculated at the time of the failure. Examine the error log for the actual replacement strategy.

---

**BC8A2213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Mismatch with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC8A2214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC8A2302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC8A2406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BC8A2605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read `FREQ_EXT_BIAS` attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC8A2703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A2708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BC8A2709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BC8A270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Hardware callout could not find Gard target because it could not find EX chip associated with the Core to be called out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A device driver operation was attempted for which no driver has been registered.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF0203**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A device driver operation on a NULL target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A double registration was attempted with the routing framework.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address for that unit.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Did not find parent type requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0303**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Scm Translate not supported for this type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0305**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Indirect SCOM Read error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF0306**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Indirect SCOM complete bit did not come on.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0307**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Indirect SCOM Write failed for this address.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0308**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Indirect SCOM complete bit did not come on.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: XSCOM access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: XSCOM buffer size less than 8 bytes or NULL data buff.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0403**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: XSCOM invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF0405**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0406**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: XSCOM access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0407**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: XSCOM runtime interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0501**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Initialization Service failed to start a task.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0502**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Initialization Service attempted to start a function within a module but the function failed to launch.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0503**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: One or more CxxTest Unit Tests failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0505**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Initialization Service launched a task and the task returned an error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0506**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Initialization Service launched a function and the task returned an error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0507**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Initialization Service failed to load a module needed to load a function or task. UserDetails will contain the name of the function or task.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0508**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request to send Istep Complete msg to Fsp, but no outstanding message from service processor found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0509**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: IStep failed and HW deconfigured. Looped back to an earlier istep (Reconfigure loop).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF050A**

**Explanation:** A hardware error occurred during the IPL. See previous logs for details.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF050B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Received shutdown request from service processor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF050C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF050D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Istep messaged received by non-master node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF050F**

**Explanation:** A reconfigure loop is being induced for testing purposes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0601**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0602**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0603**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF0604**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0605**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0606**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No support for MODEL\_REAL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0609**

**Explanation:** A problem occurred while accessing the boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF060B**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF060C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Fail verifying Flash File System(FFS) Header on Master Candidate Processor NOR flash Table of Contents 0 (TOC).

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BCFF0610**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0612**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0614**

**Explanation:** Firmware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0615**

**Explanation:** Hardware error accessing flash during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0616**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0617**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both TOCs are corrupted.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TOC

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF061A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid partition table.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF061B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: invalid section passed to getSectionInfo.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF061C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: UNCORRECTABLE ECC.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF061D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: section size is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF061E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: mm\_remove\_pages failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF061F**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0620**

**Explanation:** Error accessing system firmware flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0621**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Non ECC protected section is passed to fixECC.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0622**

**Explanation:** A problem occurred while reading PNOR partition table.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0623**

**Explanation:** A problem occurred while reading PNOR partition table.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0627**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Side not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0629**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No valid TOCs found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF0702**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timed out waiting for data in FIFO to read.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timed out waiting for command complete.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0706**

**Explanation:** A problem occurred during the IPL of the system: An error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Master Sentinel chip was used as a target for an I2C operation. This is not permitted.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF070A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid I2C bus speed mode input.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF070B**

**Explanation:** A problem occurred during the IPL of the system: An error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF070C**

**Explanation:** A problem occurred during the IPL of the system: A Bus Arbitration Lost error was found in the I2C status register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF070D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C read/write interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF070E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0710**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There was an error retrieving the EEPROM page mutex for this i2c master engine.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0711**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid page requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0712**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master encountered an error while trying to unlock the eepromPage.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0801**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Could not load/unload module.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0803**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Could not allocate virtual memory.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0804**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Could not set permissions on virtual memory.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0805**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Requested module does not exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0806**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Module is not a data module.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF0807**

**Explanation:** A problem was detected during the IPL of the system: Task crashed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0901**

**Explanation:** A problem was detected during the IPL of the system: A hardware initialization procedure requested an invalid attribute.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0902**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request for EC features on an attribute without EC features.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF090F**

**Explanation:** Error initializing processor/memory subsystem during boot. See FRU list for repair actions.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0910**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0911**

**Explanation:** A problem occurred during the IPL of the system: Request for unsupported or invalid target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0912**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BCFF0913**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed to get requested attribute. Possible causes: Invalid target, attribute not implemented, attribute not present on given target, target service not initialized.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0914**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Attempt to access CFAM register on the master processor chip.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0915**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed to get the FAPI Target name due to unrecognized TARGETING Target model.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0916**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid num of parent chip found for input CFAM target chiplet.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0917**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: NULL TARG Target passed to attribute access macro.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF091B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

#### BCFF091C

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected Target Type passed to attribute access macro.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF091D

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF091E

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Attempt to read an MVPD field using an invalid keyword.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF091F

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure extending memory to 32MEG after exiting cache contained mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0920

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0921

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0922

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0923

**Explanation:** A problem occurred during the IPL of the system: Requested target not present or not functional.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0924

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0925

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The hwsv returned a message where the extra data was null. This should not happen so need to tell HostBoot to stop the ipl.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0926

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The hwsv found an error while processing the message so it sent an error message back to indicate to HostBoot to stop the IPL. Userdata1 will have the error PLID from hwsv's errorlog.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0927

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The hwsv returned a message where there was an error when the powr function was called. userdata1 contains the errorlog plid from hwsv generated by the powr function.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BCFF0928**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HB got an incorrect type message. HB did not provide the correct message type in the istep. Userdata1 shows the message type passed in.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0929**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: fapiPlatGetVpdVersion could not find the expected 1 mba from the passed dimm target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF092A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: messages from other nodes have not returned in time.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF092B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: host coalesce host timer thread failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF092C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Override message received from HWSV contains NULL data pointer.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF092D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error code from hypervisor wakeup call.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF092E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Request given to load payload into mirrored memory, but no mirrored memory exists at that location.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0931**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0932**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0933**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed due to wrong DIMM type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0934**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Either nominal, max turbo or min power save frequency for the processor HUID (userdata1) is zero.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0935**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Input buffer size is smaller than expected length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0936**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Nominal frequency(userdata1) does not match nominal frequency(userdata2) on other cores. Should be the same for all chips.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0937**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid bucket id found for the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0938**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bucket id from PR keyword does not match bucket id in the voltage data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0939**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported #V keyword data version found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF093B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, ultra turbo freq should not be 0.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF093C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: When Workload Optimized Frequency (WOF) is enabled, the WOF Freq Uplift index should be 1,2,3, or 4.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BCFF093D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF093E**

**Explanation:** Error uncompressing payload image from boot flash.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A04**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A08**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A0A**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A0C**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A0F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: FSI and MVPD do not agree.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: FSI and CVPD do not agree.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0A12**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0B02**

**Explanation:** A problem occurred during the IPL of the system. The eyecatch value observed in memory does not match the expected value and therefore the contents of the attribute sections are unable to be parsed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0B03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: While attempting to allocate a virtual memory block for an attribute section, the kernel returned an error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0B04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: While attempting to set permissions on a virtual memory block for an attribute section, the kernel returned an error.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B05

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The attribute resource provider was unable to satisfy a message request from the VMM portion of the kernel. This was either due to an address outside a valid range or a message request that is invalid for the attribute section containing the address.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B06

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Found unhandled attribute section type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B07

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The attribute synchronization code on the service processor side was unable to complete the sync operation successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B08

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The attribute synchronization code on the service processor side was unable to fulfill the sync to HostBoot request.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B09

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The attribute synchronization from the service processor failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B0A

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No MCS target(s) found for the given MEMBUF target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B0B

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No processor target found for the UNIT.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B0C

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Target type not supported by HBRT.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B0D

**Explanation:** During processor/memory subsystem initialization, an error was encountered: AttrOverrideSection too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B0E

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Serialized attribute override chunk too big to fit in remaining chunk of Processor NOR flash section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF0B0F

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failure applying given attribute override on given target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

**BCFF0B10**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Given target does not have given attribute to apply override.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0B11**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0B12**

**Explanation:** Invalid configuration data in firmware pnor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0B80**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The caller passed an invalid node target to find the master proc handle.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0B81**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The caller passed an invalid node target to find the master proc handle.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Attempt to deconfigure a target that is not deconfigurable or not present.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid target encountered in processing of HW callout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient hardware to continue.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C05**

**Explanation:** A problem occurred during the IPL of the system: No functional processor cores were found on the master processor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C06**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C07**

**Explanation:** A problem occurred during the IPL of the system: No functional master processor was found on this node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C08**

**Explanation:** A problem occurred during the IPL of the system: No functional nodes were found on the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF0C09**

**Explanation:** A problem occurred during the IPL of the system: Found no functional dimm cards.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C0A**

**Explanation:** A previously discovered hardware issue is being ignored to allow the system to boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C81**

**Explanation:** A problem occurred during the IPL of the system. Attempt to create a deconfiguration record for a target that is not deconfigurable or not present.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C82**

**Explanation:** A problem occurred during the IPL of the system. Attempt to create a deconfiguration record for a target, but the deconfiguration repository is full.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C83**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid chipid from hardware

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0C84**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HWAS host\_gard: no masterCore found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF0D01**

**Explanation:** A problem occurred during the IPL of the system: Error returned from SCOM engine after write.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0D02**

**Explanation:** A problem occurred during the IPL of the system: Error returned from SCOM engine after read.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0D03**

**Explanation:** A problem occurred during the IPL of the system: Invalid data length for a SCOM operation.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0D04**

**Explanation:** A problem occurred during the IPL of the system: Invalid address on a SCOM operation.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0D05**

**Explanation:** A problem occurred during the IPL of the system: Unsupported SCOM operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF0E02**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time

## BCFF0E03 • BCFF0F07

of the failure. See the error log for the actual replacement strategy.

---

### BCFF0E03

**Explanation:** During processor/memory subsystem initialization, an error was encountered: EEPROM attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0E04

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid EEPROM chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0E05

**Explanation:** During processor/memory subsystem initialization, an error was encountered: DIMM I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0E06

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0E07

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address ofFlash File System(FFS)et size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0E08

**Explanation:** A problem occurred during the IPL of the system: I2C buffer ofFlash File System(FFS)et is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0F01

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Interrupt type already registered.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0F02

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Interrupt resource provider not initialized yet.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0F03

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Interrupt resource provider not initialized yet.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0F04

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The virtual address is not a valid IO address.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0F05

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported ISN Requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF0F07

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error mapping in memory.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1001**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: MDMT could not be found for the supplied topology type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1002**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: MDMT could not find a functional node.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1003**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No TOD drawer could be configured for this topology type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1004**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error: primary and secondary MDMT do not agree on bits

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1005**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error: Unsupported bus type was detected Possible Causes: Invalid bus configuration in targeting, or getBusPort method has not been updated to support all the bus type on a given system. Resolution:Development team should be contacted.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1006**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error: Unsupported bus port was detected for the specified bus type. Possible Causes: Invalid bus configuration in targeting, or getBusPort method has not been updated to support all the possible port for a bus on a given

system type. Resolution:Development team should be contacted.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1007**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error: can not create TOD topology when TOD HW is running.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1008**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error: Erroneous TOD configuration Possible Causes: Programming issue Resolution: Development team should be contacted.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1009**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error: The ordinal Id of one of the TOD procs did not fall in the range

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF100A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Scom access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF100B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Scom access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF100C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Scom access error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF100D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TOD master drawer not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF100E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TOD drawer not specified.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF100F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TOD drawer couldn't be wired.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1101**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Message from service processor. Message type is not within a valid range. Message dropped.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1104**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1105**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Message from service processor. An invalid message queue ID or message type was sent to the service processor.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1107**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Message queue already registered with mailbox using a different queue.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1109**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Retry failed. Bad status indicated in PIB status reg.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF110A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Mailbox Data Write attempted before ACK.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF110B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Mailbox Hardware detected parity error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF110C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid message type sent to mailbox msgQ.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF110D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Host boot mailbox service is not available at this time.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF110E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Failed to allocate a DMA buffer. Message dropped.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF110F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Could not register mailbox message queue.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1110**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Mailbox is disabled, message dropped.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1111**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: An invalid node was specified.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1112**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid msg or msg queue.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1202**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address and size returned from HDAT.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1204**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Cannot unmap the source table section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1205**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Cannot unmap the source table section.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1207**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: MDRT table is not big enough to hold all entries.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1209**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: MDDT table is not big enough to hold all src entries.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF120A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: MDDT table is not big enough to hold all src entries.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF120B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: MDST table entry with page aligned is greater than 32GB.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF120C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: MDDT table entry with page aligned is greater than 32GB.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1301**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected data from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1302**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout from LPC-UART interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1401**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command HW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1402**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: A maint command SW timed out.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad memory pointer received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: End of file reached.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1604**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to load LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: DMA message contains data for wrong LID.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1607**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Message type received from service processor when transferring LID pages.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1608**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Insufficient space provided for LID by calling function.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1609**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to unload LID via host interface.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF160A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to find Lid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF160B**

**Explanation:** Firmware error during boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: IStep failed, see other log(s) with the same PLID for reason.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1702**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1703**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: p8\_pore\_gen\_cpureg returned an error when attempting to change a reg value in the PORE image.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1705**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1706**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1708**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1709**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Call to getParentAffinityTarget requesting the number of EX chips with parent affinity to a core, returned an incorrect vector size, the expected size is 1.

## BCFF170A • BCFF1A04

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF170A

**Explanation:** A problem isolated to firmware occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF170B

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF170C

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF170D

**Explanation:** A problem isolated to firmware or firmware customization occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF1901

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF1902

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF1903

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF1904

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF190C

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF1A01

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error retrieving FAPI attribute.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF1A02

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HDAT Header data not as expected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF1A03

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Tuple is unallocated.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

### BCFF1A04

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Section is not valid in standalone mode.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A05

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error mapping in memory.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A08

**Explanation:** During processor/memory subsystem initialization, an error was encountered: There is no host data for specified kind of payload.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A09

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Requested instance of HSVC\_NODE\_DATA is unallocated.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A0A

**Explanation:** During processor/memory subsystem initialization, an error was encountered: NACA data doesn't seem right.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A0B

**Explanation:** During processor/memory subsystem initialization, an error was encountered: HDAT data block falls outside valid range.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A0C

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unknown section requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A0E

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TCE Table size requested too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A0F

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TCE Table not page aligned.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A10

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TCE Table has not been initialized yet.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A11

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Device Map Fail.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A12

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Device UnMap Failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

#### BCFF1A14

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The size requested is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1A15**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The deallocate went across TCE Allocate space.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1A16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Could not find a valid SPIRA of any type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1A18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Not enough space allocated by HDAT for HostServices System Data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1C01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Inband buffer size less than 8 bytes or NULL data buffer.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1C02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: inband scom invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1C03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: System configuration does not have a Parent MCS for the current centaur.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1C05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: SUE Encountered when collecting IBSCOM Error Data.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1C06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bus failure when attempting to perform IBSCOM operation. IBSCOM disabled.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1C07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The provided address is over 32 bits long which makes it invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1C08**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: PIB error when attempting to perform IBSCOM operation.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1C09**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Detected error doesn't match the address we failed on.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1C0A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Previous error disabled ibscom, so forcing a retry via FSI.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1D01**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D03**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The record enumeration did not have a corresponding string value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D04**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The keyword enumeration did not have a corresponding string value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D05**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Record name does not match value expected for oFlash File System(FFS)et read.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D06**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Buffer for checking Presence Detect was not the correct size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D07**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Basic Memory Type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1D09**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D0B**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D0D**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D0E**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D0F**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D10**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D11**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1D13**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D14**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D15**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D16**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Requested VPD type is invalid or not supported at runtime.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D18**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: VPD write not supported at runtime.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D19**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Runtime VPD interface not linked.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D1A**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Hypervisor returned NULL address for VPD.

**Response:** The FRU callouts are calculated at the time

of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D1B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Reserved size in memory insufficient for runtime VPD.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D1C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: MBOX send not supported in HBRT.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D30**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: The VHDR was invalid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D31**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Both VPD read Processor NOR flash and VPD read HW configs are set to false.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D32**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: writePNOR mm\_remove\_pages FLUSH failed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D33**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unexpected target type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D34**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to resolve the VPD destination (PNOR or SEEPROM).

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1D35**

**Explanation:** Fatal firmware boot error.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1E01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Attempted to purge cache while purge operation was pending.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1E02**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Purge operation never completed.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1E03**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1E05**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1E06**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1E07**

**Explanation:** Failure to verify authenticity of software.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EA0**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EA1**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No Trusted Platform Modules (TPM) found in system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EA2**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EA3**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EA4**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1EA5**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading Trusted Platform Module (TPM) FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EA6**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during marshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EA7**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Marshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EA8**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported command code during unmarshal.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EA9**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EAA**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: TPM log buffer add failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EAB**

**Explanation:** TPM log operation failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EAC**

**Explanation:** TPM log buffer init failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EAD**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional TPMs exist in the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EAE**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Command failure reading TPM FW version.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EAF**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unmarshaling error detected.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EB0**

**Explanation:** TPM log invalid format.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EB1**

**Explanation:** Firmware error during system boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF1EB2**

**Explanation:** Firmware error during system boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1EB3**

**Explanation:** Firmware error during system boot.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF1F01**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: IPC service provider received an unexpected message.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2101**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error retrieving attribute.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2102**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error retrieving attribute.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2201**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2202**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2203**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2204**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2206**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2207**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2208**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF220A**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF220B**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF220D**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF220E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Boot SEEPROM Side Found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF220F**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: ECC or Data Miscompare Fail Reading Back Self Boot Engine (SBE) Verion Information.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2210**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2211**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2212**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Successful Update of Self Boot Engine (SBE) SEEPROM Self Boot Engine (SBE) Verion Information.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF2213**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2214**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error Associated with Updating this Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2215**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Self Boot Engine (SBE) Image Verion Miscompare with Master Target.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2216**

**Explanation:** A problem occurred while updating processor boot code.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2217**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2218**

**Explanation:** Unsupported system configuration.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2300**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF2301**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2302**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2303**

**Explanation:** A problem occurred during the IPL of the system.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2401**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2402**

**Explanation:** Hardware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2403**

**Explanation:** Firmware error accessing internal bus during IPL.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2404**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Error(s) found in OPB and/or LPCHC Status Register.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF2405**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unsupported Reset Level requested.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2406**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2407**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2408**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2409**

**Explanation:** Firmware error during boot flash diagnostics.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2601**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC is not valid.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2602**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle numerator calculated doesn't meet min utilization.

**Response:** The FRU callouts are calculated at the time

---

of the failure. See the error log for the actual replacement strategy.

---

**BCFF2603**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Throttle HW procedure calculated an invalid numerator value.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2605**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC not ready for target state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2606**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to read `FREQ_EXT_BIAS` attributes.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF260E**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Unable to send cmd to OCC exception.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2616**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs did not all reach active state, system will be in Safe Mode.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2618**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid response length received.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2619**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC response had checksum failure.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF261B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid length in OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF261C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid POLL response length.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF261D**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Bad FRU data received in OCC error log.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2622**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid role is POLL response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2623**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Ignoring invalid command.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2624**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No functional OCCs were found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2625**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCCs were not loaded/started successfully.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2626**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: OCC did not change to requested state.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2635**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Timeout waiting for OCC response.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2655**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: No OCC master was found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2701**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2702**

**Explanation:** A problem was detected during the IPL of the system: Device type not supported.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2703**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Trusted Platform Module (TPM) attribute was not found.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2704**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid Trusted Platform Module (TPM) chip to access.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2705**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master entity path doesn't exist.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2706**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: I2C master path target is null.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2707**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

---

**BCFF2708**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) buffer is too large.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF2709**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) underflow.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF270A**

**Explanation:** A problem occurred during the IPL of the system: Trusted Platform Module (TPM) timeout.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF270B**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid operation type.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

**BCFF270C**

**Explanation:** During processor/memory subsystem initialization, an error was encountered: Invalid address offset size.

**Response:** The FRU callouts are calculated at the time of the failure. See the error log for the actual replacement strategy.

---

## (BF67) Reference codes

The Linux operating system detected a failure in the emulex driver.

The first five characters (BFxxx) of these SRCs indicate the driver or subsystem responsible for the error, and the last three characters specifies the error condition. The last three characters of the SRCs are arranged such that 1xx is lowest severity and Fxx is highest severity.

Use the following list to locate the (BF67) Linux SRC that you want to find, then perform the suggested actions.

**Note:** If the suggested action in the User Response field does not work (or if there is no suggested action), use the action specified in the FRU List.

---

**BF677800**

**Explanation:** An ELS IOCB command was posted to a ring and did not complete within ULP timeout seconds.

**Response:** If no ELS command is going through the adapter, reboot the system.

**Failing Item:**

- NEXTLVL

**Failing Item:**

- NEXTLVL

---

**BF677801**

**Explanation:** The driver attempted to issue READ\_SPARAM mailbox command to the HBA but there were no buffer available.

**Response:** This message indicates one of the following conditions:

- A possible lack of memory resources. Try increasing the lpfc *num\_bufs* configuration parameter to allocate more buffers
- A possible driver buffer management problem

---

**BF677802**

**Explanation:** The driver attempted to issue REG\_LOGIN mailbox command to the HBA but there were no buffer available.

**Response:** This message indicates one of the following conditions:

- A possible lack of memory resources. Try increasing the lpfc *num\_bufs* configuration parameter to allocate more buffers
- A possible driver buffer management problem

**Failing Item:**

- NEXTLVL

---

**BF677803**

**Explanation:** This error might indicate a software driver, firmware or hardware problem.

**Response:** This message indicates one of the following conditions:

- Port rsp ring put index is greater than the size of rsp ring
- Port cmd ring get index is greater than the size of cmd ring
- Port cmd ring get index is greater than the size of cmd ring
- The assigned I/O iotag is greater than the max allowed
- The assigned I/O iotag is greater than the max allowed

**Failing Item:**

- NEXTLVL

#### BF677804

**Explanation:** The Rctl/Type of a received frame did not match anyfor the configured masks for the specified ring. This error might indicate a software driver or firmware problem.

**Failing Item:**

- NEXTLVL

#### BF677805

**Explanation:** Received an unknown IOCB command completion. Thiserror might indicate a software driver or firmware problem.

**Failing Item:**

- NEXTLVL

#### BF677806

**Explanation:** The driver wan unable to find a matching command forthe completion received on the specified ring. This error might indicate a software driver or firmware problem.

**Failing Item:**

- NEXTLVL

#### BF677807

**Explanation:** A unknown mailbox command completed. This error mightindicate a software driver, firmware or hardware problem.

**Failing Item:**

- NEXTLVL

#### BF677808

**Explanation:** The configuration parameter for scan-down is out ofrange. Software driver error.

**Failing Item:**

- NEXTLVL

#### BF677809

**Explanation:** The driver attempted to register the HBA interrupt serviceroutine with the host operating system but failed. This error might indicate a hardware or driver problem.

**Failing Item:**

- NEXTLVL

#### BF67780A

**Explanation:** The driver manages its own memory for internal usage.This error indicates a problem occurred in the driver memory management routines. This error might also indicate the host system in low on memory resources. This error might indicate a driver or host operating system problem.

**Failing Item:**

- NEXTLVL

#### BF67780B

**Explanation:** This error might indicate a software driver problem.

**Response:** This message indicates one of the following conditions:

- ASCII string to hex conversion failed. Input byte count less than 1
- ASCII string to hex conversion failed. Input byte count greater than the max num
- ASCII string to hex conversion failed. The output buffer byte size is less than one-half of the input byte count. Every two input chars (bytes) require one output byte

**Failing Item:**

- NEXTLVL

#### BF677A00

**Explanation:** The driver decided to drop an ELS Response ring entry.This error might indicate a software driver or firmware problem.

**Failing Item:**

- NEXTLVL

#### BF677A01

**Explanation:** Received a mailbox completion interrupt and there areno outstanding mailbox commands. This error might indicate a hardware or firmware problem. Update firmware.

**Failing Item:**

- NEXTLVL

## BF677A02 • BF677A0F

---

### BF677A02

**Explanation:** The driver issued a CONFIG\_LINK mbox command to the HBA that failed. This error might indicate a firmware or hardware problem. Update firmware or replace adapter.

**Failing Item:**

- NEXTLVL

---

### BF677A03

**Explanation:** The driver issued a READ\_SPARAM mbox command to the HBA that failed. This error might indicate a firmware or hardware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A04

**Explanation:** The driver issued a CLEAR\_LA mbox command to the HBA that failed. This error might indicate a firmware or hardware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A05

**Explanation:** A read nvparams mailbox command failed during configport. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A06

**Explanation:** The driver cannot find the specified buffer in its mapping table. This error might indicate a software driver or firmware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A07

**Explanation:** The adapter failed during power-up diagnostics after it was reset. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A08

**Explanation:** The adapter failed during power-up diagnostics after it was reset. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A09

**Explanation:** Adapter initialization failed when issuing READ\_REV mailbox command. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A0A

**Explanation:** Outdated firmware was detected during initialization. This error might indicate a hardware or firmware problem. Update firmware.

**Failing Item:**

- NEXTLVL

---

### BF677A0B

**Explanation:** Adapter initialization failed when issuing DUMP\_VPD mailbox command. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A0C

**Explanation:** Adapter initialization failed when issuing CONFIG\_PORT mailbox command. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

### BF677A0D

**Explanation:** Adapter initialization failed when issuing CFG\_RING mailbox command. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A0E

**Explanation:** Adapter initialization failed when issuing CONFIG\_LINK mailbox command. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

### BF677A0F

**Explanation:** Adapter initialization failed when issuing READ\_SPARM mailbox command. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

**BF677A10**

**Explanation:** Adapter initialization failed when issuing READ\_CONFIGmailbox command. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

**BF677A11**

**Explanation:** Adapter initialization failed when

issuing INIT\_LINKmailbox command. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

**BF677A12**

**Explanation:** The driver received an interrupt indicating a possible hardware problem. This error might indicate a hardware or firmware problem.

**Failing Item:**

- NEXTLVL

---

## (BF75) Reference codes

The Linux operating system detected a failure in the ipr driver.

The first five characters (BFxxx) of these SRCs indicate the driver or subsystem responsible for the error, and the last three characters specifies the error condition. The last three characters of the SRCs are arranged such that 1xx is lowest severity and Fxx is highest severity. For example:

- Errors that require you to check cables occur in the 5xx range
- Errors that require you to perform a microcode update occur in the Axx range
- Errors that require you to replace an adapter occur in the Fxx range

Use the following list to locate the (BF75) Linux SRC that you want to find, then perform the suggested actions.

**Note:** If the suggested action in the User Response does not work (or if there is no suggested action), use the action specified in the FRU list.

---

**BF751800**

**Explanation:** 8155: An unknown error was received. Have the customer update the device driver.

**Failing Item:**

- NEXTLVL

**Explanation:** Microcode buffer allocation failed. Have the customer update the adapter microcode.

**Failing Item:**

- NEXTLVL

---

**BF751A00**

**Explanation:** Firmware file %s not found. Have the customer update the adapter microcode.

**Failing Item:**

- NEXTLVL

---

**BF751A03**

**Explanation:** Microcode buffer copy to DMA buffer failed. Have the customer update the adapter microcode.

**Failing Item:**

- NEXTLVL

---

**BF751A01**

**Explanation:** Invalid microcode buffer. Have the customer update the adapter microcode.

**Failing Item:**

- NEXTLVL

---

**BF751A04**

**Explanation:** Microcode download required. Have the customer update the adapter microcode.

**Failing Item:**

- NEXTLVL

---

**BF751A02**

---

**BF751A05**

**Explanation:** Failed to map microcode download

## BF751A06 • BF751D09

buffer. Have the customer update the adapter microcode.

**Failing Item:**

- NEXTLVL

---

### BF751A06

**Explanation:** 8151: IOA microcode error. Have the customer update the adapter microcode and the device driver.

**Failing Item:**

- NEXTLVL

---

### BF751C00

**Explanation:** Adapter being reset due to command timeout. Have the customer update the adapter microcode.

**Failing Item:**

- IOADPTR

---

### BF751C01

**Explanation:** Invalid resource address. Have the customer update the device driver.

**Failing Item:**

- IOADPTR

---

### BF751D00

**Explanation:** 7001: IOA sector reassignment successful. Media error.

**Failing Item:**

- IO\_DEV

---

### BF751D01

**Explanation:** Unsolicited device bus message received.

**Failing Item:**

- IO\_DEV

---

### BF751D02

**Explanation:** Device hardware error.

**Failing Item:**

- IO\_DEV

---

### BF751D03

**Explanation:** Predictive failure analysis.

**Failing Item:**

- IO\_DEV

---

### BF751D04

**Explanation:** Device error. May occur normally during concurrent maintenance.

**Failing Item:**

- IO\_DEV

---

### BF751D05

**Explanation:** Out of alternate sectors for disk storage.

**Failing Item:**

- IO\_DEV

---

### BF751D06

**Explanation:** 9031: Array protection temporarily suspended, protection resuming. Hardware configuration error. Perform MAP 3310 in the *PCI-X SCSI RAID Controller Reference Guide for Linux*.

**Failing Item:**

- NEXTLVL

---

### BF751D07

**Explanation:** This message indicates one of the conditions below.

**Problem determination:**

- Array protection temporarily suspended
- IOA detected device error
- Cache data belongs to devices other than those attached
- Maximum number of arrays already exist
- Incorrect hardware configuration change has been detected

Perform MAP 3390 in the *PCI-X SCSI RAID Controller Reference Guide for Linux*.

**Failing Item:**

- NEXTLVL

---

### BF751D08

**Explanation:** IOA detected a SCSI bus configuration error. Device bus error, message or command phase. Perform MAP 3350 in the *PCI-X SCSI RAID Controller Reference Guide for Linux*.

**Failing Item:**

- NEXTLVL

---

### BF751D09

**Explanation:** IOA cache data exists for a missing or failed device. Perform MAP 3332 in the *PCI-X SCSI RAID Controller Reference Guide for Linux*.

**Failing Item:**

- NEXTLVL

**BF751D0A**

**Explanation:** Disk unit has been modified after the last known status. Incorrect hardware configuration change has been detected. Perform MAP 3333 in the *PCI-X SCSI RAID Controller Reference Guide for Linux* .

**Failing Item:**

- NEXTLVL

**BF751D0B**

**Explanation:** A permanent cache battery pack failure occurred. Perform MAP 3300 in the *PCI-X SCSI RAID Controller Reference Guide for Linux* .

**Failing Item:**

- NEXTLVL

**BF751D0C**

**Explanation:** Cache data associated with attached devices cannot be found. Perform MAP 3320 in the *PCI-X SCSI RAID Controller Reference Guide for Linux* .

**Failing Item:**

- NEXTLVL

**BF751D0D**

**Explanation:** Array missing two or more devices with only one device present. Perform MAP 3311 in the *PCI-X SCSI RAID Controller Reference Guide for Linux* .

**Failing Item:**

- NEXTLVL

**BF751D0E**

**Explanation:** One or more array members not at required physical locations. Perform MAP 3312 in the *PCI-X SCSI RAID Controller Reference Guide for Linux* .

**Failing Item:**

- NEXTLVL

**BF751D0F**

**Explanation:** Array is missing a device and parity is out of sync. Perform MAP 3313 in the *PCI-X SCSI RAID Controller Reference Guide for Linux* .

**Failing Item:**

- NEXTLVL

**BF751D10**

**Explanation:** Required cache data cannot be located for a disk unit. Perform MAP 3331 in the *PCI-X SCSI RAID Controller Reference Guide for Linux* .

**Failing Item:**

- NEXTLVL

**BF751D11**

**Explanation:** IOA resources not available due to previous problems. Perform MAP 3321 in the *PCI-X SCSI RAID Controller Reference Guide for Linux* .

**Failing Item:**

- NEXTLVL

**BF751D12**

**Explanation:** Disk unit requires initialization before use. Perform MAP 3334 in the *PCI-X SCSI RAID Controller Reference Guide for Linux* .

**Failing Item:**

- NEXTLVL

**BF751F00**

**Explanation:** Permanent IOA failure.

**Failing Item:**

- IOADPTR

**BF751F01**

**Explanation:** Invalid response handle from IOA.

**Failing Item:**

- IOADPTR

**BF751F02**

**Explanation:** IOA unit check with no data.

**Failing Item:**

- IOADPTR

**BF751F03**

**Explanation:** IOA taken offline - error recovery failed.

**Failing Item:**

- IOADPTR

**BF751F04**

**Explanation:** Adapter not supported in this hardware configuration. Remove the unsupported adapter from the system.

**Failing Item:**

## BF751F05 • BF770F01

- IOADPTR

---

### BF751F05

**Explanation:** Failed to set PCI DMA mask.

**Failing Item:**

- IOADPTR

---

### BF751F06

**Explanation:** Write of cache line size failed.

**Failing Item:**

- IOADPTR

---

### BF751F07

**Explanation:** Failed to save PCI configuration space.

**Failing Item:**

- IOADPTR

---

### BF751F08

**Explanation:** Soft PCI bus error.

**Failing Item:**

- IOADPTR

---

### BF751F09

**Explanation:** Adapter hardware error.

**Failing Item:**

- IOADPTR

---

## (BF77) Reference codes

The Linux operating system detected a failure in a driver or subsystem.

The first five characters (BFyyy) of these SRCs indicate the driver or subsystem responsible for the error:

- BF77 0xxx specifies the olympic driver
- BF77 5xxx specifies the pnet32 driver
- BF77 6xxx specifies the bcm 5700 driver
- BF77 7xxx specifies the e100 driver
- BF77 8xxx specifies the e1000 driver

The last three characters specify the error condition. The last three characters of the SRCs are arranged such that 1xx is lowest severity and Fxx is highest severity. For example:

- Errors that require you to check cables occur in the 5xx range
- Errors that require you to perform a microcode update occur in the Axx range
- Errors that require you to replace an adapter occur in the Fxx range

Use the following list to locate the (BF77) Linux SRC that you want to find, then perform the suggested actions:

**Note:** If the suggested action in the User Response field does not work (or if there is no suggested action), use the action specified in the FRU List.

---

### BF770800

**Explanation:** The driver was unable to send a received packet to the upper layer protocols because there is insufficient free memory. The customer may need to increase system memory.

**Failing Item:**

- LPARCFG

**Problem determination:**

1. Reload the driver and reset the device to recover lost buffers
2. Upgrade the driver

**Failing Item:**

- NEXTLVL

---

### BF770F01

**Explanation:** The olympic driver was unable to initialize the tokenring card. Corrective action may be possible depending upon the error code.

**Failing Item:**

- IOADPTR

**BF770F02**

**Explanation:** The Cardbus token ring adapter did not respond to initialization commands. Ensure that Cardbus adapter is properly inserted.

**Failing Item:**

- IOADPTR

**BF770F03**

**Explanation:** The token ring adapter was unable to join the ring. Have the customer use the network configuration tool supplied by the distributor to specify a ring speed (instead of automatically detecting ring speed).

**Failing Item:**

- IOADPTR

**BF770F04**

**Explanation:** The adapter open request failed with the specified error code.

**Failing Item:**

- IOADPTR

**BF770F05**

**Explanation:** The specified hardware, PCI or parity error has occurred. Have the customer reset the adapter.

**Failing Item:**

- IOADPTR

**BF770F06**

**Explanation:** The specified interrupt has occurred, but was not expected by the driver or a timeout occurred during device close processing. For occasional occurrences, no action is required. For excessive occurrences, have the customer reset the adapter. If resetting the adapter does not work, perform the action specified in the Failing Item column.

**Failing Item:**

- IOADPTR

**BF770F07**

**Explanation:** Unrecognized srb command or cannot set mac/laa address while card is open. Have the customer reload the driver.

**Failing Item:**

- IOADPTR

**BF770F08**

**Explanation:** A short circuit has been detected.

**Problem determination:**

- Check and replace cables, if necessary
- Check and replace peer stations on ring, if necessary

**Failing Item:**

- IOADPTR

**BF770F09**

**Explanation:** An internal hardware error has been detected in the specified adapter during auto removal processing. Have the customer reload the driver.

**Failing Item:**

- IOADPTR

**BF770F0A**

**Explanation:** An FDX protocol error has been detected. Have the customer reload the driver.

**Failing Item:**

- IOADPTR

**BF770F0B**

**Explanation:** Invalid return code in asb. Have the customer upgrade the driver.

**Failing Item:**

- IOADPTR

**BF775800**

**Explanation:** The driver was unable to use 32-bit DMA. Have the customer verify the driver software level.

**Failing Item:**

- NEXTLVL

**BF775801**

**Explanation:** Memory allocation failed.

**Problem determination:**

1. Verify the driver software level
2. Increase the memory on the system

**Failing Item:**

- NEXTLVL

**BF775802**

**Explanation:** Transmit timed out, resetting. Have the customer verify the driver software level.

**Failing Item:**

## BF775803 • BF776505

- NEXTLVL

---

### BF775803

**Explanation:** A FIFO error has occurred. Have the customer verify the driver software level.

**Failing Item:**

- NEXTLVL

---

### BF775804

**Explanation:** The transmit pointers are out of synchronization. Have the customer verify the driver software level.

**Failing Item:**

- NEXTLVL

---

### BF775F00

**Explanation:** The driver could not enable the PCI device.

**Failing Item:**

- IOADPTR

---

### BF775F01

**Explanation:** The hardware did not request any IO resources.

**Failing Item:**

- IOADPTR

---

### BF775F02

**Explanation:** The IO addresses for the card are already allocated. Have the customer verify the driver software level.

**Failing Item:**

- IOADPTR

---

### BF775F03

**Explanation:** The chip can not be accessed in 32-bit or 16-bit mode. Have the customer verify the driver software level.

**Failing Item:**

- IOADPTR

---

### BF776500

**Explanation:** Unable to find or create the directory under /proc/net. Have the customer verify that procs is supported by the kernel.

**Failing Item:**

- NEXTLVL

---

### BF776501

**Explanation:** Insufficient kernel memory available for allocation.

**Problem determination:**

- Increase the memory on the system
- Install the driver earlier in system bringup

**Failing Item:**

- NEXTLVL

---

### BF776502

**Explanation:** The driver was unable to use either 64-bit or 32-bit DMA. Have the customer verify driver software level.

**Failing Item:**

- NEXTLVL

---

### BF776503

**Explanation:** Linux does not support a hardware feature which has been enabled. Run diagnostics to disable Turbo Teaming.

**Failing Item:**

- NEXTLVL

---

### BF776504

**Explanation:** Memory allocation failed - buffer parameters may be set too high.

**Problem determination:**

1. Reduce the tx\_pkt\_desc\_cnt parameter of the driver
2. Reduce the rx\_std\_desc\_cnt parameter of the driver
3. Reduce the rx\_jumbo\_desc\_cnt parameter of the driver

**Failing Item:**

- NEXTLVL

---

### BF776505

**Explanation:** Conflicting rx\_coalesce\_ticks (0) and rx\_max\_coalesce\_frames(0) parameters.

**Problem determination:**

1. Change the rx\_coalesce\_ticks parameter of the driver
2. Change the rx\_max\_coalesce\_frames parameter of the driver

**Failing Item:**

- NEXTLVL

---

**BF776506**

**Explanation:** Conflicting tx\_coalesce\_ticks (0) and tx\_max\_coalesce\_frames(0) parameters.

**Problem determination:**

1. Change the tx\_coalesce\_ticks parameter of the driver
2. Change the tx\_max\_coalesce\_frames parameter of the driver

**Failing Item:**

- NEXTLVL
- 

**BF776507**

**Explanation:** The value given to the stats\_coalesce\_ticks parameter is invalid. Have the customer change the stats\_coalesce\_ticks parameter of the driver.

**Failing Item:**

- NEXTLVL
- 

**BF776800**

**Explanation:** Either this adapter or the system does not allow the use of adapter based transmit descriptors.

**Problem determination:**

1. Verify the driver software level
2. Change the nic\_tx\_bd parameter

**Failing Item:**

- NEXTLVL
- 

**BF776801**

**Explanation:** This adapter does not support hardware checksum offload.

**Problem determination:**

1. Verify the driver software level
2. Change the driver's rx\_checksum parameter
3. Change the driver's tx\_checksum parameter

**Failing Item:**

- NEXTLVL
- 

**BF776802**

**Explanation:** This adapter does not support hardware TSO.

**Problem determination:**

1. Verify the driver software level
2. Change the driver's enable\_tso parameter

**Failing Item:**

- NEXTLVL
- 

---

**BF776A00**

**Explanation:** This adapter hardware does not support frames sizes over 1500 bytes. Have the customer verify the driver software level. If you replace the adapter, use one that offers additional capabilities

**Failing Item:**

- IOADPTR
- 

**BF776F00**

**Explanation:** Unable to read the adapter's NVRAM. Have the customer verify the driver software level

**Failing Item:**

- IOADPTR
- 

**BF776F01**

**Explanation:** Cannot get MAC addr from NVRAM. Have the customer verify the driver software level

**Failing Item:**

- IOADPTR
- 

**BF776F02**

**Explanation:** Unable to read PCI Config space or NVRAM. Have the customer verify the driver software level

**Failing Item:**

- IOADPTR
- 

**BF777800**

**Explanation:** Internal error in driver, kernel, or firmware.

**Problem determination:**

1. Verify the driver software level.
2. Run diagnostics.

**Failing Item:**

- NEXTLVL
- 

**BF777801**

**Explanation:** Insufficient kernel memory is available for the driver.

**Problem determination:**

1. Install more memory in the system
2. Reconfigure the kernel to reduce memory consumption
3. Install the driver earlier in system bringup

**Failing Item:**

- NEXTLVL
-

---

**BF777802**

**Explanation:** Internal error in driver, kernel, or firmware.

**Problem determination:**

1. Verify the driver software level
2. Run diagnostics

**Failing Item:**

- NEXTLVL
- 

**BF777E00**

**Explanation:** Not enough memory for the driver. Unable to initialize(or reinitialize) the adapter card.

**Problem determination:**

1. Verify the driver software level
2. Reconfigure the kernel to reduce memory consumption, then reboot

**Failing Item:**

- IOADPTR
- 

**BF777E01**

**Explanation:** The BIOS has assigned conflicting address spaces to different devices.

**Problem determination:**

1. Run diagnostics
2. Upgrade the BIOS

**Failing Item:**

- IOADPTR
- 

**BF777E02**

**Explanation:** The driver requested a DMA configuration that your system does not support.

**Problem determination:**

1. Verify the driver software level
2. Run diagnostics

**Failing Item:**

- IOADPTR
- 

**BF777E03**

**Explanation:** The adapter's MAC address is not a valid Ethernet address.

**Problem determination:**

1. Verify the driver software level
2. Run diagnostics

**Failing Item:**

- IOADPTR

---

**BF777F00**

**Explanation:** The EEPROM on the network adapter may be corrupted.

**Failing Item:**

- IOADPTR
- 

**BF777F01**

**Explanation:** The driver cannot enable the adapter as a PCI device.

**Failing Item:**

- IOADPTR
- 

**BF777F02**

**Explanation:** The network adapter failed its self-test.

**Failing Item:**

- IOADPTR
- 

**BF778E00**

**Explanation:** Cannot enable DMA for either 32 bits or 64 bits.

**Failing Item:**

- NEXTLVL
- 

**BF778E01**

**Explanation:** Unable to access PCI data area for checksum value. However, the device id is valid.

**Problem determination:**

- Verify the driver software level
- Run diagnostics
- Replace board

**Failing Item:**

- NEXTLVL
- 

**BF778E02**

**Explanation:** The MAC type is not ethernet as expected.

**Problem determination:**

- Verify the driver software level
- Run diagnostics

**Failing Item:**

- IOADPTR
-

---

**BF778F00**

**Explanation:** Adapter hardware failure.

**Failing Item:**

- IOADPTR

---

## Notices

## Accessibility features for IBM Power Systems servers

Accessibility features assist users who have a disability, such as restricted mobility or limited vision, to use information technology content successfully.

### Overview

The IBM Power Systems servers include the following major accessibility features:

- Keyboard-only operation
- Operations that use a screen reader

The IBM Power Systems servers use the latest W3C Standard, WAI-ARIA 1.0 ([www.w3.org/TR/wai-aria/](http://www.w3.org/TR/wai-aria/)), to ensure compliance with US Section 508 ([www.access-board.gov/guidelines-and-standards/communications-and-it/about-the-section-508-standards/section-508-standards](http://www.access-board.gov/guidelines-and-standards/communications-and-it/about-the-section-508-standards/section-508-standards)) and Web Content Accessibility Guidelines (WCAG) 2.0 ([www.w3.org/TR/WCAG20/](http://www.w3.org/TR/WCAG20/)). To take advantage of accessibility features, use the latest release of your screen reader and the latest web browser that is supported by the IBM Power Systems servers.

The IBM Power Systems servers online product documentation in IBM Knowledge Center is enabled for accessibility. The accessibility features of IBM Knowledge Center are described in the Accessibility section of the IBM Knowledge Center help ([www.ibm.com/support/knowledgcenter/doc/kc\\_help.html#accessibility](http://www.ibm.com/support/knowledgcenter/doc/kc_help.html#accessibility)).

## Keyboard navigation

This product uses standard navigation keys.

## Interface information

The IBM Power Systems servers user interfaces do not have content that flashes 2 - 55 times per second.

The IBM Power Systems servers web user interface relies on cascading style sheets to render content properly and to provide a usable experience. The application provides an equivalent way for low-vision users to use system display settings, including high-contrast mode. You can control font size by using the device or web browser settings.

The IBM Power Systems servers web user interface includes WAI-ARIA navigational landmarks that you can use to quickly navigate to functional areas in the application.

## Vendor software

The IBM Power Systems servers include certain vendor software that is not covered under the IBM license agreement. IBM makes no representation about the accessibility features of these products. Contact the vendor for accessibility information about its products.

## Related accessibility information

In addition to standard IBM help desk and support websites, IBM has a TTY telephone service for use by deaf or hard of hearing customers to access sales and support services:

TTY service  
800-IBM-3383 (800-426-3383)  
(within North America)

For more information about the commitment that IBM has to accessibility, see IBM Accessibility ([www.ibm.com/able](http://www.ibm.com/able)).

---

## Privacy policy considerations

IBM Software products, including software as a service solutions, (“Software Offerings”) may use cookies or other technologies to collect product usage information, to help improve the end user experience, to tailor interactions with the end user, or for other purposes. In many cases no personally identifiable information is collected by the Software Offerings. Some of our Software Offerings can help enable you to collect personally identifiable information. If this Software Offering uses cookies to collect personally identifiable information, specific information about this offering’s use of cookies is set forth below.

This Software Offering does not use cookies or other technologies to collect personally identifiable information.

If the configurations deployed for this Software Offering provide you as the customer the ability to collect personally identifiable information from end users via cookies and other technologies, you should seek your own legal advice about any laws applicable to such data collection, including any requirements for notice and consent.

For more information about the use of various technologies, including cookies, for these purposes, see IBM’s Privacy Policy at <http://www.ibm.com/privacy> and IBM’s Online Privacy Statement at <http://www.ibm.com/privacy/details> the section entitled “Cookies, Web Beacons and Other Technologies” and the “IBM Software Products and Software-as-a-Service Privacy Statement” at <http://www.ibm.com/software/info/product-privacy>.

## Electronic emission notices

When attaching a monitor to the equipment, you must use the designated monitor cable and any interference suppression devices supplied with the monitor.

## Class A Notices

The following Class A statements apply to the IBM servers that contain the POWER8 processor and its features unless designated as electromagnetic compatibility (EMC) Class B in the feature information.

## Federal Communications Commission (FCC) Statement

**Note:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. IBM is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

## Industry Canada Compliance Statement

CAN ICES-3 (A)/NMB-3(A)

## European Community Compliance Statement

This product is in conformity with the protection requirements of EU Council Directive 2014/30/EU on the approximation of the laws of the Member States relating to electromagnetic compatibility. IBM cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product, including the fitting of non-IBM option cards.

**Warning:** This is a Class A product. In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

### VCCI Statement - Japan

この装置は、クラスA情報技術装置です。この装置を家庭環境で使用すると電波妨害を引き起こすことがあります。この場合には使用者が適切な対策を講ずるよう要求されることがあります。 VCCI-A

The following is a summary of the VCCI Japanese statement in the box above:

This is a Class A product based on the standard of the VCCI Council. If this equipment is used in a domestic environment, radio interference may occur, in which case, the user may be required to take corrective actions.

本装置は、「高圧又は特別高圧で受電する需要家の高調波抑制対策ガイドライン」対象機器（高調波発生機器）です。

- 回路分類 : 5 (3相、PFC回路付)
- 換算係数 : 0

### Electromagnetic Interference (EMI) Statement - People's Republic of China

声 明

此为 A 级产品,在生活环境中,该产品可能会造成无线电干扰。在这种情况下,可能需要用户对其干扰采取切实可行的措施。

Declaration: This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may need to perform practical action.

### Electromagnetic Interference (EMI) Statement - Taiwan

警告使用者：

這是甲類的資訊產品，在居住的環境中使用時，可能會造成射頻干擾，在這種情況下，使用者會被要求採取某些適當的對策。

The following is a summary of the EMI Taiwan statement above.

Warning: This is a Class A product. In a domestic environment this product may cause radio interference in which case the user will be required to take adequate measures.

이 기기는 업무용 환경에서 사용할 목적으로 적합성평가를 받은 기기로서 가정용 환경에서 사용하는 경우 전파간섭의 우려가 있습니다.

**Germany Compliance Statement**

**Deutschsprachiger EU Hinweis: Hinweis für Geräte der Klasse A EU-Richtlinie zur Elektromagnetischen Verträglichkeit**

Dieses Produkt entspricht den Schutzanforderungen der EU-Richtlinie 2014/30/EU zur Angleichung der Rechtsvorschriften über die elektromagnetische Verträglichkeit in den EU-Mitgliedsstaaten und hält die Grenzwerte der EN 55022 / EN 55032 Klasse A ein.

Um dieses sicherzustellen, sind die Geräte wie in den Handbüchern beschrieben zu installieren und zu betreiben. Des Weiteren dürfen auch nur von der IBM empfohlene Kabel angeschlossen werden. IBM übernimmt keine Verantwortung für die Einhaltung der Schutzanforderungen, wenn das Produkt ohne Zustimmung von IBM verändert bzw. wenn Erweiterungskomponenten von Fremdherstellern ohne Empfehlung von IBM gesteckt/eingebaut werden.

EN 55022 / EN 55032 Klasse A Geräte müssen mit folgendem Warnhinweis versehen werden:  
"Warnung: Dieses ist eine Einrichtung der Klasse A. Diese Einrichtung kann im Wohnbereich Funk-Störungen verursachen; in diesem Fall kann vom Betreiber verlangt werden, angemessene Maßnahmen zu ergreifen und dafür aufzukommen."

**Deutschland: Einhaltung des Gesetzes über die elektromagnetische Verträglichkeit von Geräten**

Dieses Produkt entspricht dem "Gesetz über die elektromagnetische Verträglichkeit von Geräten (EMVG)". Dies ist die Umsetzung der EU-Richtlinie 2014/30/EU in der Bundesrepublik Deutschland.

**Zulassungsbescheinigung laut dem Deutschen Gesetz über die elektromagnetische Verträglichkeit von Geräten (EMVG) (bzw. der EMC Richtlinie 2014/30/EU) für Geräte der Klasse A**

Dieses Gerät ist berechtigt, in Übereinstimmung mit dem Deutschen EMVG das EG-Konformitätszeichen - CE - zu führen.

Verantwortlich für die Einhaltung der EMV Vorschriften ist der Hersteller:  
International Business Machines Corp.  
New Orchard Road

Armonk, New York 10504  
Tel: 914-499-1900

Der verantwortliche Ansprechpartner des Herstellers in der EU ist:

email: HalloIBM@de.ibm.com

Generelle Informationen:

Das Gerät erfüllt die Schutzanforderungen nach EN 55024 und EN 55022 / EN 55032 Klasse A.

### **Electromagnetic Interference (EMI) Statement - Russia**

**ВНИМАНИЕ!** Настоящее изделие относится к классу А.  
В жилых помещениях оно может создавать  
радиопомехи, для снижения которых необходимы  
дополнительные меры

### **Class B Notices**

The following Class B statements apply to features designated as electromagnetic compatibility (EMC) Class B in the feature installation information.

### **Federal Communications Commission (FCC) Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult an IBM-authorized dealer or service representative for help.

Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. Proper cables and connectors are available from IBM-authorized dealers. IBM is not responsible for any radio or television interference caused by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
