

Multi-Switch Interconnect Module for IBM BladeCenter HT

Attention: Do not ship the Multi-Switch Interconnect Module for IBM® BladeCenter® HT installed in a BladeCenter HT unit unless the BladeCenter HT unit is installed and shipped in a rack configuration.

This document describes the Multi-Switch Interconnect Module for IBM BladeCenter HT. The interconnect module converts a stacked pair of high-speed I/O-module bays into two standard I/O-module bays. You can install up to two I/O modules in the interconnect module. See your BladeCenter HT documentation for more information about installing I/O modules into I/O-module bays. The procedure for installing I/O modules into the interconnect module is the same as that for installing I/O modules into BladeCenter I/O-module bays.

See the documentation that came with your BladeCenter unit for additional information.

Option package contents

The interconnect module option package contains the following items. If any items are missing or damaged, contact your place of purchase.

- Multi-Switch Interconnect Module for IBM BladeCenter HT
- Upper tray with interposer
- Lower tray with interposer
- This *Getting Started* guide
- The IBM Documentation CD (includes the *Installation Guide* and the *Safety Information* documents)
- *Safety Information*

See the *Installation Guide* that comes with your BladeCenter HT unit for instructions about removing the stacked high-speed I/O modules or fillers from BladeCenter I/O-module bays 7 and 8 or 9 and 10.

For detailed information about the interconnect module, see the *Installation Guide* on the IBM *Documentation CD*.

The *Installation Guide* also includes information about the following topics:

- Complete installation instructions
- Warranty
- Getting help and technical assistance
- Notices

The interconnect module complies with Federal Communications Commission (FCC) Class A limits. For more information, see the "Electronic emission notices" section in the *Installation Guide* on the IBM *Documentation CD*.
